A concise, accessible, and engaging guide to the law of treason, written by the nation's foremost expert on the subject. The only crime defined in the United States Constitution, treason is routinely described by judges as more heinous than murder. Today the term is regularly thrown around by lawmakers and pundits on both sides of the aisle. But as these heated accusations flood the news cycle, it's not always clear what the crime of treason truly is, or when it should be prosecuted. Drawing on over two decades of research, constitutional law and legal history scholar Carlton Larson takes us on a grand tour of the Treason Clause of the United States Constitution. Despite the Clause's apparent simplicity, Larson demonstrates that it is a form of constitutional quicksand in which seemingly obvious intuitions are often far off the mark. From the floors of the medieval British Parliament that codified the Statute of Treasons upon which the American law was based to the treason of Benedict Arnold, our nation's founding traitor, to more recent events, including WWII's "Tokyo Rose" and the allegations against Edward Snowden and Donald Trump, Larson provides a riveting account of treason law in action. *On Treason* is an indispensable guide for anyone who wants to understand this fundamental aspect of our legal system. With this short, accessible look at the law's history and meaning, Larson clarifies who is actually guilty--and readers won't need a law degree to understand why.

The Law of Peoples Forgotten Books

Excerpt: THERE is no idea that seems so much misunderstood as this idea of "Money." On the one

hand we find many people engaged in a mad chase after "money for money's sake," and on the other hand, many others who are decrying money as the root of all evil, and severely criticizing the tendency of the age to seek money actively. Both of these classes of people are wrong--they are occupying the opposite sides of the road of reason, whereas truth is found here, as always, "in the middle of the road." The man who seeks money at a thing of value in itself--the man who worships money as a very god--such a man is a fool, for he is mistaking the symbol for the reality. And, likewise, the man who decries the pursuit and desire for money as a foul, evil thing--he who would make of money a devil--this man is likewise a fool. The wise man is he who sees money as a symbol of something else behind, and who is not deluded by mistaking the shadow for the substance, either for good or evil. The wise man makes neither a god nor a devil of money--he sees it as a symbol of almost everything that man may obtain from the outside world, and he respects it as such. He sees, while it is true that avarice and greed are detestable and hurtful qualities of mind, still the lack of the proper desire for, and striving after money, makes of man a creature devoid of all that makes life worth the living. When the sane man desires money, he really desires the many things that money will purchase. Money is the symbol of nearly everything that is necessary for man's wellbeing and happiness. With it he opens the door to all sorts of opportunities, and without it he can accomplish practically nothing. Money is the tool with which man may carve many beautiful things, and without the aid of which he is helpless. Money is but the concentrated essence of things desired, created and established by society in its present stage of development. There have been times in which there was no money--there may be times coming in which the race will have passed beyond the need of money as the symbol of exchange and possession--but, be this as it may, the fact remains that now, right here in the beginning of the Twentieth Century, there is nothing that is so necessary for man's well-being and content as this much-abused money. Remember this, first, last and all the tune, that when I say, "man needs money," I mean that he needs the many things that money will purchase for him. And for one to decry the desire for money is for him to decry the desire for nearly all the good and desirable things of life. As a recent writer has said: "Unless a man acquires money, then shall he not eat; nor be clothed; nor have shelter; nor books; nor music; nor anything else that makes life worth living for one who thinks and feels." I hold that in the present stage of evolution of man, money is to mankind what air, water, sunshine and mother-earth are to the plant--it is nourishment. And, as in the plant, the desire for nourishment is a natural and worthy instinct, so is the desire for this financial nourishment in man a perfectly natural and worthy instinct--it is the working of the same natural law. And, mark you this, that as the desire of the plant is a natural indication of the existence of the nourishment-need, so is this desire in the breast of man a certain indication of the possibility of its satisfaction and attainment, if natural laws are but followed. Nature is no mocker--it causes no desire to spring up in a living thing, unless it also endows that living thing with the faculties and powers to attain that which it craves. A realization of this great natural law will do many of my readers much good just now.

It's possible: we Americans can fix our broken federal government. Our Founders made sure of it.

For 50 years, political insiders have been trying to suppress all knowledge of how to reform our government. No longer! In this book, America's leading active scholar on the constitutional amendment process reveals how we can bypass Congress to win the reforms we need. Relying on three centuries of history, over two centuries of decided case law, and vast historical and legal research, Professor Natelson answers such questions as: * How does the Constitution let us bypass Congress to get the reforms we need? * What exactly is a "convention for proposing amendments"--and what it is not? * How is the convention organized and governed? * What are the legal rules governing the process? * Which writings about the amendment process are reliable--and which are just propaganda? The Law of Article V is an indispensable guide for all Americans who love their country.

