The Poulterers' Case (1611) Oriental Institute Press

In this rich study of Union governors and their role in the Civil War, Stephen D. Engle examines how these politicians were pivotal in securing victory. In a time of limited federal authority, governors were an essential part of the machine that maintained the Union while it mobilized and sustained the war effort. Charged with the difficult task of raising soldiers from their home states, these governors had to also rally political, economic, and popular support for the conflict, at times against a backdrop of significant local opposition. Engle argues that the relationship between these loyal-state leaders and Lincoln's administration was far more collaborative than previously thought. While providing detailed and engaging portraits of these men, their state-level actions, and their collective cooperation, Engle brings into new focus the era's complex political history and shows how the Civil War tested and transformed the relationship between state and federal governments.

Patrick J. Buchanan, bestselling author and senior advisor to Richard Nixon, tells the definitive story of Nixon's resurrection from the political graveyard and his rise to the presidency. After suffering stinging defeats in the 1960 presidential election against John F. Kennedy, and in the 1962 California gubernatorial election, Nixon's career was declared dead by Washington press and politicians alike. Yet on January 20, 1969, just six years after he had said his political life was over, Nixon would stand taking the oath of office as 37th President of the United States. How did Richard Nixon resurrect a ruined career and reunite a shattered and fractured Republican Party to capture the White House? In *The Greatest Comeback*, Patrick J. Buchanan--who, beginning in January 1966, served as one of two staff members to Nixon, and would become a senior advisor in the White House after 1968--gives a firsthand account of those crucial years in which Nixon reversed his political fortunes during a decade marked by civil rights protests, social revolution, The Vietnam War, the assassinations of JFK,

RFK, and Martin Luther King, urban riots, campus anarchy, and the rise of the New Left. Using over 1,000 of his own personal memos to Nixon, with Nixon's scribbled replies back, Buchanan gives readers an insider's view as Nixon gathers the warring factions of the Republican party--from the conservative base of Barry Goldwater to the liberal wing of Nelson Rockefeller and George Romney, to the New Right legions of an ascendant Ronald Reagan--into the victorious coalition that won him the White House. How Richard Nixon united the party behind him may offer insights into how the Republican Party today can bring together its warring factions. *The Greatest Comeback* is an intimate portrayal of the 37th President and a fascinating fly on-the-wall account of one of the most remarkable American political stories of the 20th century.

Containing the bulk of Morris Cohen's writings on the philosophy of law, this collection of essays features articles originally published in popular periodicals and law reviews during the early decades of this century. In his introduction to the Social and Moral Thought edition, Harry N. Rosenfield reviews Cohen's contributions to the philosophy of law and emphasizes Cohen's enormous influence, as a legal philosopher, on American law.

Lectures on Legal History and Miscellaneous Legal Essays Historical Painting Techniques, Materials, and Studio Practice

This dissertation examines the law and economics of generic drug entry, and the problems that arise from specific U.S. regulatory arrangements that govern innovation and competition in the market for patented pharmaceuticals. As Chapter 1 explains, competitive entry by generic drug makers is limited by both patents and industry-specific regulation, which together provide the means for brand-name drug makers to avoid competition and thereby recoup large investments in research, development, and testing. At the same time, the complex rules of the Hatch-Waxman Act furnish a pathway by which generic drug makers may challenge the validity or scope of brand-name patents, with a view to entering the market with a competing product prior to patent expiration. The subsequent chapters examine several aspects of the competitive interaction between brand-name and generic drug makers. Chapter 2 analyzes settlements of patent litigation between brand-name and generic drug makers, in which the brand-name firm pays the generic firm in exchange for delayed market entry. Such pay-for-delay settlements are an important, unresolved question in U.S. antitrust policy. The analysis reveals that the pay-for-delay settlement problem is more severe than has been commonly understood. Several specific features of the Act--in particular, a 180-day bounty

