Maurice Lesca, the sour hero of *A Man Who Knows*, is fifty-seven - older than Bove's other protagonists, not much wiser, no less painfully comical in his failures and confusions. Though he is well educated, financial and amorous miscalculations have leveled him. A failed doctor, he lives in poverty with his widowed sister, whom he sees only at mealtime. Kept afloat by odd handouts from family and connections, Lesca also milks his remaining acquaintances. When he starts visiting a divorcee who runs a dim little bookshop and encourages her to extort more money from her ex-husband, he begins to sow the seeds of dissatisfaction and distrust that will infect his world. But Lesca is a survivor, he will always survive in the modern city. *A Man Who Knows* was written in 1942 but not published in France until 1985. It is the last of Bove's major novels and the most mature example of his characteristic method.

Is there really a God, and if so, what is God actually like? Is there an afterlife, and if so, is there such a thing as eternal punishment for unrepentant sinners, as many orthodox Christians and Muslims believe? And is it really true that our unconscious minds are connected to a higher spiritual reality, and if so, could this higher spiritual reality be the very same thing that religionists call "God"? In his latest book, Raymond M. Smullyan invites the reader to explore some beautiful and some horrible ideas related to religious and mystical thought. In Part One, Smullyan uses the writings on religion by fellow polymath Martin Gardner as the starting point for some inspired ideas about religion and belief. Part Two focuses on the doctrine of Hell and its justification, with Smullyan presenting powerful arguments on both sides of the controversy. "If God asked you to vote on the retention or abolition of Hell," he asks, "how would you vote?" Smullyan has posed this question to many believers and received some surprising answers. In the last part of his treasurable triptych, Smullyan takes up the "beautiful and inspiring" ideas of Richard Bucke and Edward Carpenter on Cosmic Consciousness. Readers will delight in Smullyan's observations on religion and in his clear-eyed presentation of many new and startling ideas about this most wonderful product of human consciousness.

When Second World War Spitfire pilot John Gillespie Magee penned his poem 'High Flight', little did he know that his words would inspire legions of aspiring aviators who had a similar wish to fly their 'eager craft through footless halls of air'. Founded on years of detailed research, Roger Cole's book High Flight tells John Magee's extraordinary story, describing hitherto-unknown details of his short life, and providing insight into the inspiration for the poems that have found a unique place in history. Born of an English mother and American father in Nanking in China, Magee grew up and was educated in different parts of the world, proving to be a highly accomplished student. Through his experiences, he developed principles that made him determined to defend the rights of those he loved and respected. Exhilarated by flight and finding unique language in poetry, John was able to use words to express the emotions and sentiments of all who fly in a manner that is acknowledged and applauded throughout the world. The outbreak of war in Europe violated his beliefs, and, determined to fight for freedom, John left America and joined the Royal Canadian Air Force, qualifying as a pilot and traveling to England to fight Nazism. Tragically, John would lose his life, aged 19 years, in an accident, so never know how his words would serve posterity. Roger Cole's High Flight traces the path of John Magee's achievement, revealing an incredible story of human endeavor, vision, determination and self-sacrifice.

Who Knows Where Butterflies Die is a timeless story of the human spirit's desire for freedom "We're made to believe that learning the alphabet or chemistry or mathematics and this and that is more important than learning how to act like humans. Yet, believe it or not, it's humanity that would save the world. Humanity is what prevents revolution and war. Humanity is what prevents tyranny, famine, mass killing, and torturing one another. It's sad to know that external forces are leading people to lose the respect and understanding they used to have towards each other. "With the never-ending invention of newer technologies, I feel that the world has fallen into a race to turn people to robots. Everyone seems to be in a competition to show off the latest gadgets in their hands, but they hide the quality of their hearts in their chests. With all the new developments that are pushing us into a deeper isolation, I don't know where we're headed. I just know that that's what's leading us to a gradual, global self-destruction in many ways." -Excerpt from *Who Knows Where Butterflies Die* Praise for *Who Knows Where Butterflies Die* "An important and powerful story that brings awareness to the pain and devastation innocent families experience when mired in a homeland full of oppression, war, and revolution." -Brock Tully, inspirational speaker and author of 9 books, including *The Great Gift* "Who Knows Where Butterflies Die ... It's a must read. It inspires us to take responsibility for the world we are creating by our action and inaction." -Ted Kuntz, educational speaker and author of 4 books, including *Peace Begins with Me*
