In times of crisis, it is
crucial that information is
disseminated quickly and
accurately to the
appropriate channels. In
today's technological
world, there is a plethora
of misinformation that can
negatively sway
individuals and provide

them with false reports.
To ensure information is
distributed appropriately,
organizations must
implement a plan to
ensure their
communication is
effective. Further study on
the best practices and
challenges of managing
crisis and risk
communications is

required to ensure organizations are prepared. The Research Anthology on Managing Crisis and Risk Communications discusses strategies and tactics to effectively manage communication in times of crisis and considers the difficulties associated with maintaining a clear line of information. The book also provides an overview of the potential future directions for this field to improve communications moving forward. Covering key topics such as

misinformation, technology, leadership, and human health, this major reference work is ideal for managers, business owners, organization leaders, industry professionals, government officials, policymakers, researchers, academicians, scholars, practitioners, instructors, and students.

American Bar Association Secondary Education in Modern India (1800 – 2022) is a rare treatise of

educational research, based on authentic primary data collected directly from archives. It spans two centuries and two decades of development of Secondary Education in India – from its faint faltering beginnings to the nationwide obsession with it today. It covers the gradual evolution of secondary education in India, presenting in detail the changing policies and programs, reports of different National Education Commissions, and the structural

changes over a vast time frame. It is an invaluable reference book for students of education and those engaged in researching the development of education in India.

Geographic Distribution of Federal Funds in District of Columbia Walter de Gruyter GmbH & Co KG Moving beyond the U.S.-Eurocentric paradigm of communication theory, this handbook broadens the intellectual horizons of the discipline by highlighting underrepresented, especially non-Western,

theorists and theories, and identifies key issues and challenges for future scholarship. Showcasing diverse perspectives, the handbook facilitates active engagement in different cultural traditions and theoretical orientations that are global in scope but local in effect. It begins by exploring past efforts to diversify the field, continuing on to examine theoretical concepts, models, and principles rooted in local cumulative wisdom. It does not limit itself to the mass-

interpersonal communication divide, but rather seeks to frame theory as global and inclusive in scope. The book is intended for communication researchers and advanced students, with relevance to scholars with an interest in theory within information science, library science, social and cross-cultural psychology, multicultural education, social justice and social ethics, international relations, development studies, and political science.

Across the United States, newsrooms are grappling with systemic racism in their organizations and the media industry. Many have implemented diversity, equity, and inclusion (DEI) initiatives or made other attempts to confront past and present biases in pursuit of greater equity. Are such efforts merely performative, or are any transforming norms and power structures? What would it take to hold newsrooms truly

accountable? Andrea Wenzel provides a critical look at how local media organizations in the Philadelphia area are attempting to address structural racism. She focuses on two established, majority-white newsrooms, the Philadelphia Inquirer and the public radio station WHYY, and two start-ups where at least half the staff identify as Black, Indigenous, or people of color (BIPOC), Resolve Philly and Kensington Voice. Drawing on more than five years of field

research, Wenzel charts how these outlets have pursued a range of interventions—such as tracking the diversity of sources, examining reporting and editing practices, and working with community members to gain input—to varying degrees of success. Wenzel argues that institutional and systemic transformation will be possible only through the establishment of structures that facilitate holding those with more power responsible for listening to and

addressing the needs and concerns of those with less. Offering recommendations for building infrastructure that enables sustainable accountability, *Antiracist Journalism* is an important book for everyone interested in making local journalism more equitable.

The Congressional Record is the official record of the proceedings and debates of the United States

Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in *The Debates and Proceedings in the Congress of the United States (1789-1824)*, the *Register of Debates in Congress (1824-1837)*, and the *Congressional Globe (1833-1873)*. *Washington Information Directory 2022-2023* Springer Nature
FEMA has the statutory authority to deliver

numerous disaster and non-disaster financial assistance programs in support of its mission, and that of the Department of Homeland Security, largely through grants and cooperative agreements. These programs account for a significant amount of the federal funds for which FEMA is accountable. FEMA officials are responsible and accountable for the proper administration of these funds pursuant to federal laws and regulations, Office of

Management and Budget circulars, and federal appropriations law principles. Family Planning Communication in India Springer Nature This edited collection seeks to better understand how journalism across cultures differs, presenting an in-depth exploration of global practices that departs from the typical Western-centric approach. Journalists across the world are trained, generally speaking, within Western models of

reporting and are taught to do so as a practice where reporters need to aspire and aim for. Yet what such training is short of achieving is teaching reporters how to 'do' journalism within their own environments. In turn, what is required is a method of journalistic training and practice that is reflective of the actual practice reporters encounter on the ground. In order to do so, a better understanding of how journalism is practised in different parts of the world, the context

surrounding such practices, the issues and challenges associated, and the positive practices that Western journalism can offer, is necessary. Promoting and deploying a culturally-specific and politically-relevant journalism, this book provides just that.

The Washington

Information Directory

(WID) is a "directory,"

with a unique profile - it is

topically organized, and

within the taxonomic

structure the relevant organizations are listed not only with contact information but with a brief paragraph describing what the organization (whether government or non-governmental) does related to that topic. It focuses on Washington - in order to be listed, an organization must have an office in the Washington metropolitan area. These descriptions are not boilerplate advertising material from the organizations; rather, they are hand-crafted by a talented freelance

research team. In addition, WID pulls together 55 organization charts for federal agencies, congressional resources related to each chapter topic, hotline and contact information for various specific areas of interest, and an extensive list of active congressional caucuses and contact details. WID has two appendices, one with thorough information on congresspersons and committees, and the second with governors and embassies.
