Spin the Globe: The Incredible Adventures of Frederick von Wigglebottom is a fact-based and educational book series based on bedtime stories told to my daughter and son. Each night, they would ask Daddy to tell them a story. After exhausting every variation of animal, astronaut,

knights, and princess stories I could come up with, one evening I took notice of the globe that sat atop their dresser. I asked them to help me with a story topic and had them spin the globe. Tonight the globe stops on Peru, the Land of the Incas. Frederick grabs his trusty journal and prepares to explore Cusco, ancient Incan ruins and magnificent Andes Mountains. Join Frederick and his new friends, Ernesto and Umiña, as he learns about the history, people, sites, and animals of the Andes and the Incan Empire.

The Inca Empire existed for fewer than 100 years, yet ruled more subjects than

either the Aztecs or the Maya and occupied a territory stretching nearly 3000 miles. The Incas left no system of writing; what we know of them has been gleaned from the archaeological record and accounts written following the Spanish invasion. In this A-to-Z encyclopedia, Gary Urton and Adriana von Hagen, together with over thirty contributors, provide a broad introduction to the fascinating civilization of the Incas, including their settlements, culture, society, celebrations, and achievements. Following a broad introduction, 128 individual entries explore wide-ranging themes (religion, architecture, farming) and specific topics (ceremonial drinking cup, astronomy), interweaving ethnohistoric and archaeological research with nuanced interpretation. Each entry provides

suggestions for further reading. Sidebars profiling chroniclers and researchers of Inca life—ranging from José de Acosta and Cristóbal de Albornoz to Maria Rostworowski and R. Tom Zuidema—add depth and context for the cultural entries. Cross-references, alphabetical and topical lists of entries, and a thorough index help readers navigate the volume. A chronology, selected bibliography, regional map, and almost ninety illustrations round out the volume. In sum, the Encyclopedia of the Incas provides a unique, comprehensive resource for scholars, as well as the general public, to explore the civilization of the Incas—the largest empire of the pre-Columbian New World.

In size and sophistication, the most impressive empire in the Americas was the Incas. Established in Peru in the twelfth century, the Incan empire united millions of people and dozens of distinct cultures under a single governing system. The Incas lacked what many assume are essential to empire-building: writing, the wheel, a favorable climate. Still, the Incas overcame these challenges with incredible science, technology, engineering, and math or STEM innovations. These included terrace agriculture, elaborate road systems, earthquake-proof buildings, a planned economy without money, and an elaborate mathematics communicated with textiles. Incan accomplishments show that technological developments take many unexpected forms and will inspire your readers to think outside of the box. *Food, Cuisine, and Cultural Competency for Culinary, Hospitality, and Nutrition Professionals* Simon and Schuster

A funny and poignant memoir about how as a teenager, TV writer Rafael Agustin (Jane The Virgin) accidentally discovered he was undocumented and how that revelation turned everything he thought he knew about himself and his family upside down. Growing up, Rafa's parents didn't want him to feel different because, as his mom told him: "Dreams should not have borders." But when he tried to get his driver's license during his junior year of high school, his parents were forced to reveal his immigration status. Suddenly, the kid who modeled his entire high school career after American TV shows had no idea what to do -- there was no episode of *Saved by the Bell* where Zack gets deported! While his parents were relieved to no longer live a lie in front of their son, Rafa found himself completely unraveling in the face of his uncertain future. *Illegally Yours* is a heartwarming, comical look at

how this struggling Ecuadorian immigrant family bonded together to navigate Rafa's school life, his parents' work lives, and their shared secret life as undocumented Americans, determined to make the best of their always turbulent and sometimes dangerous American existence. From using the Ricky Martin/Jennifer Lopez "Latin Explosion" to his social advantage in the '90s to how his parents—doctors in their home country of Ecuador—were reduced to working menial jobs in the US, the family's secret became their struggle, and their struggle became their hustle. An alternately hilarious and touching exploration of belonging and identity, *Illegally Yours* revolves around one very simple question: What does it mean to be American?

Garcilaso de la Vega, the great chronicler of the Incas and the conquistadors, was born in Cuzco in 1539. At the age of twenty, he sailed to Spain to acquire an education, and he remained there until his death at Córdoba in 1616. As the natural son of a noble conquistador and an Indian woman of royal blood, he took immense pride in both his Spanish and Inca heritage, and, living as he did during a bewildering but stimulating epoch, he personally witnessed the last gasp of the dying Inca empire, the fratricidal conflicts that accompanied the Conquest, and the literary growth as well as the political decline of the Spain of Philip II and Philip III. Garcilaso left for posterity one of the earliest accounts of the ancient Incas, a reliable though admittedly biased chronicle of Spanish conquests in Andean America and a glowing story of Hernando de Soto's exploration of North America. Though he never lost pride in his Spanish heritage, continued rebuffs in caste-conscious Spain strengthened his pride in his Indian heritage and his sympathy for his mother's people. Thus his histories, while ennobling Spaniards, also ennobled the Incas, and eventually were to have some influence in the struggle of South Americans for political independence from Spain. In both blood and character El Inca Garcilaso was a true mestizo. He is generally considered to have been the first native-born American to attain the honor of publication. This was the life, and these were the times, that Varner has evoked so richly in his narrative. It rings and glitters with the sounds and colors of festivals, pageantry, and battle; it listens to the murmur of prayers, the defeated mutter of the Incas, the scratch of the scholar's quill; it pictures both highlights and shadows. For the reader already acquainted with Garcilaso's chronicles, this book will be a

welcome complement; for those who are meeting El Inca here for the first time, it will be a rewarding and satisfying introduction.

What's so special about Inca Empire? In this new, compelling book from author Leslie Nielsen, find out more about Inca Empire ...The Inca Empire, or Inka Empire, was the largest empire in pre-Columbian America. The administrative, political and military center of the empire was located in Cusco in modern-day Peru. The Inca civilization arose from the highlands of Peru sometime in the early 13th century. From 1438 to 1533, the Incas used a variety of methods, from conquest to peaceful assimilation, to incorporate a large portion of western South America, centered on the Andean mountain ranges, including, besides Peru, large parts of modern Ecuador, western and south central Bolivia, northwest Argentina, north

and central Chile, and southern Colombia into a state comparable to the historical empires of Eurasia. The official language of the empire was Quechua, although hundreds of local languages and dialects of Quechua were spoken. The Inca referred to their empire as Tawantinsuyu which can be translated as The Four Regions or The Four United Provinces. There were many local forms of worship, most of them concerning local sacred "Huacas", but the Inca leadership encouraged the worship of Inti??the sun god??and imposed its sovereignty above other cults such as that of Pachamama. The Incas considered their King, the Sapa Inca, to be the "child of the sun." So, what separates this book from the rest? This book explores the role of language academies in preserving and revitalizing minority or endangered languages. The author studies the controversial High Academy of the Quechua Language (HAQL) in Peru, the efficacy of which has been questioned by some experts. The book delves into the positions, attitudes, ideologies and practices of the HAQL and the role it has played in language policy and planning in the Andean region. The author uses ethnographic fieldwork to support what was previously only anecdotal evidence from individuals viewing the Academy from the outside. This book would appeal to anyone studying the sociolinguistics of the Quechua language, as well as to those studying broader issues of Indigenous language policy and planning,

maintenance and revitalization.

This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world. Epistemologies of the South outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism.
