Need to know and accept information about child development and early education . The first eight years of childhood are very important, especially the first three years. This time, the foundation of future health growth and development. At this time children learn faster than at any other time. Babies and young children grow up early and learn early if they receive love, care, encouragement and emotional stimulation along with nutritious food and wellness arrangements. Encouragement and education at the beginning of life play the biggest role in its full development. Talking, reading, singing, solving puzzles and playing games with others have a clear effect on the child. By the age of two, children listen attentively, respond to words, imitate words, say the first meaningful words, imitate the actions of adults, build friendships, solve problems, and start playing. At three to five years of age, children enjoy learning new things, learn languages quickly, acquire the ability to concentrate more on a subject, and want to do things on their own. Number tracing learning with us . So to help your child develop intelligence, we have brought a number tracing book, which will help your child develop at least a little bit. If you start teaching number tracing to your child at the age of 3 to 5, then the child can master that learning very easily. "Md Rubel Press Publishing " "Number Tracing book for preschoolers 3-5 and kindergarten " arranged the course in such a way that a child will learn through recreational activities. Our teaching method will work on your child's creativity as well as teaching number tracing. As well as boosting their self-confidence, it will also help them develop skills and correct pronunciation in numbers writing practice.