granted to certain generic drug makers as an incentive to pursue pre-expiration entry—widen the potential for anticompetitive harm from pay-for-delay settlements, compared to the usual understanding. In addition, I show that settlements are "innovation inefficient" as a means of providing profits and hence ex ante innovation incentives to brand-name drug makers. To the extent that Congress established a preferred tradeoff between innovation and competition when it passed the Act, settlements that implement a different, less competition-protective tradeoff are particularly problematic from an antitrust standpoint. Chapter 3 synthesizes available public information about pay-for-delay settlements in order to offer a new account of the extent and evolution of settlement practice. The analysis draws upon a novel dataset of 143 such settlements. The analysis uncovers an evolution in the means by which a brand-name firm can pay a generic firm to delay entry, including a variety of complex "side deals" by which a brand-name firm can compensate a generic firm in a disguised fashion. It also reveals several novel forms of regulatory avoidance. The analysis in the chapter suggests that, as a matter of institutional choice, an expert agency is in a relatively good position to conduct the aggregate analysis needed to identify an optimal antitrust rule. Chapter 4 examines the co-evolution of increased brand-name patenting and increased generic pre-expiration challenges. It draws upon a second novel dataset of drug approvals, applications, patents, and other drug characteristics. Its first contribution is to chart the growth of patent portfolios and pre-expiration challenges. Over time, patenting has increased, measured by the number of patents per drug and the length of the nominal patent term. During the same period, challenges have increased as well, and drugs are challenged sooner, relative to brand-name approval. The analysis shows that brand-name sales, a proxy for the profitability of the drug, have a positive effect on the likelihood of generic challenge, consistent with the view that patents that later prove to be valuable receive greater ex post scrutiny. The likelihood of challenge also varies by patent type and timing of expiration. Conditional on sales and other drug characteristics, drugs with weaker patents, particularly those that expire later than a drug's basic compound patent, face a significantly higher likelihood of challenge. Though the welfare implications of Hatch-Waxman patent challenge provisions are complicated, these results suggest these challenges serve a useful purpose, in promoting scrutiny of low quality and late-expiring patents.

Disease Control Priorities, Third Edition (Volume 8) Oxford University Press

This book is an anthology with a difference. It presents a distinctive variety of Anglo-Norman works, beginning in the twelfth century and ending in the nineteenth, covering a broad range of genres and writers, introduced in a lively and thought-provoking way. Facing-page translations, into accessible and engaging modern English, are provided throughout, bringing these texts to life for a contemporary audience. The collection offers a selection of fascinating passages, and whole texts, many of which are not anthologised or translated anywhere else. It explores little-known byways of Arthurian legend and stories of real-life crime and punishment; women's voices tell history, write letters, berate pagans; advice is offered on how to win friends and influence people, how to cure people's ailments and how to keep clear of the law; and stories from the Bible are retold with

commentary, together with guidance on prayer and confession. Each text is introduced and elucidated with notes and full references, and the material is divided into three main sections: Story (a variety of narrative forms), Miscellany (including letters, law and medicine, and other non-fiction), and Religious (saints' lives, sermons, Bible commentary, and prayers). Passages in one genre have been chosen so as to reflect themes or stories that appear in another, so that the book can be enjoyed as a collection or used as a resource to dip into for selected texts. This anthology is essential reading for students and scholars of Anglo-Norman and medieval literature and culture. Wide-ranging and fully referenced, it can be used as a springboard for further study or relished in its own right by readers interested to discover Anglo-Norman literature that was written to amuse, instruct, entertain, or admonish medieval audiences.

