Enele Ma`afu, son of Aleamotu`a, Tu`i Kanokupolu, grew up during a time of unprecedented social and political change in Tonga following the advent of Christianity. Moving to Lau, Fiji, in 1847 when he was about 21, he skilfully exploited kinship links to establish a power base there and in eastern Cakaudrove. His achievements were recognised in 1853 when his cousin King Tupou I appointed Ma`afu as Governor of the Tongans in Fiji. Acting as a putative champion of the lotu, Ma`afu undertook successful military campaigns elsewhere in Fiji and, after adding the Yasayasa Moala and the Exploring Isles to the nascent Lauan state, he was able to establish the Tovata ko Lau, a union of Lau, Cakaudrove and Bua, with himself as head. His

power was formally recognised in 1869 when the Lauan chiefs appointed him as Tui Lau, a new title in the polity of Fiji. Ma`afu was now able to challenge Cakobau for the mastery of Fiji. After serving as Viceroy during the farcical planter oligarchy known as the Kingdom of Fiji, Ma`afu underwent a severe humiliation when, in order to maintain his power in Lau, he was forced to accede to the wishes of Fiji's other great chiefs in offering their islands to Great Britain. He would end his days as Roko Tui Lau, a 'subordinate administrator' in the Crown Colony of Fiji, presiding over a province characterised by corruption and maladministration but where the legacy of his earlier innovative land reforms has endured.

"Soldier Extraordinaire explores the colorful life and varied accomplishments of Brig. Gen. Frank "Pinkie" Dorn, an unusual player on the world stage during the 1920s and beyond World War II. Over the course of his 30-year Army career, Dorn manifested probing observations and analyses especially of Asia. He produced writings on subjects ranging from Philippine native tribes to Peking's Forbidden City and the origins of the Sino-Japanese War that began in 1937. Following the end of World War II, he was closely involved in Gen. Douglas MacArthur's brilliant occupation and pacification of Japan. Beyond his military successes, Dorn created world-class art, enjoyed cooking and writing cookbooks, was renowned for his cartography skills, and relished opportunities to comment on the frequent maelstroms and interplay of relevant personalities on social and military scenes."--Provided by publisher.

Film production in Latin America is as old as cinema itself, but local film industries have always been in a triangulated relationship with Hollywood and European cinema. This book situates Latin American film industries within the global circulation of film production, exhibition and distribution, charting the changes that the industries have undergone from the sound era to the present day. Focusing in particular on Argentina, Brazil and Mexico, Tamara Falicov examines commonalities among Latin American film industries, such as the challenges of procuring funding, competition from Hollywood, state funding battles, and the fickle nature of audiences, as well as censorship issues, competition from television, and the transnational nature of Latin American film. She addresses production, exhibition, and distribution contexts and financing and co-production with Europe and the United States, as well as the role of film festivals in funding and circulating films both within and outside of Latin America. Newer trends such as the revival of protectionist measures like the screen quota are framed in contrast to the U.S.'s push for trade policy liberalization and issues of universal concern such as film piracy, and new technologies and the role of television in helping and hindering Latin American cinema.

The adulteration and fraudulent manufacture of medicines is an old problem, vastly aggravated by modern manufacturing and trade. In the last decade, impotent antimicrobial drugs have compromised the treatment of many deadly diseases in poor countries. More recently, negligent production at a Massachusetts compounding pharmacy sickened hundreds of Americans. While the national drugs regulatory authority (hereafter, the regulatory authority) is responsible for the safety of a country's drug supply, no single country can entirely guarantee this today. The once common use of the term counterfeit to describe any drug that is not what it claims to be is at the heart of the argument. In a narrow, legal sense a counterfeit drug is one that infringes on a registered trademark. The lay meaning is much broader, including any drug made with intentional deceit. Some generic drug companies and civil society groups object to calling bad medicines counterfeit, seeing it as the deliberate conflation of public health and intellectual property concerns. Countering the Problem of Falsified and Substandard Drugs accepts the narrow meaning of counterfeit, and, because the nuances of trademark infringement must be dealt with by courts, case by case, the report does not discuss the problem of counterfeit medicines.

