SchoolsBuilding
Academic VocabularyIn
Building Academic
Vocabulary: Teacher s
Manual, Robert J.
Marzano and Debra J.
Pickering give teachers
a practical way to help
students master
academic vocabulary.
Research has shown
that when teachers,
schools, and districts
take a systematic
approach to helping
students identify and
master essential
vocabulary and
concepts of a given
subject area, student
comprehension and
achievement rises. In
the manual, readers
will find the following
tools: * A method to
help teachers, schools,
and districts determine
which academic
vocabulary terms are
most essential for their
needs * A six-step
process for direct

instruction in subject
area vocabulary * A
how-to to help
students use the
Building Academic
Vocabulary: Student
Notebook. The six-step
method encourages
students to learn
critical academic
vocabulary by
connecting these terms
to prior knowledge
using linguistic and
non-linguistic means
that further encourage
the refinement and
deepening of their
understanding. *
Suggestions for
tailoring academic
vocabulary procedures
for English Language
Learners. * Samples
and blackline masters
for a variety of review
activities and games
that reinforce and
refine student
understanding of the
academic terms and
concepts they learn.

The book also includes a list of 7, 923 vocabulary terms culled from the national standards documents and other publications, organized into 11 subject areas and 4 grade-level categories. Building Academic Vocabulary: Teacher s Manual puts into practice the research and ideas outlined in Marzano s previous book Building Background Knowledge for Academic Achievement. Using the teacher s manual and vocabulary notebooks, educators can guide students in using tools and activities that will help them deepen their own understanding of critical academic vocabulary--the building blocks for achievement in each discipline.Guidelines
