There is no doubt that the proliferation of entrepreneurial activity is a current trend. Start-ups enable an effective transformation of knowledge, generating high added value to society. The objective of this book is to address the financing of the entrepreneurial process as a necessary element to articulate a solid business fabric, based on taking advantage of new opportunities. The book is structured in two parts. The first part takes as a reference the lack of financing in the entrepreneurship process and analyses different sources of financing available to entrepreneurs depending on the phase in which the project is located. The second part of the book analyses innovation and its links to the financing of start-ups, addressing the impact of emerging technologies and fintech services and the support of artificial intelligence. Finally, the book concludes with an examination of decentralized finance (DeFi), as an idea that is changing the financial world, giving rise to new financial paradigms.

In 1995, the GAO identified hundreds of Fed. programs (FP) that supported economic development (ED) either directly or broadly. In addition, it noted that there was a lack of agreement on the definition of "ED" and that mission fragmentation and program overlap existed among FP that support ED. This report: (1) identifies FP that more directly fund ED activities, including the level of financial support that they provide; and (2) compares selected aspects of these FP, such as program applicants, to identify areas of potential overlap. The report also provides a broad discussion of the potential role of the Government Performance and Results Act of 1993 in addressing overlap among FP.

The SSBCI provides funding to states, territories, and eligible municipalities to expand existing or to create new state small business investment programs, including state capital access programs, collateral support programs, loan participation programs, loan guarantee programs, and venture capital programs. This book examines the SSBCI and its implementation, including Treasury's response to initial program audits conducted by the U.S. Government Accountability Office and Treasury's Office of Inspector General. These audits suggested that SSBCI participants were generally complying with the statute's requirements, but that some compliance problems existed, in that, the Treasury's oversight of the program could be improved; and performance measures were needed to assess the program's efficacy.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what

communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of the communities or support them, as well as the root causes and structural barriers that need to be overcome.

"Although there are business programs at nearly 40 tribal colleges and universities, and courses focused on American Indian business practices at additional institutions, no reader or textbook exists for use in these courses. The editors of and co-authors of this proposed volume seek to help business school graduates work more effectively both with and within American Indian communities. Taken together, the essays will help create greater awareness of tribal economies and organizations and their

relationship with the dominant culture, facilitate cross-cultural dialogue and understanding, and build public policies that enhance economic self-sufficiency and cultural integrity. Chapters include the following: history of American Indian business; economic sustainability, self-determination, and sovereignty; organization and management; marketing; leadership; human resource management; tribal finance; business strategy; American Indian business law; tribal gaming operations; economic development; entrepreneurship; technology and data management; business ethics; service management; taxation; accounting; and healthcare management."--Provided by publisher.
