To celebrate Lamborghini's first 50 years, authors and professionals from different fields narrate its history, present, and future in a completely new way. Lamborghini, one of the most famous and iconic of all automobile brands, will turn 50 in 2013 (1963 - 2013). Over the course of this half century, it has gradually established itself as a leader in its sector, integrating perfectly into the culture of its time and becoming a symbol of innovation in

design and technology, as well as a phenomenon in culture and communication. This beautifully illustrated book describes every step of the journey, with references to cinema, technology, design and the work of the men who made their fortune from the brand. It is not the usual book about cars written for car enthusiasts, but a broader and more complex project with six carefully structured chapters (1. The history; 2. The technological innovation; 3. The design; 4. The people; 5. The image; 6. The future), accompanied by spectacular images of all the models produced up to now, revealing how Lamborghini made its way into the

collective imagination and became the legend it is today. It is a large-format volume with 200 beautiful colour images, brilliantly evoking a surprising combination of tradition and innovation for all those who are interested in design, technology, material culture, communication and, of course, the classic qualities of Italian manufacture at its best.

Supercars Field Guide Evro Publishing Limited

A glamorous addition to a popular series, this book celebrates four of Lamborghini's most sensational models: Miura, Countach, Diablo and Murcielago. The author takes us through the development of the Lamborghini V12 engine and on to the creation of the Miura, one of the most breathtaking

supercars of all time, before moving on to analyze its exotic descendants in the form of Countach, Diablo and Murcielago. Superbly illustrated throughout, this book also covers some less predictable topics, making it an essential purchase for every discerning Lamborghini enthusiast.

Cobra-Ferrari Wars 1963-1965 Bookboon
A comprehensive official monograph that

provides a complete history of one of the most renowned brands in the luxury automotive landscape. This lavishly produced volume features the complete collection of all the models produced by Lamborghini from 1963 to the present day, including special editions, unreleased models, and those that underwent significant evolutions. Stunning photography highlights the exquisite lines and lavish details of the vehicles, along with spectacular archival images and technical information celebrating the glamour and excellence of Italian automotive design. The book also includes information on the prominent designers, including Filippo Perini, Walter de Silva, Mitja Borkert, and Marcello Gandini, who created some of the company's most iconic models, such

as the Miura, Countach, Aventador, Huracán, and the new Urus as well as astonishing prototypes such as the Marzal, Egoista, and the Terzo Millennio. This official book is dedicated to the history of the legendary Italian luxury sports car company that was founded in Sant'Agata Bolognese in 1963 by Ferruccio Lamborghini. His dream was to create the perfect car and, more than half a century later, Lamborghini continues to produce sports cars that are sought after and renowned throughout the world for technical innovation, cutting-edge design, and stylish, original use of color.

For 40 years, Lamborghini has been one of the world's most flamboyant and exotic car marques. Written by a long-

term Lamborghini insider, the book tells, for the first time, the real story of the men who kept the Italian company alive, making cars bought by wealthy business executives, show business celebrities, and sports stars. Custodians of Lamborghini have included Chrysler and businessmen in Switzerland and Asia. Now Lamborghini sits alongside Bugatti at Audi, part of the Volkswagen Group. Previous Lamborghini books have been little more than collections of pictures of the cars and technical descriptions, but this one describes the character of the men whose passion for Lamborghini kept the company alive. The book is published in 2004 as the all-new Lamborghini Gallardo goes on sale, 41 years after the original 350GTV burst onto the scene at the Turin auto show.

