Law and the Christian Tradition in Italy Univ of Wisconsin Press

The standard image of Indian society emphasizes its largely agrarian economy and parochial outlook, yet this image ignores the major economic and political role of commerce and artisan production. This book presents a study of one of the most important artisan-merchant communities, the weavers, who form the second largest sector of the south Indian economy. It thus offers an important corrective to the unbalanced picture that we have of Indian social organization from those accounts that have focused almost exclusively on agrarian society. Professor Mines traces the role of the weaver-merchants in the organization, of south Indian states and society from the medieval period to the present, and shows that at times in their history they rivalled the status and power of the agriculturalists. He also demonstrates that, far from being provincial, the weavers have for centuries maintained supralocal organizations to administer their affairs and represent their interests. As the political economy has changed, so they have modified

their organizations and created new ones better to fit changing conditions and interests.

Using the iconography of New Deal murals and plays to interpret the cultural history of the 1930s, Engendering Culture demonstrates that the visual and dramatic images of each form contain an underlying vocabulary of gender: a stock of commonly used poses, subjects, settings, and dramatic roles that encode recognizable characteristics of manhood and womanhood.

Features five of the author's best early stories: title selection plus "The Phantom Rickshaw," "Wee Willie Winkie," "Without Benefit of Clergy" and "The Strange Ride of Morrowbie Jukes."

e-Pedia: Game of Thrones (season 6) Psychology Press

The author concentrates on Matthew's explicit references and allusions to the prophet Jeremiah, and as a result sheds fresh light upon an important and distinctive theme in Matthew's Gospel.

Taking a theme never examined in detail before, and using the varied resources of sociological criticism and Jewish studies, Knowles makes an original and substantial contribution to Matthaean scholarship.

These ardent, even obsessed, poems about erotic passion are among the brightest jewels in the

crown of Latin literature. Written by Propertius, Rome's greatest poet of love, who was born around 50 b.c., a contemporary of Ovid, these elegies tell of Propertius' tormented relationship with a woman he calls "Cynthia." Their connection was sometimes blissful, more often agonizing, but as the poet came to recognize, it went beyond pride or shame to become the defining event of his life. Whether or not it was Propertius' explicit intention, these elegies extend our ideas of desire, and of the human condition itself.

Ancient-Future Bible Study incorporates contemporary study of the Bible with an experience of the church's most ancient way of reading Scripture, lectio divina. This time-honored practice consists of five basic movements: biblical study (lectio), reflection (meditatio), prayer (oratio), discernment (contemplatio), and contemplative action (operatio). In six clearly written volumes, bestselling author Stephen Binz helps readers study the Bible in a way that leads to spiritual transformation and brings them closer to God. Binz leads readers in a vivid study of key biblical characters, including Abraham, Paul, Peter, David, the women of the Torah, and the women of the Gospels. He shows all Christians who desire to have a transforming experience with the inspired Word of God how studying Scripture through lectio divina can enrich their discipleship. This ecumenical Bible study, designed for use by individuals or groups, includes questions for personal reflection and suggested action. Each volume includes leader's notes for guiding a study over the course of six sessions.

Mo Bao was originally an ordinary girl, but ever since he picked up a meaty white ball and returned home, his life had undergone a tremendous change ...Every morning when he woke up, he would find himself at home in a large supernatural accident scene.Eh? Why is the refrigerator gone?Ah? Where was the bed in the bedroom?What? Had it been eaten by his beloved pet?That day, when the white ball sleeping in his arms had turned into an incomparably handsome man, Mo Bao's breathing had become unstable, and he had thrown himself into the man's embrace.As long as one's looks were good, race wasn't important.In the future, she could even brag about it while dancing in the plaza. Back then, she was someone who had slept with the Taotie before ...

Firmly rooted on Roman and canon law, Italian legal culture has had an impressive influence on the civil law tradition from the Middle Ages to present day, and it is rightly regarded as "the cradle of the European legal culture." Along with Justinian's compilation, the US Constitution, and the French Civil Code, the Decretum of Master Gratian or the so-called Glossa ordinaria of Accursius are one of the few legal sources that have influenced the entire world for centuries. This volume explores a millennium-long story of law and religion in Italy through a series of twenty-six biographical chapters written by distinguished legal scholars and historians from Italy and around the world. The chapters range from the first Italian civilians and canonists, Irnerius and Gratian in the early twelfth century, to the leading architect of the Second Vatican Council, Pope Paul VI. Between these two bookends, this volume offers notable case studies of familiar civilians like Bartolo, Baldo, and Gentili and familiar canonists like Hostiensis, Panormitanus, and Gasparri but also a number of other jurists in the broadest sense who deserve much more attention especially

outside of Italy. This diversity of international and methodological perspectives gives the volume its unique character. The book will be essential reading for academics working in the areas of Legal History, Law and Religion, and Constitutional Law and will appeal to scholars, lawyers, and students interested in the interplay between religion and law in the era of globalization.

Since W. B. Yeats wrote in 1890 that "the man of science is too often a person who has exchanged his soul for a formula," the anti-scientific bent of Irish literature has often been taken as a given. Science, Technology, and Irish Modernism brings together leading and emerging scholars of Irish modernism to challenge the stereotype that Irish literature has been unconcerned with scientific and technological change. The collection spotlights authors ranging from James Joyce, Elizabeth Bowen, Flann O'Brien, and Samuel Beckett to less-studied writers like Emily Lawless, John Eglinton, Denis Johnston, and Lennox Robinson. With chapters on naturalism, futurism, dynamite, gramophones, uncertainty, astronomy, automobiles, and more, this book showcases the far-reaching scope and complexity of Irish writers' engagement with innovations in science and technology. Taken together, the fifteen original essays in Science, Technology, and Irish Modernism map a new literary landscape of Ireland in the twentieth century. By focusing on writers' often-ignored interest in science and technology, this book uncovers shared concerns between revivalists, modernists, and late modernists that challenge us to rethink how we categorize and periodize Irish literature.

A study of the development of Christianity in the West, showing how the church developed in the different regions, based on literary and archaeological evidence. Appeal is often made in ecumenical discussion between East and West to the standard of the undivided church of the first centuries of the Christian era, but understanding is not helped by the assumption that the divergences between East and West did not seriously arise in this early period. One of the many services rendered by the author is to show that Western Christendom had distinctive features from the beginning, and that it had a unity of "culture" other than that imposed by the Papal See. In his use of recent archaeological studies and of the "apocryphal" New Testament, and in arrangement

of the material at his disposal, Elliott-Binns' history breaks new ground.