"I am Ra. We came to your peoples to enunciate the Law of One. We wished to impress upon those who wished to learn of unity that in unity all paradoxes are resolved; all that is broken is healed; all that is forgotten is brought to light." For thousands of years those of Ra have sought to teach the Law of One to seekers of truth on Earth who wished to learn of the unity or oneness of all things. This basic law of all creation is buried deep within each of our hearts because we really are one in love and in light, the building blocks of the universe. We are all manifestations of the One Infinite Creator. We are the Creator. We are not learning this law for the first time but are remembering it yet again as all mystics have taught throughout Earth's history. Our journey of self-realization is the discovery or remembrance of this essential truth, our essential identity. A waking up, as some have called it, within an illusion of separation. Don Elkins and Carla L. Rueckert worked together for 12 years to perfect the channeling process and receive philosophical inspiration and guidance from extraterrestrial sources. When Jim McCarty joined them in 1980 they began to receive a new and unique type of channeling contact from those of Ra. Through this contact, Ra shared information to help seekers of truth deepen their awareness and acceptance of self and other, and to help Earth move into the emerging fourth density of love and understanding. This book is the transcript from the recording of that conversation between the Questioner and Ra. Through questions & answers, the metaphysical blueprint of spiritual evolution is explored, from the microcosm to the macrocosm, from the particulars of life on this planet to the life of the cosmos, to the possibilities of healing, transformation, and self-realization for spiritual seekers and wanderers. * * * * * The Ra Contact: Teaching the Law of One Volume 2 contains Ra contact sessions 57-106. The Secret opened the world to the power of positive thinking. Now, Law of Attraction will guide you through every step toward getting the life you've always desired -- and deserved. Have you noticed that sometimes what you need just falls into place? Perhaps you've met the perfect client or life partner merely by being at the right place at the right time. On the other hand, there are some people who find themselves in one terrible relationship after another or who seem unable to shake off their bad luck. These experiences are evidence of a very powerful force. It's called the Law of Attraction, and right now it's attracting people, jobs, situations, and relationships to you. The Law of

Attraction can be defined as: I attract to my life whatever I give my attention, energy, and focus to, whether positive or negative. Now, with this book, readers can learn how to use the Law of Attraction deliberately and integrate it into their daily life. By doing this, they will attract all they need to do, know, and have so they can get more of what they want and less of what they don't want. With its easy-to-follow 3-step formula (Identify Your Desire, Give Your Desire Attention, and Allowing), complete with tips, tools, exercises, and scripts, Law of Attraction shows readers how to: Attract their ideal mate and ideal relationships Increase wealth and abundance Improve their business with more customers, clients, and referrals Discover their ideal job, true calling, or career and more!

The American Law of Slavery, 1810-1860 University of Chicago Press

Intestate Succession is the second volume in the Comparative Succession Law series which examines the principles of succession law from a comparative and historical perspective. This volume discusses the rules which apply where a person dies either without leaving a valid will, or leaving a will which fails to dispose of all of the person's assets. Among the questions considered are the following: What is the nature of the rules for the disposal of the deceased's assets? Are they mechanical or is there an element of discretion? Are particular types of property dealt with in particular ways? Is there entitlement to individual assets (as opposed to money)? Do the rules operate in a parentelic system or a system of some other kind? Are spouses treated more favourably than children? What provision is made for extra-marital children, for adopted children, for step-children? Does cohabitation give rise to entitlement? How are same-sex couples treated? Broader questions also arise of a historical and comparative nature. Where, for example, do the rules in intestate succession come from in particular legal systems? Have they been influenced by the rules in other countries? How are the rules explained and how are they justified? To what extent have they changed over time? What are the long-term trends? And finally, are the rules satisfactory, and is there pressure for their reform? As in the first volume, this book will focus on Europe and on countries which have been influenced by the European experience such as Australia, New Zealand, South Africa, the United States of America, Quebec, and the countries of Latin America. Further chapters are devoted to Islamic Law and Nordic law. Opening with a discussion on Roman law and concluding with an assessment of the overall development of the law in the countries surveyed, this book will provide a wider reflection on the nature and purpose of the law of intestate succession.