For a principled refutation of the 9/11 propaganda myth in all its parts, Tarpley's work is indispensable. This new, fifth edition adds a significant new dimension. Tarpley's documentation of a comprehensive array of 9/11 drills may prove as revolutionary as the thesis of controlled demolition - perhaps even more so. Many people have been unable to see that 9/11 was a false flag. They may seem immune to physical facts like the free-fall speed of the towers, as they take refuge in a lack of engineering qualifications. No math skills are needed to grasp the more familiar, common-sense

fact that an act that is rehearsed is also staged. Moreover, when we learn how drills are essential to conduit such operations, we can recognize many types of false flags, such as the London bombings, and not only building collapses. Finally, wider public awareness of the dangerous workings of drills could help prevent terror operations, by making them too difficult to carry out with impunity. The authoritative work on 9/11 and state-sponsored false-flag terrorism. *9/11 Synthetic Terror* is the only book to present a working model for the event - a network of moles, patsies, paramilitary pros, privatized intelligence assets and corrupt media corporations. We see how this enormous provocation was successfully executed and exploited as war propaganda. This new, fifth edition reveals a whole new dimension of explosive facts for the first time: the enormous array of drills in which the US defense apparatus rehearsed every aspect of the 9/11 operation. Author Webster Tarpley presents the corpus of 9/11 research - such as the controlled demolition of the three WTC towers - from the perspective of a veteran intelligence expert and historian. The exploit is placed in the geopolitical context of oligarchy and imperialism - in the tradition of precedents such as the Gunpowder Plot, the USS Maine, the Strategy of Tension, and other historically decisive state-sponsored terror subterfuges.

When she was 19 months old, Helen Keller (1880-1968) suffered a severe illness that left her blind and deaf. Not long after, she also became mute. Her tenacious struggle to overcome these handicaps — with the help of her inspired and inspiring teacher, Anne Sullivan — is one of the great stories of human courage and dedication. *The Story of My Life*, first published in 1903, is Helen Keller's classic autobiography detailing the first 22 years of her life, including the magical moment at a water pump when, recognizing the connection between the word "water" and the cold liquid flowing over her hand, she realized that objects had names. She had many experiences which were equally thrilling and noteworthy including her joy at eventually learning to speak so that by the time she was 16, she could speak well enough to attend preparatory school followed by her education at Radcliffe, from which she graduated cum laude, and of course, her extraordinary relationship with Miss Sullivan who had shown a remarkable gift and genius for communicating with her eager and quick-to-learn pupil. Keller also writes of her friendships with Oliver Wendell Holmes, Edward Everett Hale and other notables. Keller first began to write *The Story of My Life* in 1902, when she was still a student at Radcliffe College. The book is dedicated to inventor Alexander Graham Bell, and the dedication reads, "To ALEXANDER GRAHAM BELL Who has taught the deaf to speak and enabled the listening ear to hear speech from the Atlantic to the Rockies, I dedicate this *Story of My Life*."

Intensely persecuted during the English Interregnum, early Quakers left a detailed record of the suffering they endured for their faith. Margaret Fell, *Letters, and the Making of Quakerism* is the first book to connect the suffering experience with the communication network that drew the faithful together to create a new religious community. This study explores the ways in which early Quaker leaders, particularly Margaret Fell, helped shape a stable organization that allowed for the transition from movement to church to occur. Fell's role was essential to this process because she developed and maintained the epistolary exchange that was the basis of the early religious community. Her efforts allowed for others to travel and spread the faith while she served as nucleus of the community's communication network by determining how and where to share news. Memory of the early years of Quakerism were based on the letters Fell preserved. Marjon Ames analyzes not only how Fell's efforts shaped the inchoate faith, but also how subsequent generations memorialized their founding members.
