Tales of a Massage
Therapist: a Happy
Ending? TarcherPerigee
If I really press myself, I
can remember. The
warning signs were there.
No neon signs, mind you,
just little sparks at the
end of a very long string.

Funny that I could have
been blind enough not to
realize that the string was
a lighted fuse. When her
boyfriend of three
months, Tad Showers,
proposes, twenty-six-year-
old April thinks that
everything in her life is
finally falling into place.
Between her flaky, tree-
hugging mother and her
she-devil boss, marriage
seems like the place she'll
find love and security.

Tad's exactly the kind of
man April wants: smart,
ambitious and wildly
romantic. But soon after
they're married, the
honeymoon ends. Tad's
crazy, extravagant
gestures are starting to
look less romantic and
more...well, just plain
crazy. Is it normal for her
husband to never mention
his family, rack up secret
credit card debt and get
less sleep than your

average insomniac? Are you still supposed to stand by your man, even if it turns out he isn't who you thought he was? When she promised "for richer or poorer, in sickness and in health," this isn't what she pictured. But sometimes you don't get the life you imagined. And sometimes you have to figure out how to write your own happy ending.

Encyclopedia of Thai Massage VIZ Media LLC Nekoyama, worn out after another long day at the office, stops at a

therapeutic massage parlor--only to discover that it's run by a cat! Not only that, but the cat actually does the massaging?! As the professional "meowsseur" digs soft toe beans into Nekoyama's aching muscles, his heart warms and his worries melt away. This is only the beginning, as he and other world-weary workers are about to meet the other feline professionals who have mastered pawfully cute techniques to reduce human stress.

Throw away your crucifix, for it will not protect you, not in this chillingly original take on the vampire legend. Its a tale of bloody revenge that will expose the modern-day workings of the Vampire Clans and their constant war with those who would hunt them to extinction. Its a story that explains away the myths handed down through centuries of ignorance that keeps us from believing the horrifying truth about the real

vampires living among us today. It is the winter of 1362 in what was then a small Lithuanian farming village on the edge of the Carpathian Mountains. A man and a child lay dead, their throats savagely ripped open and their bodies drained of blood. The mans pregnant wife, on hearing the news, goes into premature labor, giving birth to an underdeveloped baby boy. The infant is not expected to live, and the mother remains weak and sickly. The attending midwives leave the two of

them alone to share what precious moments they have left together. The creature responsible for the attacks is an injured vampire being chased through the nearby forest by a band of determined Hunters. In his need for blood to repair both the injuries and replenish his strength, the vampire doubles back, losing the Hunters in the process. Reentering the village, hidden from sight by the raging storm and the dark of night, the vampire breaks into one of the small homes to feed upon

the defenseless mother as she clutches her newborn baby protectively to her breast. In the course of his savage feeding, the vampire unknowingly allows some of his own blood and that of the mother to spill into the infants mouth. The blood feeds and nurtures the dying infant, turning him into something very, very different. This horrific act will set in motion a series of events that will leave a trail of death and destruction across seven centuries and three continents, before it

finally reaches the new lands of America. One man, not quite human or of the undead, will stand between the two warring factions of Hunters and Vampires, a saviour to some and a deadly enemy to others, and this is his story. Like “Blade” meets “Bond,” directed by Tarantino.

Massage Therapy in Crisis
Pitchstone Publishing
(US&CA)

In a world of the future, people exist in a perpetual state of rehearsing evacuations, and one man's rehearsal

involves leaving his parents behind. A firespotter knows all too well that where there's smoke, there's fire - but fails to spot the blaze that consumes half her family. Then there's the Custer impersonator who takes his role in a re-enactment too literally, and too far. And the massage therapist struggling to help a veteran whose biggest regret is tattooed across his back. With award-winning reportage, memoir, fiction and photography, Granta has illuminated the most

