The effective yet gentle 'Sukshma' technique, for working with the Marma points at the emotional as well as on the physical level, is fully described in this book. Marma Therapy - the art of treating specific vital points on the human body - is one of the greatest healing secrets of Ayurveda. It can be used to detoxify, strengthen and revitalize the body, for rejuvenation and relaxation or to release blocked energy. The authors explain the theoretical basis of Marma Therapy, and then provide a detailed, fully illustrated guide to its use. For each Marma point, the

authors provide information about its significance, the Ayurvedic element it relates to, the most appropriate oils to use, and what it can be used to treat. Clear step-by-step instructions and photographs illustrate the techniques, and advice is also included for self-treatment. The authors explain how to strengthen the Marmas through yoga and use mudras to support and complement Marma treatment. Finally, they describe how to treat common physical and emotional conditions, from headache and back pain, to exam nerves and insomnia.

Bioactive Natural products in Drug Discovery Singing Dragon

This book highlights different natural products that are derived from the plants and microbes that have shown potential as the lead compounds against infectious diseases and cancer. Natural products represent an untapped source of strikingly diverse chemotypes with novel mechanisms of action and the potential to

serve as anticancer and anti-infective agents. The book discusses a range of biotechnologically valuable bioactive compounds and secondary metabolites that have been derived from plant and microorganisms from various ecological niches. It also reviews the latest developments in the field of genomics, bioinformatics and industrial fermentation for harnessing the microbial products for commercial applications. In turn, the book's closing section reviews important biotechnological applications of various natural products. Combining the expertise of specialists in this field, the book's goal is to promote the further investigation of natural sources for the development of standardized, safe and effective therapies.

Monograph on Dengue/dengue Haemorrhagic Fever Pan American Health Org

Integrates the science of self-care with other nursing and multidisciplinary perspectives This is the first text for the Professional Nursing Practice course in RN to BSN curriculum to present a conceptual framework for contemporary nursing practice based on the science of self-care that also incorporates other nursing and multidisciplinary perspectives. Built upon the premise that nursing is both a caring and a knowledge-based

profession, this cutting-edge text illustrates how to attain and integrate knowledge from nursing theory and theories of related disciplines to achieve optimal evidence-based nursing practice. Using case studies to demonstrate the relationship between nursing theory and practice, the text underscores the importance of having a deep understanding and conceptual model of the unique role of nursing in society and its practice domain. The text instills a foundational understanding of the science of self-care and its contribution to contemporary nursing. It describes how this paradigm is gaining recognition as an effective anti-burnout strategy and demonstrates how it can be applied. Case examples from a variety of clinical situations integrated with nursing theory demonstrate the variables needed to achieve optimal nursing practice. The book illustrates what data to collect, how to analyze that data, how to design and implement intervention strategies, and how to determine their effectiveness. Key concept boxes, measurable objectives with critical thinking questions, and learning activities reinforce content. Additionally, more complex cases included at the end of the text and frequent links to nursing literature provide fodder for more in-depth analysis. Key Features: Provides an integrative model for nursing practice based on self-care that is useful in all clinical settings Illustrates how to attain and integrate knowledge from the science of self-care with other nursing theories Demonstrates the relationship between theory and practice through case studies Introduces students to the importance of recording and analyzing data to achieve evidence-based practice Includes measurable objectives with review questions at the end of chapters and many other pedagogical features
