**The Ultimate Guide to Homeschooling: Year 2001 Edition** Effortless Math Education [www.EffortlessMath.com](http://www.EffortlessMath.com)

Math is much easier when you know why you're doing it! Your Personal Math Tutor was initiated by many high school students helped by Henry (Mr. B) Banville over the years. He has shown them that math can be fun! You have made my self esteem stronger and you have shown me shortcuts to help me understand each problem. Laura M.- Geometry Now I have a better way to do my math. Audry R.- 5th grade ...and ended the quarter with a 93! You're a great teacher. Matt D.- Algebra II He provides alternate learning methods which help me very much. Lynn Ann B.- College Algebra (went from C to A+) You explain Geometry so well! Amanda R. Your Personal Math Tutor is a supplement to textbooks on Algebra, Geometry, Trigonometry and Pre-Calculus, with aids for students preparing for the SAT exam, all in one book which can be passed on to siblings. There's no need to buy several books that each cover one topic. Contrary to methods presented in textbooks, he shows how to factor trinomials by inspection and investigation rather than trial and error. Who would want to be the pilot of an experimental airplane designed by trial and error?

The SAT I Math Tutor Effortless Math

No one ever thinks the unthinkable will happen. When Grace Hughes's family was murdered outside their suburban home the police told her it was a senseless tragedy. Just another madman with a gun. Happens every day in America. One year later and still overwhelmed by grief, Grace struggles to make sense of her shattered world. Then Grace meets two abandoned children in desperate need of help and she discovers a newfound sense of purpose. But as Grace starts to heal, secrets about her husband's past unfold. Grace begins to wonder, did her husband and daughter really die because they were in the wrong place at the wrong time, or were their deaths the result of something far more sinister?

101 Weird Ways to Make Money John Wiley & Sons

AFOQT Math Tutor Effortless Math Education [www.EffortlessMath.com](http://www.EffortlessMath.com)

Jamie Blair, John Tobey, and Jeff Slater are experienced developmental math authors and "active" classroom teachers. They have carefully crafted their texts to support students in this course by staying with them every step of the way. Blair, Tobey and Slater... "With you every step of the way." This 3rd edition of "Prealgebra" is appropriate for a 1-semester course in Prealgebra and was designed to

bridge the gap between arithmetic and algebra topics. Intended for those students who are preparing to take an elementary algebra course and have either not studied algebra or have been previously unsuccessful in arithmetic or algebra. This text integrates algebra rules and concepts with those of arithmetic, spiraling the topics and teaching "why," not memorization. Also teaches students the specific study skills necessary to accommodate their individual learning styles.

Private tutoring represents a billion-dollar industry in the United States, serving millions of students a year. For educators, a home-based tutoring business may represent a part-time job to supplement their teaching income, a flexible career choice after having their own children or retiring from the classroom, or a uniquely fulfilling way to work one-on-one with children who need specialized help. But other people with expertise in various fields, including those with business skills, can also capitalize on this trend. In this comprehensive guide, a longtime teacher and tutor shows them how to do so. \* Get paid to help kids succeed \* Make parents your ally \* Build trust with students \* Set your own schedule \* Market your expertise \* Become the tutor everybody wants!

*na* Harlequin  
School Choice in China explores the major characteristics of schooling options in China, highlighting how largely middle-class parents exploit their cultural, economic and social capital for their children's admission into choice schools. It highlights how payments such as choice fees, donations, prize-winning certificates and awards, as well as the use of guanxi, result in Chinese school choice as a parent-driven, bottom-up movement. The author also explores how schools and local governments cash in on the school choice fever in order to obtain significant economic returns, leading to policies that accommodate the needs of mostly middle-class families. He argues that although this system seems to create winners among the parties involved, it exacerbates the educational inequality that already exists in Chinese society. Chapters include: Positional competition for cultural capital Exploitation of social capital Economics of school choice Class reproduction through parental choice This book is not simply a detailed analysis of Chinese school choice practices, but also a study of the competitive middle class search for advantage for their children. As such it will be beneficial to undergraduates, postgraduates, education professionals, policy makers, and anyone with an interest in education, sociology, social policy, and the rise and future of China.
