A central premise is that an objective and universally-accepted measure of "success" in development and paths to it does not exist.

**Advances in Tourism, Technology and Systems** Springer Nature

This book contains a selection of papers accepted for presentation and discussion at ROBOT 2022—Fifth Iberian Robotics Conference, held in Zaragoza, Spain, on November 23-25, 2022. ROBOT 2022 is part of a series of conferences that are a joint organization of SEIDROB—Sociedad Española para la Investigación y Desarrollo en Robótica/Spanish Society for Research and Development in Robotics, and SPR—Sociedade Portuguesa de Robótica/Portuguese Society for Robotic. ROBOT 2022 builds upon several previous successful events, including three biennial workshops and the four previous editions of the Iberian Robotics Conference, and is focused on presenting the research and development of new applications, on the field of Robotics, in the Iberian Peninsula, although open to research and delegates from other countries. ROBOT 2022 featured four plenary talks on state-of-the-art subjects on robotics and 15 special sessions, plus a main/general robotics track. In total, after a careful review process, 98 high-quality papers were selected for publication, with a total of 219 unique authors, from 22 countries.

Survey of Science and Technology Issues Present and Future Springer Nature

Mycorrhizal Fungi in South America Routledge

Traditional separation of powers theories assumed that governmental despotism will be prevented by dividing the branches of government which will check one another. Modern governments function with unexpected complicity among these branches. Sometimes one of the branches becomes overwhelming. Other governmental structures, however, tend to mitigate these tendencies to domination. Among other structures courts have achieved considerable autonomy "vis-a-vis" the traditional political branches of power. They tend to maintain considerable distance from political parties in the name of professionalism and expertise. The conditions and criteria of independence are not clear, and even less clear are the conditions of institutional integrity. Independence (including depolitization) of public institutions is of particular practical relevance in the post-Communist countries where political partisanship penetrated institutions under the single party system. Institutional integrity, particularly in the context of administration of justice, became a precondition for accession to the European Union. Given this practical challenge the present volume is centered around three key areas of institutional integrity, primarily within the administration of justice: First, in a broader theoretical-interdisciplinary context the criteria of institutional independence are discussed. The second major issue is the relation of neutralized institutions to branches of government with reference to accountability. Thirdly, comparative experience regarding judicial independence is discussed to determine techniques to enhance integrity.

*Regional Integration in Europe and Latin America* Latin American Local Capital Markets: Challenges and Solutions

The purpose of the Special Issue "Quantitative Methods in Economics and Finance" of the journal *Risks* was to provide a collection of papers that reflect the latest research and problems of pricing complex derivatives, simulation pricing, analysis of financial markets, and volatility of exchange rates in the international context. This book can be used as a reference for academicians and researchers who would like to discuss and introduce new developments in the field of quantitative methods in economics and finance and explore applications of quantitative methods in other business areas.

Multiple Criteria Decision Analysis: State of the Art Surveys Springer Nature

This series of books brings together results of an extensive research programme on aspects of the national systems of innovation in the five BRICS countries - Brazil, Russia, India, China, and South Africa. It provides a comprehensive and comparative examination of the challenges and opportunities faced by these dynamic and emerging economies. In discussing the impact of innovation with respect to economic, geopolitical, socio-cultural, institutional, and technological systems, it reveals the possibilities of new development paradigms for equitable and sustainable growth. This volume analyses the financing of science, technology and innovation in the BRICS economies. It highlights the importance of institutional coordination and the influence of implicit policies on the extent to which capital markets may contribute to innovation financing. It stresses the role of state development banks and similar organisations in promoting high-risk and long-run building of innovative capacities with respect to development strategy. Original and detailed data, together with expert analyses on wide-ranging issues, make this book an invaluable resource for researchers and scholars in economics, development studies and political science, in addition to policy-makers and development practitioners interested in the BRICS countries.

*Trading Promises for Results* Springer Science & Business Media

The annual publication is a record of the IMF's Annual Meeting and contains the opening and closing addresses of the Chairman of the Board of Governors, presentation of the Annual Report by the Managing Director, statements of Governors, committee reports, resolutions, and a list of delegates. Usually published in March.

Financing Innovation Ashgate Publishing

This book features a collection of high-quality research papers presented at the International Conference on Tourism, Technology & Systems (ICOTTS 2020), held at the University of Cartagena, in Cartagena de Indias, Colombia, from 29th to 31st October 2020. The book is divided into two volumes, and it covers the areas of technology in tourism and the tourist experience, generations and technology in tourism, digital marketing applied to tourism and travel, mobile technologies applied to sustainable tourism, information technologies in tourism, digital transformation of tourism business, e-tourism and tourism 2.0, big data and management for travel and tourism, geotagging and tourist mobility, smart destinations, robotics in tourism, and information systems and technologies.

*Angola Unravels* Taylor & Francis

Originally published in 2004. This comprehensive collection provides an innovative analysis and a comparison between economic and financial integration in Europe and Latin America, addressed from a global, regional and country-specific perspective. It constitutes a valuable overview focusing on three topics: regional integration and monetary cooperation in Europe and Latin America, exchange rate strategies and financial sector structure. The collection is the outcome of a Workshop and high-level Seminar organized by the Banco de España and the European Central Bank that brought together senior European and Latin American central bankers, as well as senior representatives from international institutions. The 31 contributors presented high quality papers, allowing the reader to take advantage of a rigorous economic analysis that uses first-hand information and draws useful lessons for the future.