Recent high-profile corporate scandals—such as those involving Enron in the United States, Yukos in Russia, and Livedoor in Japan—demonstrate challenges to legal regulation of business practices in capitalist economies. Setting forth a new analytic framework for understanding these problems, *Law and Capitalism* examines such contemporary corporate governance crises in six countries, to shed light on the interaction of legal systems and economic change. This provocative book debunks the simplistic view of law's instrumental function for financial market development and economic growth. Using comparative case studies that address the United States, China, Germany, Japan, Korea, and Russia, Curtis J. Milhaupt and Katharina Pistor argue that a disparate blend of legal and nonlegal mechanisms have supported economic growth around the world. Their groundbreaking findings show that law and markets evolve together in a "rolling relationship," and legal systems,

including those of the most successful economies, therefore differ significantly in their organizational characteristics. Innovative and insightful, Law and Capitalism will change the way lawyers, economists, policy makers, and business leaders think about legal regulation in an increasingly global market for capital and corporate governance.

In an examination of Southern slave law between 1810 and 1860, Mark Tushnet reveals a structured dichotomy between slave labor systems and bourgeois systems of production. Whereas the former rest on the total dominion of the master over the slave and necessitate a concern for the slave's humanity, the latter rest on the purchase by the capitalist of a worker's labor power only and are concerned primarily with economic interest. Focusing on a wide range of issues that include contract and accident law as well as criminal law and the law of manumission, he shows how Southern slave law had to respond to the competing pressures of humanity and interest. Beginning with a critical evaluation of slave law, the author develops the conceptual framework for his own perspective on the legal system, drawing on the works of Marx and Weber. He then examines four appellate court cases decided in three different states, from civil-law Louisiana to commonlaw North Carolina, at widely separated times, from 1818 to 1858. Professor Tushnet finds that the cases display a continuing but never wholly successful attempt at distinguish between law and sentiment as modes of regulating social interactions involving slaves. Also, the cases show that the primary method of accommodating law and sentiment was an attempt to use rigid categories to confine the law of slavery to what was thought its proper sphere. Mark Tushnet is Professor of Law at the University of Wisconsin. Originally published in 1981. The Color of Law: A Forgotten History of How Our Government Segregated America Ecco

Excerpt from *The Law of Struggle* We have promised ourselves that this War is to be the last. Still, how do we know? We did not seek it, yet it came. We are in the grip of momentous currents, we know not how. Evidently, we still do not know the laws by which we live. Tho we have stored up great accumulations of miscellaneous, unrelated, unassimilated facts concerning ourselves, these accumulations have only served to make confusion worse confounded. And yet, the great problems with which the world is wrestling so bloodily to-day are compounded of the measure and quality of our self-knowledge. We still do not know our place in the scheme of things; and the blows of the Germans resounding against the gates of Paris, beat also upon the faith in the hearts of men. If the Great War, which has descended upon us like a visitation from another world, is not really native to our true nature as human beings, why does it have such a hold upon us? Whence does it derive its power to stretch forth its gruesome hand and drag us, open-eyed, protesting, horror-stricken, into its dread vortex? Why are we finally fascinated by it and go exulting into the fray? To accuse the world of inconsistency and hypocrisy provides us with no explanation. Beneath every cover of duplicity is concealed some earnestness of purpose. What is it? What is the blundering purpose of the world?

Some years ago - in the year 1911, to be precise - I wrote a book in which I attempted to set forth this riddle and its answer. The Law Says What? GRIN Verlag

Lars Muhl has had a lifelong burning interest in Jesus, not only as an archetype, saviour, bodhisatava and elder brother, but also in relation to the Essenes from the Dead Sea. The Law of Light is the result of his many years spent studying Aramaic and the techniques of Yeshua (Jesus). Yeshua spoke Aramaic. Through the Aramaic language, his teachings offer not just another interpretation of the New Testament, but the unveiling of a secret message that attempts, once and for all, to settle centuries-old conceptions of sin, and to once again connect man with the heavenly spiritual source. The core of Yeshua's Aramaic message is intimacy, freedom, selfless awareness, unconditional love, compassion and forgiveness. In all he says, there exists a hidden invitation to us to be present in, and dedicated to, everything with which we engage. Five minutes of total devotion is worth more than hours of hectic exertion. The aim is to set mankind free and to dismiss everything that is bound up in false notions.

Here, in this 1850 classic, a powerful refutation of Karl Marx's Communist Manifesto, published two years earlier, Bastiat discusses: what is law? why socialism constitutes legal plunder the proper function of the law the law and morality "the vicious circle of socialism" the basis for stable government and more. French political libertarian and economist CLAUDE FREDERIC BASTIAT (1801-1850) was one of the most eloquent champions of the concept that property rights and individual freedoms flowed from natural law.