complex issues of modern life through the refractory light of literature. Feel the sting of betrayal via new writing by Ben Marcus, Janine di Giovanni, Samantha Harvey, Colin Robinson, Jennifer Vanderbes, Callan Wink, John Burnside, Andre Aciman and more.
So Much for My Happy Ending Tales of a Massage Therapist: a Happy Ending? Happy Endings
NATIONAL BESTSELLER A smart, research-driven case for why optimism, kindness, and strong social networks will help

us live to 100. From the day her daughter was born, science journalist Marta Zaraska fretted about what she and her family were eating. She fasted, considered adopting the keto diet, and ran a half-marathon. She bought goji berries and chia seeds and ate organic food. But then her research brought her to read countless scientific papers and to interview dozens of experts in various fields of study, including molecular biochemistry, epidemiology and

neuroscience. What Marta discovered shattered her long-held beliefs about aging and longevity. A strong support network of family and friends, she learned, lowers mortality risk by about 45 percent, while exercise only lowers it by about 23 percent. Volunteering your free time lowers it by 22 percent or so, while certain health fads like turmeric haven't been shown to help at all. These revelations led Marta Zaraska to a simple conclusion: In addition to healthy nutrition and

physical activity, deepening friendships, practicing empathy and contemplating your purpose in life can improve your lifespan. Through eleven chapters that take her around the world, from catching wild mice in the woods of central England to flower arranging with octogenarians in Japan, from laboratories to "hugging centres," Marta embarks on an absorbing, entertaining and insightful journey to determine the habits that will have the greatest impact on our

longevity. Deeply researched and expertly reported, *Growing Young* will dramatically change the way you seek a longer, happier life.

Behind the Mormon Curtain Harmony

The classic guide to fully enjoying the pleasures of self-love, full of warmth, intelligence, and informative line drawings—from a renowned sex educator featured on Netflix’s the goop lab with Gwyneth Paltrow Confronting one of our last and most deeply rooted

taboos—masturbation—no ted sex expert and pro-sex feminist Betty Dodson, Ph.D., takes the shame out of self-love by creating a straightforward and appealing guidebook that reveals masturbation as a satisfying, vital form of sexual expression. Dr. Dodson demonstrates how anyone can learn to make love alone with feelings of guilt or loneliness, and explains why masturbation is sexually and spiritually fulfilling for both men and women. Not only is it the safest sex, but sharing

masturbation can also be a sensual treat for couples who want to learn more about each other’s sexual responses. *Sex for One* demonstrates that self-loving is not just for times in-between lovers or for social misfits.

Masturbation is the joyful and ongoing love affair that each of us has with ourselves throughout childhood, adulthood, and the golden years of old age.

While sex work has long
been controversial, it has
become even more
contested over the past
decade as laws, policies,
and enforcement
practices have become
more repressive in many

nations, partly as a result
of the ascendancy of
interest groups committed
to the total abolition of
the sex industry. At the
same time, however,
several other nations
have recently
decriminalized
prostitution. Legalizing
Prostitution maps out the
current terrain. Using
America as a backdrop,
Weitzer draws on
extensive field research in
the Netherlands, Belgium,
and Germany to illustrate
alternatives to American-
style criminalization of
sex workers. These cases

are then used to develop a roster of “best practices” that can serve as a model for other nations considering legalization. Legalizing Prostitution provides a theoretically grounded comparative analysis of political dynamics, policy outcomes, and red-light landscapes in nations where prostitution has been legalized and regulated by the government, presenting a rich and novel portrait of the multifaceted world of legal sex for sale.

Running with my pants

down is a perfect metaphor for the life of one Logan Hunter. Emotionally scarred by the faith forced on him by the traditions of his wildly dysfunctional Catholic-centric family, Logan sets out to blaze his own trail. After a young marriage that everyone knew was doomed to failure, he moves on at a breakneck pace to drink in all that life has to offer, literally and figuratively. His life becomes ruled by the three Bs: business, bed-hopping, and booze. Somewhere along the

way, he meets Misty, the sex kitten; Kat, the young, unpredictable one; Liz, the cougar with a voracious appetite for younger men; Champagne Washington, the sultry nightclub singer; Connie and Amanda, the gorgeous, sophisticated, and carnally experimental women who give him a night hell never forget; The Wild Things Delta Sue, Kitten, and Lola; and the always-intoxicating Spanish beauty, Carmen. Could there be more? In an ironic twist of fate,

Logans best friend, Eddie, starts down an unexpected, life-altering path that begins to mirror Logans. Neither could predict just how a couple of chance meetings would change the game for each of them.

