A compilation of materials concerning John Vassall and his family, compiler unknown.

Summaries of Communications Wentworth Press

"From the summer of 1842 through the fall of 1843, Nathaniel and Sophia Hawthorne kept a common journal of their daily lives in a notebook currently housed in the Pierpont Morgan Library and catalogued as MA 580. Intended solely for their own eyes, the journal records the ordinary events and activities that occupied them as newlyweds."--P. 1

This book investigates the complexities of modern urban operations—a particularly difficult and costly method of fighting, and one that is on the rise. Contributors examine the lessons that emerge from a range of historical case studies, from nineteenth-century precedents to the Battle of Shanghai; Stalingrad, German town clearance, Mandalay, and Berlin during World War II; and from the Battle of Algiers to the Battle for Fallujah in 2004. Each case study illuminates the features that differentiate urban operations from fighting in open areas, and the factors that contribute to success and failure. The volume concludes with reflections on the key challenges of urban warfare in the twenty-first century and beyond.

The study of the Earth's origin, its composition, the processes that changed and shaped it over time and the fossils preserved in rocks, have occupied enquiring minds from ancient times. The contributions in this volume trace the history of ideas and the research of scholars in a wide range of geological disciplines that have paved the way to our present-day understanding and knowledge of the physical nature of our planet and the diversity of life that inhabited it. To mark the 50th anniversary of the founding of the International Commission on the History of Geology (INHIGEO), the book features contributions that give insights into its establishment and progress. In other sections authors reflect on the value of studying the history of the geosciences and provide accounts of early investigations in fields as diverse as tectonics, volcanology, geomorphology, vertebrate palaeontology and petroleum geology. Other papers discuss the establishment of geological surveys, the contribution of women to geology and biographical sketches of noted scholars in

various fields of geoscience.

The History of Coast Artillery in the British Army BoD – Books on Demand

This book contains the early history of Warren Township High School from its beginnings as Gurnee's two-year high school. The two-year high school evolved first into a three-year township high school and finally into a four-year township high school in 1917. The book also includes an early history of Warren's sports teams, experiences of its students, and descriptions of life at Warren. There are also stories about no-table students, teachers, coaches, and prominent citizens in the area. If you are wondering why I named the book *The Revised Early History of Warren Township High School*, I'll explain. Originally, I only intended to write a history of Warren's football teams. While researching football, I occasionally ran across articles about the school's early history. I saved what I found and filed it away. Then the Warren Township Historical Society asked me to write an account of Warren football for their newsletter. While writing about the football team I decided to add all the other information about Warren's history that I found earlier, calling it the "Early History of Warren Township High School." Six months after writing the article, I noticed a couple of mistakes that needed correction and decided to do a more in-depth study of the high school's history. I ended up with enough Warren history that I was able to write this book and correct my mistakes as well.

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The History of Jasper County, Missouri, Including a Condensed History of the State, a Complete History of Carthage and Joplin, Other Towns and Townships Oxford University Press

"Queer media is not one thing but an ensemble of at least four moving variables: history, gender and sexuality, geography, and medium. While many scholars would pinpoint the early 1990s as marking the emergence of a cinematic movement (dubbed by B. Ruby Rich, the "new queer cinema") in the United States, films and television programs that clearly spoke to LGBTQ themes and viewers existed at many different historical moments and in many different forms. Cross-dressing, same-sex attraction, comedic drag performance: at some points, for example in 1950s television, these were not undercurrents but very prominent aspects of mainstream cultural production. Addressing "history" not as dots on a progressive spectrum but as a uneven story of struggle, writers on queer cinema in this volume stress how that queer cinema did not appear miraculously at one moment but describes currents throughout the century-long history of the

medium. Likewise, while queer is an Anglophone term that has been widely circulated, it by no means names a unified or complete spectrum of sexuality and gender identity, just as the LGBTQ+ alphabet soup struggles to contain the distinctive histories, politics, and cultural productions of trans artists and genderqueer practices. Across the globe, media makers have interrogated identity and desire through the medium of cinema through rubrics that sometimes vigorously oppose the Western embrace of the pejorative term queer, instead foregrounding indigenous genders and sexualities, or those forged in the global South, or those seeking alternative epistemologies. Finally, while "cinema" is in our title, many scholars in this collection see that term as an encompassing one, referencing cinema and media in a convergent digital environment. The lively and dynamic conversations introduced here aspire to sustain further reflection as "queer cinema" shifts into new configurations"--

Field Museum of Natural History Xlibris Corporation

A concise history of Britain's coastal artillery defences from the death of Elizabeth I to the formal disbanding of the Coastal Artillery arm in 1956. The book, therefore, covers the rise and fall of the British Empire, and as such it is as much concerned with the protection of Britain's far-flung colonial outposts such as Gibraltar and Singapore, as it is with the guarding of the island itself. The author, himself a Royal Artillery man, insists that coast artillery is an offensive weapon, since: 'It was the coast defences that made it possible for the Navy to enact its offensive role by sustaining and securing that service in time of war'. With detailed descriptions and tables of personnel, artillery ordnance, and accounts of the actions fought by coastal artillery in the 17th-19th century wars with France and during the two World Wars, this is an interesting work of history as well as a useful addition to the library of the serious artillery specialist. Illustrated with 17 maps.

A History of the Professional Theatre of Detroit, Michigan, September 13, 1875 to July 3, 1886 Springer Nature

This collection of essays sets the attacks on the United States in historical perspective. It rejects the notion of an age-old 'clash of civilizations' and instead examines the histories of American nationalism, anti-Americanism, US foreign policy and Islamic fundamentalism amongst other topics.

This Day in History Government Printing Office

This historical resource details the researching, developing, and engineering of the United States Army weapons and munitions facility programs located in New Jersey that has prepared American troops for over a century to meet their challenges. This fascinating monograph, filled with photographs, explores the history of the Picatinny Arsenal, first built in 1880 to house gunpowder. This gunpowder was sent to American military troops in the Spanish-American War, the Philippine Insurrection, and other major conflicts. In the 1920s and 1930s, the Arsenal influenced the development of artillery, tank rounds and other major weaponry. Picatinny was the main provider of ammunition for the U.S. military during WWII. The Arsenal continued to develop major weapons such as the bazooka rocket, the C-4 explosive, and the "Atomic Annie" artillery shell. Currently, there are more than 5,000 scientists, engineers and other staff at Picatinny Arsenal using advanced technology to create weapons, ammunition, and to design related products and storage components.