Multiple Criteria Decision Analysis: State of the Art Surveys provides survey articles and references of the seminal or state-of-the-art research on MCDA. The material covered ranges from the foundations of MCDA, over various MCDA methodologies (outranking methods, multiattribute utility and value theories, non-classical approaches) to multiobjective mathematical programming, MCDA applications, and software. This vast amount of material is organized in 8 parts, with a total of 25 chapters. More than 2000 references are listed.

Major Companies of Europe 2003 CFA Institute Research Foundation

This directory is part of a six-volume set that provides data on over 36,000 European companies. Covering Portugal, Spain, Sweden and Switzerland, it provides information such as: address, phone and fax numbers, e-mail and Web addresses, listings of a company's activities, parents, subsidiaries and agents, brands and trademarks and financial information for 2001 and 2002.

**Caribbean Business ... Business Directory** Brookings Institution Press

Thirty years after the region embarked on large-scale liberalization, trade policy could have been expected to become all but irrelevant. Instead, a mismatch between expectations and what could realistically be delivered set the stage for much of the disappointment, skepticism, and fatigue regarding trade policy in the region, particularly in the early 2000s. By setting the bar unrealistically high, governments and analysts made trade policies an easy target for special interests that were hurt by liberalization and for those ideologically opposed to free trade. The most immediate victims were the more tangible growth and welfare gains, whose relevance was lost amid the noise of grandiose visions.

**Latin American Local Capital Markets: Challenges and Solutions** John Wiley & Sons

Role Of The Churches

*Brazil Company Handbook* Gale Cengage

Capital markets, both for debt and equity securities, have allowed firms to secure funding for productive uses while providing investors with opportunities for portfolio diversification. The importance of capital markets for the development of economies and for the betterment of society

cannot be overstated. This is just as true in emerging economies with free markets, such as those found in Latin America, as it is in developed markets. However, capital markets in the region are not being utilized to the fullest. The idea behind this collection of articles is to offer a primer on the development of local capital markets in several select countries in Latin America. We discuss not only their history and current status but also their future. To this end, seven authors contributed to this project, each writing about one of seven countries: Argentina, Brazil, Chile, Colombia, Mexico, Peru, and Uruguay. Each author decided which issues they believe matter most to the progress of their local capital markets. Some authors chose a qualitative and institutional description of local markets, whereas others adopted a more quantitative approach.

*Annual Report of the Government Development Bank for Puerto Rico to the Governor and the Legislative Assembly of Puerto Rico* International Monetary Fund

In order to feed the world, global agriculture will have to double food production by 2050. As a result, the use of soils with fertilizers and pesticides in agronomic ecosystems will increase, taking into account the sustainability of these systems and also the provision of food security. Thus, soil ecosystems, their health, and their quality are directly involved in sustainable agronomical practices, and it is important to recognize the important role of soil microbial communities such as mycorrhizal fungi, their biodiversity, interactions, and functioning. Soil ecosystems are under the threat of biodiversity loss due to an increase of cultivated areas and agronomic exploitation intensity. Also, changes in land use alter the structure and function of ecosystems where biodiversity is vital in the ecosystem. Soils are a major aid in food production in all terrestrial ecosystems; however, this means they are also involved in gas emission and global warming. Thus, in agronomic ecosystems, several mitigation practices have been proposed to promote the increase of carbon soil stock, and the reduction of warming gas emission from soils. In South America, most of the rural population depends economically on agriculture and usually works in family units. New, organic, safe, and sustainable agro-forestry practices must be applied to support local communities and countries to achieve hunger eradication, rural poverty reduction, and sustainable development. This book compiles new information for mycorrhizal occurrence in natural and anthropic environments in South America. It includes new reports of mycorrhizal fungi diversity along different mycorrhizal types and their effect on plant communities, plant invasions, the use of mycorrhizal fungi for ecological and sustainable studies, management programs of natural and agroecosystems, and forestry and food-secure production. This book fills the gaps in biodiversity knowledge, management and safe food production of mycorrhizas. It should be a valuable help to researchers, professors and students, to aid in use of mycorrhizal fungi while also focusing on their biodiversity, sustainable safe food production, and conservation perspectives.

The Hispanic American Historical Review BRILL

This report reflects long-term, in-depth discussion and debate by participants in the Latin American Roundtable on Corporate Governance.

**Who's who in Society** International Monetary Fund

This paper presents a coordinated portfolio investment survey guide provided to assist national compilers in the conduct of the Coordinated Portfolio Investment Survey, conducted under the auspices of the IMF with reference to the year-end 1997. The guide covers a variety of conceptual

issues that a country must address when conducting a survey. It also covers the practical issues associated with preparing for a national survey. These include setting a timetable, taking account of the legal and confidentiality issues raised, developing a mailing list, and maintaining quality control checks.

*The Wolf at the Door* Oxford University Press

This comprehensive collection comprising 28 contributors provides an innovative comparison between economic and financial integration in Europe and Latin America. It is a valuable overview focusing on three topics: regional integration and monetary co-operation in Europe and Latin

America, exchange rate strategies and financial sector structure.

*Souto de Moura* OECD Publishing

Enabling the Business of Agriculture 2019 presents indicators that measure the laws, regulations and bureaucratic processes that affect farmers in 101 countries. The study covers eight thematic areas: supplying seed, registering fertilizer, securing water, registering machinery, sustaining livestock, protecting plant health, trading food and accessing finance. The report highlights global best performers and countries that made the most significant regulatory improvements in support of farmers.
