WARREN PATEL

Berghahn Books

This text presents the tundra plovers, comprising of the grey plover and the Eurasian, Pacific, and American golden plovers. Breeding on tundra or northern heaths and moorland, they migrate far south to coastal mudflats, saltings and agricultural landscapes. The text examines the taxonomy, appearance, behaviour, ecology and conservation of golden and grey plovers, and compares and contrasts their natural history and biogeography. It also gives accounts on all aspects of their lifestyle including feeding, mating, parental care, moults, migration and avoidance of predators.

Cumulated Index Medicus The History Press

Plants have cultural histories, as their applications change over time and with place. Some plant species have affected human cultures in profound ways, such as the stimulants tea and coffee from the Old World, or coca and quinine from South America. Even though medicinal plants have always attracted considerable attention, there is surprisingly little research on the interface of ethnobotany and medical anthropology. This volume, which brings together (ethno-)botanists, medical anthropologists and a clinician, makes an important contribution towards filling this gap. It emphasises that plant knowledge arises situationally as an intrinsic part of social relationships, that herbs need to be enticed if not seduced by

the healers who work with them, that herbal remedies are cultural artefacts, and that bioprospecting and medicinal plant discovery can be viewed as the epitome of a long history of borrowing, stealing and exchanging plants.

The English Historical Review University of Chicago Press

The story of how books in all their variety, from mathematics textbooks to murder mysteries, reach the hands of readers is a significant one. This is especially so in Ireland, where Irish publishing houses battle to flourish and survive through economic crises and in a market dominated by British publishers. The paradox of publishing, writes Tony Farnar, is that though it is a business, and a risky business everywhere, it is much more than that. Publishers' 'gatekeeping, encouragement and investing' help to shape what has been called a country's

'mentalities'. Thus the importance of a flourishing local publishing industry, especially those that share a language with an 'over-mighty neighbour'. The product of many years of research, this book focuses on the years from 1890 and includes a detailed chronicle of the key dates and events in the development of Irish book publishing. The final chapter, by Conor Kostick, covers the period from 2008 to 2018. What emerges is a vivid portrait of how the Irish book publishing industry contributed and continues to contribute in immeasurable ways to the intellectual and cultural life of Ireland.

[The Journal of the American Chamber of Commerce in Japan](#) Routledge

A comprehensive overview of the inherent properties, chemical and biochemical functions, actions for lowering the risks of cardiovascular and infectious diseases and cancers, and underlying mechanisms of tea polyphenols. It reveals the bioantimutagenic potency of epigallocatechin gallate (EGCg) found in green tea.

A standard track gauge—the distance between the two rails—enables connecting railway lines to exchange traffic. But despite the benefits of standardization, early North American railways used six different gauges extensively, and even today breaks of gauge at national borders and within such countries as India and Australia are expensive burdens on commerce. In *Tracks across Continents, Paths through History*, Douglas J. Puffert offers a global history of railway track gauge, examining early choices and the dynamic process of diversity and standardization that resulted. Drawing on the economic theory of path dependence, and grounded in economic, technical, and institutional realities, this innovative volume traces how early historical events, and even idiosyncratic personalities, have affected choices of gauge ever since, despite changing technology and understandings of what gauge is optimal. Puffert also uses this history to develop new insights in the theory of path dependence. *Tracks across Continents, Paths through History* will be essential reading for anyone interested in how history and economics inform each other.

Shortlisted for OCM Bocas Prize for Caribbean Literature Finalist for the Kobo Emerging Writer Award How does memory become myth? How do lies become family lore? How do we escape the trauma of the past when the truth has been forgotten?