The Power of Self-Healing
Routledge

"The true horror of 1984 is not what was done to

Winston Smith. The true horror was that the vast majority of the populace was happy, content, and believed that what their government was doing was right." That quote introduces what Britain's Numberwatch has called, "the most astonishing political saga since the rise of Adolph Hitler." *Dissecting Antismokers' Brains* examines the psychology and motivations that drive antismoking advocates while also analyzing their general abuse of language and science.

The combination offers readers a solid foundation for understanding modern efforts to ban, tax, and harass smokers into nonexistence. Published in 2004, Brains remains ahead of its time with a startling freshness in its ideas and theories. The propaganda methods exposed here in their early development have grown and are being used even more intensively in the ads, press releases, and guidebooks of antismoking advocacy groups today. The modern stonewalling techniques

examined in the author's follow-up volume, *TobakkoNacht - The Antismoking Endgame* are shown in their birthing forms in his early communications with advocates and the callous abuse of our love for children continues to be exploited as ads show evil wisps of smoke seeking out open windows to attack babies in their nurseries. McFadden's warnings of future campaigns to deny jobs and medical care to smokers, to extend smoking bans to

apartments and outdoor spaces, and to apply similar conditioning/nudging techniques to the control of alcohol and fast foods have proven far too true. For those seeking an in-depth but comfortably readable examination of the foundations of the antismoking movement, this book is essential. Its focus on the combination of psychology, propaganda analysis, and the misuse of science makes it a solid volume for college courses in the areas of social change,

scientific ethics, political manipulation, and the use and limits of governmental control over citizen behavior. At the same time, its meticulous deconstruction of the basic scientific and statistical arguments fueling government-imposed smoking bans makes it accessible to anyone who's ever wondered how smoking has moved to being regularly presented as both an antisocial and even "immoral" character trait. Dissecting Antismokers' Brains

remains an indispensable volume for anyone disturbed by, wishing to understand, or wanting to fight the growth of governmental control over personal life choices and behaviors.

Medical Conditions and Massage Therapy Seven Seas Entertainment

"I MAKE A LOT OF MONEY AS A CALL GIRL" wasn't the answer author Steve Cuno expected when he asked a new acquaintance how she planned to capitalize her start-up business. Wait, hold on, he thought. In Salt Lake City?

Home to The Church of Jesus Christ of Latter-day Saints, the Mormon Church, where all it takes to become the object of steamy gossip is for a neighbor to see you take a sip of coffee? In a religion where nonmarital sex is second in seriousness to murder? "You've no idea the people I could get in trouble," she told him. She'd entertained politicians, police officers, judges, defense lawyers, prosecutors, doctors—all of them married, almost all of them practicing

Mormons. Many were highly visible, highly regarded leaders in the faith. So began Cuno's behind-the-scenes investigation into Salt Lake City's prostitution industry. Over the course of three years, he interviewed prostitutes, johns, police officers, social workers, and massage-parlor owners—and uncovered a surprising underside to the Mormon Church's carefully cultivated image of wholesomeness and family values. He found that Salt Lake's

prostitutes—“sex workers” or “providers,” as they prefer to be known—don't live in the illusory experience they create for their clients. Many are multilingual and hold college degrees. They fix meals, drive kids to school, help with homework, handle household chores, socialize with others in the community, have love lives of their own—and, yes, go to church, sometimes with the very people who sneak out to meet them. With wit and sensitivity, Behind the

Mormon Curtain takes a deep dive into the quintessential American religion and the world's oldest profession, as Cuno tells the story of what he discovered, how he discovered it, and what it reveals not just about Mormons, but about us all.
