As the COVID-19 era continues to expose inequities, inefficiencies, and areas of need across our education system, leaders and educators have a unique opportunity to press pause and reimagine school. Now is the time to take the lessons of 2020 and turn them into action: by closely examining the "old ways," letting go of practices that don't serve students, and creating new routines and environments that meet the needs of every learner. Education professionals need to investigate critical questions: Which established routines and practices have always worked in school? Did those practices really work for all students? What hasn't worked so well? What would it look like to rethink school in a way that eliminates practices that keep some students struggling while others thrive? Explore the answers to these questions-
and more—in this forthcoming release, a visionary guide to the reimagined school from inclusion experts Jenna Rufo, Ed.D., and Julie Causton, Ph.D"—

Using Inclusion as a Framework to Build Equity and Support All Students Pearson Higher Ed

Challenging behavior is one of the most significant issues educators face. Though it may seem radical to use words like love, compassion, and heart when we talk about behavior and discipline, the compassionate and heartfelt words, actions, and strategies teachers employ in the classroom directly shape who students are—and who they will become. But how can teaching from the heart translate into effective supports and practices for students who exhibit challenging behavior? In From Behaving to Belonging, Julie Causton and Kate MacLeod detail how teachers can shift from a "behavior management" mindset (that punishes students for "bad" behavior or rewards students for "good" or "compliant" behavior) to an approach that supports all students—even the most challenging ones—with kindness, creativity, acceptance, and love. Causton and MacLeod's approach * Focuses on students' strengths, gifts, and talents. * Ignites students' creativity and sense of self-worth. * Ensures that students' social, emotional, and academic needs are met. * Prompts teachers to rethink challenging behavior and how they support their students. * Helps teachers identify barriers to student success in the cultural, social, and environmental landscape. * Inspires teachers to reconnect with their core values and beliefs about students and teaching. We need to transform our classrooms into places of love. To that end, this book represents a paradigm shift from a punitive mindset to a strengths-based, loving approach and encourages the radical act of creating more inclusive and caring schools.

Quick-guides to Inclusion

Over the last decade, the educational context for students with disabilities has significantly changed primarily as a result of mandates contained in NCLB and IDEA. The purpose of this book is to summarize the research literature regarding how students might be provided classrooms and schools that are both inclusive and effective. Inclusive schools are defined as places where students with disabilities are valued and active participants in academic and social activities and are given supports that help them succeed. Effectiveness is addressed within the current movement toward multi-tiered systems of support and evidence-based practices that meet the demands of high-stakes accountability.
