 Over the last two decades, the study of discourse in film and television has become one of the most promising research avenues in stylistics and pragmatics due to the dazzling variety of source material and the huge pragmatic range within it. Meanwhile, with the advent of streaming and the box set, film and television themselves are becoming separated by an increasingly blurred line. This volume closes a long-standing gap in stylistics research, bringing together a book-level pragmastylistic showcase. It presents current developments from the field from two complementary perspectives, looking stylistically at the discourse in film and the discourse of and around film. This latter phrase comes to mean the approaches which try to account for the pragmatic effects induced by cinematography. This might be the camera work or the lighting, or the mise en scène or montage. The volume takes a multimodal approach, looking at word, movement and gesture, in keeping with modern stylistics. The volume shows how pragmatic themes

and methods are adapted and applied to films, including speech acts, (im)politeness, implicature and context. In this way, it provides systematic insights into how meanings are displayed, enhanced, suppressed and negotiated in both film and televisual arts.

(FAQ). TV Finales FAQ is the first book devoted exclusively to television's most memorable series finales. From Mary Richards' heartfelt goodbye to the WJM-TV newsroom in the classic finale of *The Mary Tyler Moore Show* to the puzzling conclusion of the enigmatic adventure series, *Lost*, to the tumultuous final hours in the life of *Breaking Bad*'s Walter White, TV Finales FAQ takes an up close, insightful, and entertaining look at the most memorable final episodes of television's most popular prime time, daytime, and late night series. Crafting the final episode to a long-running television series can be challenging for producers and writers who want to remain faithful to the show's characters and history, yet, at the same time, satisfy the high expectations of its loyal fan base. TV Finales FAQ offers television viewers the inside story on the creation, broadcast, and aftermath of the most famous (and infamous) final episodes of over 50 television series from

the 1960s through the present day. The books features such shows as *Dexter*, *Roseanne*, *Will & Grace*, *X-Files*, *The Sopranos*, and some classic talk and late-night programs such as *The Oprah Winfrey Show* and *The Tonight Show Starring Johnny Carson*, and many others.

How can you solve a murder when the clues are so dumb? Private investigator Trike Augustine may be a brainiac with deductive skills to rival Sherlock Holmes, but they're not doing him any good at solving the case of a missing gazillionaire because the clues are so stupefyingly—well, stupid. Meanwhile, his sidekicks—Max the former FBI agent and Lola the artist—don't quite rise to the level of Dr. Watson, either. For example, when a large, dead pig turns up on Trike's floor in the middle of the night, none of them can figure out what it means. Meanwhile, the clock is ticking as the astronomical reward being offered diminishes drastically every day. That, plus the increasing reality that their own lives are in danger, lift this astonishing debut beyond its hilarious premise—a smart man befuddled by the idiotic—and turns it into something more than just a smart homage to Sherlock (with maybe a touch of early Jonathan Lethem thrown in). It becomes a compelling and compulsive thriller . . . with the added bonus that the prose is often as breathtaking as the tale.

Where is the line between digital utopia and digital police state? *Surveillance State* tells the gripping, startling, and detailed story of how China's Communist Party is building a new kind of political control: shaping the will of the people through the sophisticated—and often brutal—harnessing of data. It is a story born in Silicon Valley and America's "War on Terror," and now playing out in alarming ways on China's remote Central Asian frontier. As a minority separatist movement strains against Party control, China's leaders have built a dystopian police state that keeps millions under the constant gaze of security forces armed with AI. But across the country in the city of Hangzhou, the government is weaving a digital utopia, where technology helps optimize everything from traffic patterns to food safety to emergency response. Award-winning journalists Josh Chin and Liza Lin take readers on a journey through the new world China is building within its borders, and beyond. Telling harrowing stories of the people and families affected by the Party's ambitions,

Surveillance State reveals a future that is already underway—a new society engineered around the power of digital surveillance.

For most of his life, Josh Wilker has been on the sidelines. Spending his days in a cubicle in the far reaches of Chicago, and his nights in front of Red Sox games, he has been content to let others take center stage. From childhood onward, he sought comfort from anxiety and depression in the archival pages of sports almanacs and stat sheets: a place where forgotten players lingered, and time seemed to stop--a welcome relief from worldly problems. He found joy in the trivia of long-lost athletes, like the former NFL player Walter "Sneeze" Achiu. But when his first child was born in 2011, Wilker found his anxieties put to the test: how do you remain on the sidelines when a tender, fragile baby needs everything from you? How do you go from third-string forward on the winless 1988 Johnson State College Badgers to a strong, responsible father? Bit by bit, Wilker learns to overcome his demons, protect his son, and eventually take a few wobbly steps with him. In homage to his favorite pastimes, Wilker has written *Benchwarmer* as just that: an A-to-Z reference on failing at sports. In entries from Asterisk to Barry Bonds to "the Yips" to Zero, Wilker mingles his own story among those of famous collapses, errors, and also-rans. A candid, bighearted, funny presence, Wilker writes about sports the way Michael Chabon writes about comics, or Rob Sheffield writes about music: as if the universe was contained in every blocked shot or dropped fly ball. In Wilker's hands, it is.
