SAWYER HOWELL

From Contact to Contract Oxford University Press, USA

Based on the author's doctoral dissertation, the book makes an emphatic plea for a strength-based educational strategy for disadvantaged primary grade children. In this context it focusses on some cognitive and socio-emotional strengths of these children and suggests ways in which these can be capitalized upon in the teaching-learning situation to make the learning process more effective for them. A highlight of the book is a stimulating foreword by the internationally acknowledged, eminent Indian psychologist, Prof. Durganand Sinha. Other highlights include an exhaustive review of researches both from India and abroad on six major variables—field dependence, creativity, visual modality preference, cooperation, dependency and delay of gratification which provides excellent resource material for researchers and students of Child Development and Educational Psychology. Also of interest are a set of informative case studies of two contrasting groups of high and low achieving children from the resettlement colonies of Delhi which offer revealing insights regarding priorities in child rearing and their relationship with school achievement.

The American Journal of Science Teachers College Press

Reissue of ILA bestseller. In this e-book, well-known literacy scholars share practical ways to engage and challenge today's students. Key topics covered include text complexity, vocabulary instruction, reading interventions, digital tools, critical literacy, and self-regulation. User-friendly chapters include enhanced content: classroom scenarios, transcripts, photo essays, links to videos, and screen shots of online strategies. "Insightful and thought-provoking, *What's New in Literacy Teaching?* is a must-have resource that belongs in the hands of administrators, curriculum coordinators, preservice teachers, experienced teachers, and literacy coaches who want to see how theory and research can be transformed into practical and innovative instruction to engage and challenge today's students." —Patricia A. Edwards, Michigan State University "Written by outstanding scholars, this is a must-read for all those engaged in literacy development." —Lesley Mandel Morrow, distinguished professor, Rutgers University Contributors include P. David Pearson, Camille L. Z. Blachowicz, Julie Coiro, Peter Afflerbach, Jane Hansen, Diane Lapp, Elfreida H. Heibert. NEW YORK TIMES BESTSELLER "It's undeniably thrilling to find words for our strangest feelings...Koenig casts light into lonely corners of human experience...An enchanting book. " —The Washington Post A truly original book in every sense of the word, *The Dictionary of Obscure Sorrows* poetically defines emotions that we all feel but don't have the words to express—until now. Have you ever wondered about the lives of each person you pass on the street, realizing that everyone is the main character in their own story, each living a life as vivid and complex as your own? That feeling has a name: "sonder." Or maybe you've watched a thunderstorm roll in and felt a primal hunger for disaster, hoping it would shake up your life. That's called "lachesism." Or you were looking through old photos and felt a pang of nostalgia for a time you've never actually experienced. That's "anemoia." If you've never heard of these terms before, that's because they didn't exist until John Koenig set out to fill the gaps in our language of emotion. *The Dictionary of Obscure Sorrows* "creates beautiful new words that we need but do not yet have," says John Green, bestselling author of *The Fault in Our Stars*. By turns poignant, relatable, and mind-bending, the definitions include whimsical etymologies drawn from languages around the world, interspersed with otherworldly collages and lyrical essays that explore forgotten corners of the human condition—from "astrophe," the longing to explore beyond the planet Earth, to "zenosyne," the sense that time keeps getting faster. *The Dictionary of Obscure Sorrows* is for anyone who enjoys a shift in perspective, pondering the ineffable feelings that make up our lives. With a gorgeous package and beautiful illustrations

throughout, this is the perfect gift for creatives, word nerds, and human beings everywhere.

[Report of the FAO Regional Workshop on the Elaboration of National Plans of Action to Prevent, Deter and Eliminate Illegal, Unreported and Unregulated Fishing--West African Subregion](#) A&C Black
Over the past century, educational psychologists and researchers have posited many theories to explain how individuals learn, i.e. how they acquire, organize and deploy knowledge and skills. The 20th century can be considered the century of psychology on learning and related fields of interest (such as motivation, cognition, metacognition etc.) and it is fascinating to see the various mainstreams of learning, remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology. Beyond folk psychology and its naïve theories of learning, psychological learning theories can be grouped into some basic categories, such as behaviorist learning theories, connectionist learning theories, cognitive learning theories, constructivist learning theories, and social learning theories. Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines, such as philosophy and epistemology, education, information science, biology, and – as a result of the emergence of computer technologies – especially also in the field of computer sciences and artificial intelligence. As a consequence, machine learning struck a chord in the 1980s and became an important field of the learning sciences in general. As the learning sciences became more specialized and complex, the various fields of interest were widely spread and separated from each other; as a consequence, even presently, there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely. *The Encyclopedia of the Sciences of Learning* provides an up-to-date, broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields, including relevant areas of instruction, pedagogy, cognitive sciences, and especially machine learning and knowledge engineering. This modern compendium will be an indispensable source of information for scientists, educators, engineers, and technical staff active in all fields of learning. More specifically, the *Encyclopedia* provides fast access to the most relevant theoretical terms provides up-to-date, broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies; supplies clear and precise explanations of the theoretical terms, cross-references to related entries and up-to-date references to important research and publications. The *Encyclopedia* also contains biographical entries of individuals who have substantially contributed to the sciences of learning; the entries are written by a distinguished panel of researchers in the various fields of the learning sciences.

