Quickly acquire the knowledge and skills you need to confidently administer, score, and interpret the WIAT-III and KTEA-II Essentials of WIAT-III and KTEA-II Assessment is the only resource providing practical, step-by-step instruction in the accurate and effective use of the Wechsler Individual Achievement Test, Third Edition (WIAT-III) and the Kaufman Test of Educational Achievement, Second Edition (KTEA-II), two popular measures of individual achievement frequently administered for educational planning, transitional programming for students with disabilities, and vocational guidance. Like all the volumes in the Essentials of Psychological Assessment series, this book is designed to help busy mental health practitioners, and those in training, quickly acquire the basic knowledge and skills they need to make optimal use of a major psychological assessment instrument. Each concise chapter features numerous callout boxes highlighting key concepts, bulleted points, and extensive illustrative material, as well as test questions that help you gauge and reinforce your grasp of the information covered. Offering up-to-date and rich information beyond what is available in the tests' manuals, Essentials of WIAT-III and KTEA-II Assessment includes case studies illustrating how to make optimal use of the tests. In addition, the book is packaged with an accompanying CD-ROM containing a program allowing users to enter KTEA-II data to obtain growth scores; useful files to assist users in the proper administration and scoring of the WIAT-III Written Expression subtests; and a cross-battery approach for both tests. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

In this virtual catalog of Rolex wristwatches, collectors and buyers will find 3,621 wristwatches in

over 14 different model lines: Oyster, Bubbleback, including Chronograph, Submariner, Explorer, and more. Each watch is shown in full color, with the most important technical details as well as reference numbers, and year of manufacture provided. This variety of information is of inestimable worth for the wristwatch collector and buyer. In one place, for example, they can see the typical Oyster from the 1940s and nearly all the case and dial variations that were available. The same applies to all the lines made by Rolex. In short, for everyone who collects Rolex or only wants to acquire a beautiful vintage wristwatch with the "crown," this book an absolute must. An illustrated history of the Rolex waterproof wristwatch is included.

Here is a unique book. It describes the theories and processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which has never been done so completely before in the many books on the same subject. As a text book it is a revelation. Taking nothing for granted, except the ability to read and comprehend a simple description of mechanical processes, de Carle takes his reader through every stage and every operation of watch repairing ...and to deal with them thoroughly is quite a programme - it takes 300 pages containing 24 chapters, two appendices and 553 illustrations. The fine draughtsmanship and accurate technical detail of the illustrations set a new standard. Practical Watch Repairing can justifiably claim to be the best illustrated book on practical horology yet issued, and one of the best of its kind on any subject. The publication of the book marks the beginning of a new epoch in the study of the mechanics of horology.

"I've paged through stacks of books on the history of watches. . . . But I hadn't come across a book that actually moved me until I picked up A Man and His Watch. The volume is filled with heartfelt stories." —T: The New York Times Style Magazine Paul Newman wore his Rolex Daytona every single day for 35 years until his death in 2008. The iconic timepiece, probably the single most sought-after watch in the world, is now in the possession of his daughter Clea, who wears it every day in his memory. Franklin Roosevelt wore an elegant gold Tiffany watch, gifted to him by a friend on his birthday, to the famous Yalta Conference where he shook the hands of Joseph Stalin and Winston Churchill. JFK's Omega worn to his presidential inauguration. Ralph Lauren's watch purchased from Andy Warhol's personal collection, Sir Edmund Hillary's Rolex worn during the first-ever summit of Mt. Everest . . . these and many more compose the stories of the world's most coveted watches captured in A Man and His Watch. Matthew Hranek, a watch collector and NYC men's style fixture, has traveled the world conducting firsthand interviews and diving into exclusive collections to gather the never-before-told stories of 76 watches, completed with stunning original photography of every single piece. Through these intimate accounts and Hranek's storytelling, the watches become more than just timepieces and status symbols; they represent historical moments, pioneering achievements, heirlooms, family mementos, gifts of affection, and lifelong friendships.

The purpose of this book is to illustrate the magnificence of the fableless semiconductor ecosystem, and to give credit where credit is due. We trace the history of the semiconductor industry from both a technical and business perspective. We argue that the development of the fableless business model was a key enabler of the growth in semiconductors since the mid-1980s. Because business models, as much as the technology, are what keep us thrilled with new gadgets year after year, we focus on the evolution of the electronics business. We also invited key players in the industry to contribute chapters. These "In Their Own Words" chapters allow the heavyweights of the industry to tell their corporate history for themselves, focusing on the industry developments (both in technology and business models) that made them successful, and how they in turn drive the further evolution of the semiconductor industry.