Barbados, 1962. Lost soul Iapetus roams the island, scared and alone, driven mad after witnessing his father's death at the hands of his mother and his older brother, Cronus. Just before Iapetus is lost forever, he has a son, but the baby is not enough to save him from himself—or his family's secrets. Seventeen years later, Iapetus's son, the stoic Atlas, lives in a loveless house, under the care of his uncle, Cronus, and in the shadow of his charismatic cousin Z. Knowing little about the tragic circumstances of his father's life, Atlas must choose between his desire to flee the island and his loyalty to the uncle who raised him. Time passes. Atlas's daughter, Calypso, is a beautiful and wilful teenager who is desperate to avoid being trapped in a life of drudgery at her uncle Z's hotel. When she falls dangerously in love with a visiting real estate developer, she finds herself entangled in her uncle's shady dealings, a pawn in the games of the powerful men around her. It is now 2019. Calypso's son, Nautilus, is on a path of self-destruction as he grapples with his fatherless condition, his mixed-race identity and his complicated feelings of attraction towards his best friend, Daniel. Then one night, after making an impulsive decision, Nautilus finds himself exiled to Canada. *The Island of Forgetting* is an intimate saga spanning four generations of one family who run a beachfront hotel. Loosely inspired by Greek mythology, this is a novel about the echo of deep—and sometimes tragic—love and the ways a family's past can haunt its future.

The Spectator Bloomsbury Publishing

A two-volume set which traces the history of food and nutrition from the beginning of human life on earth through the present.

First published in 1970, this book includes all of the annual editions and also a final pamphlet of *Samhain: October 1901 – November 1908*, a literary magazine edited by W. B. Yeats. *Samhain* was one of the several magazines that the Irish Literary Theatre (later to become The Abbey Theatre) produced and it was born when the original magazine, *Beltaine*, came to an end in 1900. Yeats's editorial role was essential to the publication which served to publicize the work of the Theatre, promote current works of Irish playwrights and challenging those of their English opponents. The magazine mainly consists of a series of essays on the theatre in Dublin, and supplementing these are explanations and discussions of new plays, excerpts from which are often included. This book will be of interest to those with an interest in Yeats, early nineteenth-century literature, and Irish

theatre.

The Athenaeum

A lively and beautifully illustrated history of one of the world's favorite beverages and its uses through the ages. World-renowned sinologist Victor H. Mair teams up with journalist Erling Hoh to tell the story of this remarkable beverage and its uses, from ancient times to the present, from East to West. For the first time in a popular history of tea, the Chinese, Japanese, Tibetan, and Mongolian annals have been thoroughly consulted and carefully sifted. The resulting narrative takes the reader from the jungles of Southeast Asia to the splendor of the Tang and Song Dynasties, from the tea ceremony politics of medieval Japan to the fabled tea and horse trade of Central Asia and the arrival of the first European vessels in Far Eastern waters. Through the centuries, tea has inspired artists, enhanced religious experience, played a pivotal role in the emergence of world trade, and triggered cataclysmic events that altered the course of humankind. How did green tea become the national beverage of Morocco? And who was the beautiful Emma Hart, immortalized by George Romney in his painting *The Tea-maker of Edgware Road*? No other drink has touched the daily lives of so many people in so many different ways. *The True History of Tea* brings these disparate aspects together in an entertaining tale that combines solid scholarship with an eye for the quirky, offbeat paths that tea has strayed upon during its long voyage. It celebrates the common heritage of a beverage we have all come to love, and plays a crucial part in the work of dismantling that obsolete dictum: East is East, and West is West, and never the twain shall meet.

Publisher and Bookseller

The intriguing adventures of orchid hunters and the early attempts at orchid identification and classification are described in the pages of Merle A. Reinikka's *A History of the Orchid*. Part I of this book offers a glimpse of the important dates, names, and incidents relevant to the historical role of orchids from ancient times to the recent past. Part II offers biographical sketches of more than 50

significant figures in orchid history and their contributions to the field. First published in 1972, *A History of the Orchid* is back with additions to the excellent bibliography and updated nomenclature supplied with the expert help of Robert L. Dressler and Gustavo A. Romero. The first book to bring to public attention the lives of orchid hunters and the myths and mysteries of their beloved plants is now available to a new generation of orchid lovers. Both

amateurs and longtime orchid enthusiasts will be thrilled with the return of this book.