[Slavoj Žižek: Live Theory](#) Guilford Publications

This inspiring, insightful new text provides a practical guide to helping clients live a meaningful and satisfying life despite the challenges they may be facing. Divided into three parts, it starts by drawing on empirical research to demonstrate the effectiveness of meaning-oriented practice and reviews a large body of literature on meaning in a wide-range of psychological and philosophical approaches, translating this into specific recommendations for practitioners. It continues by exploring the basic skill set required for working effectively in this area - from how to assess clients' needs and address issues of meaning, to specific existential, phenomenological and mindfulness skills. Finally, it provides a step guide to applying the skills to clinical practice with the support of examples and case studies from a range of professions. In what is still an emerging area of practice, this text stands alone as a comprehensive source of reference for both students and practitioners across the full range of people professions.

Program management is a rapidly emerging offshoot of project management. So much so that AT&T,

IBM, and other organizations, both large and small in all sectors, have initiated a push to certify program managers. And, although universities offer courses in program management, there are few books available to guide program managers through this field that requires a broad level of knowledge and experience. The definitive reference on program management, *Program Management: A Life Cycle Approach* provides this much needed guidance. Edited by Dr. Ginger Levin, the second person to become a PMI® certified program manager (PgMP®), this handbook presents a cohesive compilation of program management knowledge from more than 20 certified PgMPs. It considers the entire program life cycle and its phases—from initiation to sustainability. Each chapter is written by an experienced PgMP from a wide range of industries and countries. Combining the rigor of an academic reference with easy-to-read language, the book covers the themes in the PMI Standard for Program Management and ties them to program managers' work. The chapters reference PMI's standards, complement the concepts in the standards, and expand on the concepts and issues that the standard mentions in passing. The book also addresses a few issues that the standard does not touch on at all. The book can be read in its entirety, or specific chapters of interest can be read separately. Overall, the book provides practitioners with a reliable source of information on the key themes and issues in program management. It is useful for individuals desiring to attain the PgMP credential and suitable for colleges and universities offering courses in program management.

The Westminster Review Bucknell University Press

Slavoj Žižek is undoubtedly one of the world's leading cultural critics. His witty, psychoanalytically-inspired analyses of contemporary society have almost single-handedly revived the notion of ideology. His brilliant commentaries on the French psychoanalyst Jacques Lacan and the 19th century German Idealists have brought alive their often difficult ideas for a new generation of readers. But does Žižek have anything to say in his own right? Is there a system of thought that we can properly call "Žižekian"? This book argues that there is, through a reading of two terms in his work—the master-signifier and the act. Featuring an interview with Žižek himself, Slavoj Žižek: Live Theory presents a snapshot of the Žižek system ideal for undergraduates in social and cultural theory and philosophy.

A reference guide to the work of figures who have played an important role in the development of ideas about language. It includes 80 entries on individual thinkers in the Western tradition, ranging from antiquity to the present day, chosen because of their impact on the description or theory of language.

The Étude and Musical World Oxford University Press

"This accessible text--now revised and updated--has given thousands of future educators a solid grounding in developmental science to inform their work in schools. The expert authors review major theories of development and their impact on educational practice. Chapters examine how teaching and learning intersect with specific domains of child and adolescent development--language, intelligence and intellectual diversity, motivation, family and peer relationships, gender roles, and mental health. Pedagogical features include chapter summaries, definitions of key terms, and boxes addressing topics of special interest to educators. Instructors requesting a desk copy receive a supplemental test bank with objective test items and essay questions for each chapter. (First edition authors: Michael Pressley and Christine B. McCormick.) Key Words/Subject Areas: teachers, education, developmental psychology, child development, childhood development, adolescent development, schoolchildren, adolescents, students, educational psychology, developmental theories, teaching methods, learning, biological development, cognitive development, social development, emotional development, language development, intelligence, academic motivation, family relationships, peer relationships, mental health problems, gender roles, social-emotional learning, texts, textbooks Audience: Instructors and graduate students in education, child and family studies, and school psychology"--

The Parliamentary Debates CRC Press

This practical book addresses the consistent questions that were posed by secondary social studies teachers during professional learning sessions. In particular, it examines ways to break through the inclination and perception expressed by many teachers that "my kids cannot do that." Drawing on 22 years as a high school history teacher, 7 years as a state level curriculum specialist, and extensive work with in-service teachers across the country, the author provides research-based guidance for engaging students in investigating the past. Lesh examines ways to develop effective questions that guide historical inquires, how to utilize discussion in the classroom, and how to align assessment to inquiry. He also shows teachers how to incorporate difficult histories within an inquiry framework. Each chapter uses a specific lesson, framed by student work, to illuminate approaches in real classroom scenarios. Topics include The Pullman Strike of 1894, the Marcus Garvey question, Dust Bowl Migrants, Mao and Communist China, the LGBTQ+ fight for rights, and multiple lessons from World War I. This follow-up to the author's book "Why Won't You Just Tell Us the Answer?" fills in gaps and expands tools and classroom examples to assist today's teachers. Book Features: Offers ways to promote teacher growth as it pertains to historical thinking. Demonstrates how to align investigating the past with the needs of reluctant readers and students with special needs. Provides lesson materials and instructional guidance. Addresses how to teach difficult subjects, such as LGBTQ+ history. Aligns historical literacy with inquiry-based instruction.