Widely heralded as a "masterful" (Washington Post) and "essential" (Slate) history of the modern American metropolis, Richard Rothstein's *The Color of Law* offers "the most forceful argument ever published on how federal, state, and local governments

gave rise to and reinforced neighborhood segregation” (William Julius Wilson). Exploding the myth of de facto segregation arising from private prejudice or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning; public housing that purposefully segregated previously mixed communities; subsidies for builders to create whites-only suburbs; tax exemptions for institutions that enforced segregation; and support for violent resistance to African Americans in white neighborhoods. A groundbreaking, “virtually indispensable” study that has already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), *The Color of Law* forces us to face the obligation to remedy our unconstitutional past.

No matter who you are or what you believe, you have the power to manifest what you want in life—a dream job, wealth, love, and health. In this concise and fascinating book, Tony Burroughs shows readers how to work with the Law of Agreement to change old beliefs about money, relationships, and health issues that are holding them back. He shares stories from his years of working with people from all over the world who are practicing living intentionally bringing into their lives that which serves the higher good and discarding the rest. The Law of Agreement says that as we lend our agreement to any belief, we reinforce it and make it stronger. Alternatively, as we refrain from lending our agreement to an idea that isn’t likely to give us the results we’re looking for, we dilute it and weaken its power over us and over everyone else simultaneously. Burroughs offers examples and stories that show how the Law of Agreement and its partner, the Law of Adversity, work simultaneously. What happens when we don’t get what we want? What is the opportunity in adversity? The Law of Agreement shows how adversity can lift us up and out of our routines and help us to reach deep inside ourselves for answers to life’s hardest questions. Full of real-life stories, examples, and solutions, *The Law of Agreement* is a practical and world changing book.

What happens if *Roe v. Wade* is overturned? When can you legally use self-defense? How the hell does the Electoral College work, and who came up with it anyway? We hear about the law everywhere, from our social media feeds to 24/7 news coverage, and even heated debates with friends and family. But do the people we're listening to really understand the law, or how it works? *The Law Says What?* offers a crash course on some of the most bizarre, infuriating, and vitally important legal topics of today. You'll explore the reasons behind laws that affect your everyday life using real-world cases that might make your head spin. Your mind will be blown and your sides may hurt from laughing as you learn more about criminal law, civil law, contract law, property law, tort law, international law, and courtroom procedure than even those cable newscasters know. You'll discover: Why the police don't actually have a legal duty to protect you. How marijuana is both legal and illegal at the same time. How you can be charged for murder without actually killing anyone. How someone can legally steal your land just by keeping it long enough. Why the government can

confiscate your possessions without ever charging you for a crime Harvard Law School graduate and practicing attorney Maclen Stanley has already had all the boring laws so you don't have to, condensing the real-world legal cases into fascinating stories with valuable information. You'll feel like you're having a conversation with a friend, rather than reading your mortgage disclosures. This book will help you make better decisions and have deeper conversations about the most important laws that affect you, your family, and your friends on a daily basis. And along the way, you'll see that, in practice, the law-much like the human beings that create and enforce it-is actually pretty weird.

This treatise articulates Tolstoy's famous dictum that it is morally superior to suffer violence than to do violence — a philosophy that has inspired Gandhi, Martin Luther King, Jr., and countless others.

The Functions of Law Weiser Books

This book offers a comparative introduction, by editors and native authors, to the most important aspects of administrative law in various EU Member States (Belgium, France, Germany, the Netherlands, the United Kingdom), at the level of the EU and in the United States of America. It aspires to contribute to the 'transboundary' understanding of different regimes related to actions and decisions of the administration. For the purpose of the use of this book in education, research and legal practice, the contributions to the book are all based on one and the same format, thus making it more accessible for its readers. The main items of the format are: 1 What is administrative law? Definitions, general administrative law versus specific areas of administrative law, general administrative law in the context of constitutional law (trias politica, federal-unitary state aspects), basic principles and the practice/evolution of administrative law etc. 2 Who is administering? An outline of the administration (organs, agencies, individual persons etc. in specific administrative law areas) in the framework of the territorial and functional organisation of the State. 3 Which instruments are available to the administration? An overview of the available public law instruments and the possibility to use private law instruments. 4 Which (formal) rules/principles (written or unwritten) govern administrative actions? An elaboration on decision-making procedures (public participation etc.) under general administrative law and specific areas of administrative law as well as more substantive rules/principles for administrative actions/decisions: 'due process in administrative matters'. 5 Access to (administrative) courts against administrative actions/decisions. Who can go to which courts (constitutional, administrative or ordinary) and are prior out-of-court proceedings necessary? How intensive or marginal is the test (of discretionary administrative powers) by the courts and what are the possible rulings of the court (based on a remedy- system for the plaintiff or on more general powers for the courts). 6 Recent and future developments and conclusions. The final chapter offers comparative remarks by the editors.
