 Readers' Favorite (5-Star Review): "Observe to Unmask: 100 Small Things to Know People Better by Pushpendra Mehta is a tidy little book with big,

helpful insights into the human heart and psyche." "Pushpendra Mehta has written a must-read book for anyone on a quest to understand people better, including themselves, and benefit from these insights for a happier and more fulfilling life...Read this book - and learn from one of the best." - Stacey Chillemi, Founder of The Complete Herbal Guide, Writer, Huff Post and Thrive Global Pushpendra Mehta, writer, marketer, and mentor, has been an observer of human behavior all his life. Inspired by Sir Arthur Conan Doyle's memorable fictional detective character, Sherlock Holmes, Pushpendra realized people drop subtle clues to their true nature, which is often hidden behind masks. The more he watched and studied, the better able he was to discern who people truly were. In 2019, he answered a question-"What small thing can tell you a lot about a person?"-that was posted on Quora, a popular question-and-answer website. His answer received over 1 million views. This unexpected response led him to write *Observe to Unmask*, in which he explains what we can learn about people based on their conversations (including social media posts), interests, behavior, emotions, thoughts, and more. Packed with intriguing insights, *Observe to Unmask* is useful in understanding not only the people in our personal and professional lives, but can act as a guide for self-reflection and improvement. Short and easy to read, it is a book you will turn to again and again, always finding something new and worthwhile. *Observe to Unmask* will sharpen your ability to draw conclusions quickly and accurately from the smallest observations. It will help you develop positive relationships or harmonious associations that work for you and make you happier; assist you in comprehending an individual's backstory; prevent you from being exploited, abused, manipulated, or lied to; aid you in distancing yourself from negative or toxic people, or avoiding them as much as possible.

A compassionate, shame-free guide for your darkest days "A one-of-a-kind book . . . to read for yourself or give to a struggling friend or loved one without the fear that depression and suicidal thoughts will be minimized, medicalized or over-spiritualized."—Kay Warren, cofounder of Saddleback Church What happens when loving Jesus doesn't cure you of depression, anxiety, or suicidal thoughts? You might be crushed by shame over your mental illness, only to be told by well-meaning Christians to "choose joy" and "pray more." So you beg God to take away the pain, but nothing eases the ache inside. As darkness lingers and color drains from your world, you're left wondering if God has abandoned you. You just want a way out. But there's hope. In *I Love Jesus, But I Want to Die*, Sarah J. Robinson offers a healthy, practical, and shame-free guide for Christians struggling with mental illness. With unflinching honesty, Sarah shares her story of battling depression and fighting to stay alive despite toxic theology that made her afraid to seek help outside the church. Pairing her own story with scriptural insights, mental health research, and simple practices, Sarah helps you reconnect with the God who is present in our deepest anguish and discover that you are worth everything it takes to get better. Beautifully written and full of hard-won wisdom, *I Love Jesus, But I Want to Die* offers a path toward a rich, hope-filled life in Christ, even when healing doesn't look like what you expect.

Kirkus' Best Fiction of 2017 From New York Times bestselling author Cory Doctorow, an epic tale of revolution, love, post-scarcity, and the end of death. "Walkaway is now the best contemporary example I know of, its utopia glimpsed after fascinatingly-extrapolated revolutionary struggle."

—William Gibson Hubert Vernon Rudolph Clayton Irving Wilson Alva Anton Jeff Harley Timothy Curtis Cleveland Cecil Ollie Edmund Eli Wiley Marvin Ellis Espinoza—known to his friends as Hubert, Etc—was too old to be at that Communist party. But after watching the breakdown of modern society, he really has no where left to be—except amongst the dregs of disaffected youth who party all night and heap scorn on the sheep they see on the morning commute. After falling in with Natalie, an ultra-rich heiress trying to escape the clutches of her repressive father, the two decide to give up fully on formal society—and walk away. After all, now that anyone can design and print the basic necessities of life—food, clothing, shelter—from a computer, there seems to be little reason to toil within the system. It's still a dangerous world out there, the empty lands wrecked by climate change, dead cities hollowed out by industrial flight, shadows hiding predators animal and human alike. Still, when the initial pioneer walkaways flourish, more people join them. Then the walkaways discover the one thing the ultra-rich have never been able to buy: how to beat death. Now it's war - a war that will turn the world upside down. Fascinating, moving, and darkly humorous, *Walkaway* is a multi-generation SF thriller about the wrenching changes of the next hundred years...and the very human people who will live their consequences. Preeminent psychologist Lisa Barrett lays out how the brain constructs emotions in a way that could revolutionize psychology, health care, the legal system, and our understanding of the human mind. "Fascinating . . . A thought-provoking journey into emotion science."—The Wall Street Journal "A singular book, remarkable for the freshness of its ideas and the boldness and clarity with which they are presented."—Scientific American "A brilliant and original book on the science of emotion, by the deepest thinker about this topic since Darwin."—Daniel Gilbert, best-selling author of *Stumbling on Happiness* The science of emotion is in the midst of a revolution on par with the discovery of relativity in physics and natural selection in biology. Leading the charge is psychologist and neuroscientist Lisa Feldman Barrett, whose research overturns the long-standing belief that emotions are automatic, universal, and hardwired in different brain regions. Instead, Barrett shows, we construct each instance of emotion through a unique interplay of brain, body, and culture. A lucid report from the cutting edge of emotion science, *How Emotions Are Made* reveals the profound real-world consequences of this breakthrough for everything from neuroscience and medicine to the legal system and even national security, laying bare the immense implications of our latest and most intimate scientific revolution.

Atlanta was always a dangerous city. An ancient power is stalking her adopted mother, Kate Daniels, an enemy unlike any other, and a string of horrifying murders is its opening gambit. If Aurelia's true identity is discovered, those closest to her will die. So her plan is simple: get in, solve the murders, prevent the prophecy from being fulfilled, and get out without being recognized.