In investigating the relationship between accusation and excuse, this study uncovers something about the criminal law's peculiar way of interpreting human action. Identifying that something can move us a little closer to discovery or agreement and just what it is that is staked in criminal law. What is staked in any discussion of criminal law is the meaning and operation of responsibility, which makes human action and its consequences so tragic. The author confronts the idea of responsibility by mapping the work of J. L. Austin onto the criminal law.

Robert Altman and the Elaboration of Hollywood Storytelling reveals an Altman barely glimpsed in previous critical accounts of the filmmaker. This re-examination of his seminal work during the "Hollywood Renaissance" or "New Hollywood" period of the early 1970s (including M*A*S*H, Brewster McCloud, McCabe & Mrs. Miller, Images, The Long Goodbye, Thieves Like Us, California Split, and Nashville) sheds new light on both the films and the filmmaker, reframing Altman as a complex, pragmatic innovator whose work exceeds, but is also grounded in, the norms of classical Hollywood storytelling rather than someone who rejected those norms in favor of modernist art cinema. Its findings and approach hold important implications for the study of cinematic authorship. Largely avoiding thematic exegesis, it employs an historical poetics approach, robust functionalist frameworks, archival research, and formal and statistical analysis to demystify the essential features of the standard account of Altman's filmmaking history and profile-lax narrative form, heavy reliance on the zoom, sound design replete with overlapping dialogue, improvisational infidelity to the screenplay, and a desire to subvert based in his time in the training grounds of industrial filmmaking and filmed television. The book provides a clear example of how a filmmaker might work collaboratively and pragmatically within and across media institutions to elaborate upon their sanctioned practices and aims. We misunderstand Altman's work, and the creative work of Hollywood filmmakers in general, when we insist on describing innovation as opposition to institutional norms and on describing those norms as simply assimilating innovation.

Child and Adolescent Development for Educators, Second Edition

Are you one of the 16 million Americans working as a sales professional? Are you a small business owner, consultant, doctor, lawyer, or other business professional who must sell your services and promote your credibility to succeed? If so, you need practical, easy-to-apply information on the art of effective selling and sales communication—whether selling to difficult customers or selling to interested, decisive buyers. In *From Contact to Contract*, you'll learn to master specific steps that help you: · Structure your sales conversation to keep it moving toward your sales goal · Use strategic persuasion techniques to turn information into real communication · Engage buyers with interactive sales presentations of your products and services · Negotiate to maintain profit margins · Gain commitments from customers and prospects · Communicate with difficult buyers · Manage your pipeline productively · Generate leads · Stay motivated during a competitive upsurge or economic downturn No time to read in your fast-paced sales job? Maybe you have a high quota and a pressing deadline? Then pick up the book and go straight to the help you need with a specific prospect. You'll find summary headlines of each key sales tip or communication tip. This easy-to-skim format and brief entries are written with you—a fast-paced sales professional or entrepreneur—in mind. Review the comprehensive collection of 432 tips and best practices without getting bogged down in long explanations of sales theory and models. Whether selling to big companies and senior executives or selling to the individual buyer, you can apply these practical sales techniques and advice immediately. In fact, watch how *From Contact to Contract* becomes the sales primer you use again and again. Author and sales communication expert Dianna Booher shares the same sales and marketing strategies in this book that she offers in person to her Fortune 500 clients. These strategies and selling techniques come directly from her corporate programs on proposal writing, business writing, technical writing, sales presentations, and interpersonal communication. 291 pages. Also available in Kindle and Paperback format!

Thesaurus of English Words and Phrases

A guide for translators, about the translation theory, the translation process, interpreting, subtitling, internationalization and localization and computer-assisted translation. A special section is dedicated to the translator's education and associations. The guide include, as annexes, several independent adaptations of the corresponding European Commission works, freely available via the EU Bookshop as PDF and via SetThings.com as EPUB, MOBI (Kindle) and PDF. For a "smart", sensible translation, you should forget not the knowledge acquired at school or university, but the corrective standards. Some people want a translation with the touch of the source version, while another people feel that in a successful version we should not be able to guess the original language. We have to realize that both people have right and wrong, and that their only fault is to present requirement as an absolute truth. Teachers agree at least on this principle: "If a sentence is ambiguous, the translation must also be". There is another critical, less easy to argue, based on an Italian phrase with particularly strong wording: "Traduttore, traditore". This critique argues that any translation will betray the author's language, spirit, style ... because of the choices on all sides. What to sacrifice, clarity or brevity, if the formula in the text is brief and effective, but impossible to translate into so few words with the exact meaning? One could understand this criticism that it encourages us to read "in the text." It seems obvious that it is impossible to follow this advice into practice.