Ferrari Fever is a fascinating and nostalgic look back at the classic car collecting scene in the 60's and 70's, an era when some of the rarest and most interesting Italian automobiles could still be found hidden or languishing in barns, junkyards or by the side of the road...almost lost in time. Paul Schouwenburg's story begins in wartime occupied Amsterdam, a poignant backdrop to the hardships of the years to follow, when the appearance of any exotic Italian thoroughbred was a rare sight indeed. Fuelled by a fascination for all things mechanical, adventures on a Rudge bicycle and early experiences in his parents' succession of Rovers, Paul gains a burning passion for finding,

restoring, and ultimately racing Italian cars. But these were not just any Italian cars -from the early 60s onwards, he begins to uncover several rare Alfas, from 1900CSS Zagato to Tipo 33/2, in addition to a host of very special Ferraris, including a 250GTO, 340 America Touring, 250 MM Vignale Berlinetta, 250GT SWB Competition/61 and 275GTB/C/LM, usually by word of mouth or tenuous rumour. Having acquired them, often many different models at a time, he would drive them home across Europe through snow storms, and restore them single-handedly in his spare time, full-time job as a world-leading head and neck cancer surgeon permitting! If that wasn't exciting enough, he would then race them, often winning, before moving on

to the next irresistible project. Filled with rich anecdotes and rare insights into the colourful characters of the day, including Jacques Swaters and Rob de la Rive Box, Paul's passion and incredible drive make for exciting reading. Indeed this is a unique take, a look in the rear view mirror at a bygone era when gems could be found incredibly cheaply and enthusiasts took seat-of-the-pants decisions regarding many aspects of a hobby which was uncharted, innocent and simply not as commercial as today he couldn't even give away his 250 GTO at the time!

Having left motor racing in the early 1950s - at least officially - Alfa Romeo returned to the sport once again at the start of the following decade due to the commitment and enthusiasm of Autodelta. This Alfa offshoot distinguished itself by preparing and racing about 30 of the manufacturer's different cars that really did make history. Among them, the Giulia TZ holds a place at the head of the crowd. It had a

1.5-litre, 113 hp engine from the Giulia SS, front and rear suspension of modern conception, disc brakes and an especially bold body shaped by Zagato on a modern tubular chassis. Those were the strong points of this car, which scored results of absolute prestige in its brief career at Sebring, in the Targa Florio, the 24 Hours of Le Mans and the Tour de France. Vito Witting da Prato, already the author of a meticulously written book on the Alfa Romeo SZ, covers the winning, human, technical and sporting factors of this unforgettable car in a monumental work. A book which, to the precise text and painstaking historical reconstruction, has been added illustrations of previously unpublished pictures and technical designs by Autodelta.

Introduction to Polymer Science and Technology Motorbooks

Porsche AG, today the most profitable car company in the world, was in 1975 a small but headstrong German automaker on the verge of its most significant development. New national laws were changing the way manufacturers designed their products, but the auto consumer was also craving more exciting and innovative design. That innovation came in 1975 with the release of the revolutionary Porsche 924.

This book begins its analysis with the creation of the Porsche 924 and the impact it made on the automotive world. During the 1980s, Porsche honed earlier 924 designs to create the 944 and its Turbo and convertible variants, and later the 968, completing a line that has produced some of the most respected sports cars of the modern era. The text also follows in detail the long production life and development of Porsche's V-8 powered high performance grand tourer, the 928—introduced in 1977, named the 1978 European Car of the Year and culminating in the 350 bhp 928 GTS of the 1990s. This history of the dynamic Porsche family gives a full account of each model and reveals the unique contributions each has made to a constantly evolving automotive world.

Electrical Contracting, Second Edition is a nine-chapter text guide for the greater efficiency in planning and completing installations for the design, installation and control of electrical contracts. This

book starts with a general overview of the efficient cabling and techniques that must be employed for safe wiring design, as well as the cost estimation of the complete electrical contract. The subsequent chapters are devoted to other electrical contracting requirements, including electronic motor control, lighting, and electricity tariffs. A chapter focuses on the IEE Wiring Regulations and Statutory Regulations to ensure compliance to the fundamental requirements for safety. The discussion then shifts to visual inspection and testing in accordance with the IEE Wiring Regulations. The last chapter describes the special role of the Joint Industrial Council for Electrical Installation Contracting in introducing a rational and equitable incomes policy into the

industry. This text includes many worked examples and illustrations to demonstrate how the technical and commercial aspects are put into practice.