Bulova: A History of Firsts chronicles the extraordinary American watch company in a fittingly unusual manner: by recounting an epic, multi-generational picaresque that runs from the Gilded Age up through present-day New York City. Joseph Bulova, the man behind the movement by which America would set its time, was an iconoclastic industrialist who introduced standardized mass production to fine mechanical watchmaking, fostering in turn a corporate culture of innovation that endures today. Less a traditional corporate history than an exactly curated periodical, this profound new title features eight visually captivating chapters comprising an essay each by luminaries including style journalists David Coggins and Matthew Hranek, music-industry legend Nile Rodgers, advertising writer Stuart Elliott, noted horology authority Jack Forster and more, all edited by luxury historian Aaron Sigmond.

Metropolis Stackpole Books

The first and most comprehensive step-by-step guide on the subject, Watchmaking has become a classic in its own right. This new edition is updated to include a new section which discusses and illustrates a variety of the author's own watches. The author's principal aim in writing this book has been to inspire and encourage the art of watchmaking, especially among a new generation of enthusiasts. The making of the precision timekeeper is described, step by step, and is illustrated at each stage with line drawings and brief explanatory captions. Great care has been taken to ensure the text is easy to follow and to avoid complicated technical descriptions.

We reprint the original edition of 1954. Chapters on Hairspring Practices, Jeweling, Repairing Pins, Dial Repairs, Repairing Hollow Center Pinions and much more. Later reprint has slightly different title page but same content. Mr. Fried wrote 14 books, many pamphlets and hundreds of articles on horology, the science of timepieces. He taught and lectured on horology, was an industry consultant and illustrated his own books. He was a consultant for Random House Dictionary and the Merriam Webster Dictionary. He was president of the New York City Horological Society and the New York State Watchmakers Association. He was also vice president of the old Horological Institute of America and was the first American to receive the Silver Medal of the British Horological Institute. For decades, he was the watchmaker whom others consulted on the really challenging cases, a fact he attributed in part to his "tweezer skills." While he received just about every honor imaginable in his field, the one he got last fall meant more than most: A clock tower at the new world headquarters of the American Watchmakers-Clockmakers Institute near Cincinnati was dedicated in his honor.

Fabless

2022 Hardcover Reprint of 1961 Second Edition. Full facsimile of the original edition. Not reproduced with Optical Recognition software. As The New York Times wrote after his death, Henry B. Fried was "widely acknowledged as the dean of American watchmakers." In the revised, 1961 edition of his classic book The Watch Repairer's Manual, reprinted here, Fried addresses topics important to contemporary watch repairers, such as self-winding watches, waterproofing, calendar watches, alarm wristwatches, and chronographs. The Watch Repairer's Manual also includes a fine visual dictionary of exploded views in isometric, which are very helpful for ordering watch parts. One of the few modern books available on the techniques of watch repair and certainly the most esteemed, The Watch Repairer's Manual is outstanding for its sequence of presentation and its many useful illustrations, including enlarged details of alarm and self-winding watches. The consummate craftsman and master of details, Fried himself created the illustrations. From teaching others, Fried has learned that if you have a good understanding of how and why the mechanisms work, you will become better at fixing any problems you face-often without needing to consult a book. The Watch Repairer's Manual provides: - Helpful background material, such as full descriptions of the main divisions of the modern watch mechanisms, including the purpose and function of each unit. - Complete directions for cleaning and overhauling a watch movement for casing. - A section devoted to general repairs and troubleshooting. For anyone interested in watch repair, this volume will serve as a working manual, a reference manual, and even a course of study. Assuming little previous knowledge on the part of the reader, Fried provides complete and clear detail on each operation. The Watch Repairer's Manual should be of great value to the student, hobbyist, watch collector, and instrument maker. Henry B. Fried wrote and illustrated 14 books, many pamphlets, and hundreds of articles on horology, the science of timepieces. The first American to receive the Silver Medal of the British Horological Institute, he served as president of the New York City Horological Society and the New York State Watchmakers Association and vice president of the old Horological Institute of America. He taught and lectured on horology and served as an industry consultant. He also was a consultant for the Random House Dictionary and the Merriam-Webster Dictionary.