Roman Canon Law in the Church of England Routledge

The history of Jean de Labadie and the Labadists has received attention through the years. That attention, however, has more often than not fallen short in its tracing of Labadie's 'double migration'. Disaffected with the established church order of his day and motivated by a sense of prophetic mission to establish again the life of the primitive church, this spiritual nomad wandered from France to Switzerland, then to the United Provinces, Germany and Denmark, according to the vicissitudes of the times. As he went, he changed his affiliations from 'high' church over 'lower', from the bosom of Rome to Calvinism, then to congregational separatism. Thus there has been ample reason to treat Labadie's life and ministry episodically, be it a geographical or denominational episode, and a solid grounding could be had by piecing together several of these (all listed in bibliography part D): M. de Certeau on the Jesuit years; X. de Bonnault d'Houet on his stay at Amiens; A-L. Bertrand on the 'lost years' from Amiens to Montauban; J-H. Gerlach and W. Goeters on the schism at Middelburg; P. Scheltema on Amsterdam; L. Holscher and G.E. Guhrauer on Herford; J. Lieboldt and H. von Schubert on Altona; B.B. James and H.C. Murphy on the colony in Maryland; L. Knappert on that in Surinam; and any number of authorities on the Labadists in Friesland. Yet there are significant gaps.

Bringing together original contributions from scholars across the world, this volume traces the history of travel writing from antiquity to the Internet age. It examines travel texts of several national or linguistic traditions, introducing readers to the global contexts of the genre. From wilderness to the urban, from Nigeria to the polar regions, from mountains to rivers and the desert, this book explores some of the key places and physical features represented in travel writing. Chapters also consider the employment in travel writing of the diary, the letter, visual images, maps and poetry, as well as the relationship of travel writing to fiction, science, translation and tourism. Gender-based and ecocritical approaches are among those surveyed. Together, the thirty-seven chapters here underline the richness and complexity of this genre.

Every student of criminal law knows for a fact that the Poulterers' Case (1611) launched modern criminal conspiracy. This decision laid the first stone of the principle that an agreement to commit a crime is also a crime. However, besides what the law reports say, little is known about the facts of the case. This edition of the testimonies collected by the Star Chamber intends to fill this gap. Additionally, an introductory study will discuss how these facts shed new light on the reasons that were mustered in support of the decision. It will also argue that modern conspiracy was not a creation of the courts but rather of the nineteenth-century scholars who turned the Poulterers' Case into a landmark case. Todo estudiante angloamericano de derecho penal sabe que el Poulterers's Case (1611) dio el primer paso hacia el delito moderno de conspiración en Inglaterra. Esta decisión puso la primera piedra del principio según el cual con el acuerdo para cometer un delito se comete ya un delito. Sin embargo, aparte de lo que dicen los law reports, poco se sabe de los hechos del

caso. Esta edición de los testimonios recogidos por la Star Chamber pretende colmar esta laguna. Además, un estudio introductorio analizará cómo estos hechos arrojan luz sobre las razones que se esgrimieron en apoyo de la decisión. También se argumentará que la conspiración moderna no fue una creación de los tribunales, sino de los juristas del siglo XIX que convirtieron el Poulterers' Case en un hito jurisprudencial.

Immigration, racism and nationalism have become hotly debated issues in the Western world. This highly original and controversial work focuses on the language used by the vast majority who regard themselves as being open to a multi-cultural society. Using Belgium as a case study and drawing parallels with the UK, US, Europe and the former Yugoslavia, the authors analyse this language and reveal a remarkable consistency between these liberal voices, such as in news-reporting, and the language used by radical racist and nationalist groups.

This book examines the health/fitness interaction in an historical context. Beginning in primitive hunter-gatherer communities, where survival required adequate physical activity, it goes on to consider changes in health and physical activity at subsequent stages in the evolution of "civilization." It focuses on the health impacts of a growing understanding of medicine and physiology, and the emergence of a middle-class with the time and money to choose between active and passive leisure pursuits. The book reflects on urbanization and industrialization in relation to the need for public health measures, and the ever-diminishing physical demands of the work-place. It then evaluates the attitudes of prelates, politicians, philosophers and teachers at each stage of the process. Finally, the book explores professional and governmental initiatives to increase public involvement in active leisure through various school, worksite, recreational and sports programmes.
