This book introduces the concept of voltage-controlled-oscillator (VCO)-based analog-to-digital converters (ADCs). Detailed explanation is given of this promising new class of high resolution and low power ADCs, which use time quantization as opposed to traditional analog-based (i.e. voltage) ADCs.

 A Casebook in Business Management: Indonesian Traditional Herbal Industry provides materials to support the application of case-based method in

classes. It is applicable for undergraduate and master's students focusing on management studies. The cases discuss myriads of topics that require in-depth analysis based on human resource management, strategic management, operations management, and financial management concepts. The cases are divided into several themes including organizational behavior, strategic management, supply chain management, financial management, quality management, and product diversification. To analyze the cases presented in this book, students may employ numerous tools such as Fishbone Diagram, SWOT Analysis, PEST Analysis, IFAS and EFAS Analysis, Porter's Five Forces, and many others. There are eight cases in this book. The first case discusses the succession planning in herbal medicine (jamu) industry. The second case talks about the

traditional cosmetics industry in Indonesia that uses one of the benefits of jamu for beauty purpose. The third case discusses the defensive strategy implemented by herbal medicine companies and several cases on strategies to manage and preserve herbal medicine (jamu) industry. The last case discusses the financial management of a herbal medicine (jamu) company. Book table of contents: Case 1 Succession Planning: How to Continue the Legacy of Traditional Herbal Medicine Industry in Indonesia Case 2 Traditional Cosmetics Industry in Indonesia: Using Jamu for Beauty Purposes Case 3 Assessing Defensive Strategy for Energy Drink Products during the Covid-19 Pandemic: Extra Joss and KukuBima Ener-G! Integration Case 6 Jamu Diversification: Developing Jamu without Leaving Its History Case 7 The Dilemma of Indonesian Traditional Herbal Medicine Standardization Case 8 PT Industri Jamu dan Farmasi Sido Muncul Tbk: The Largest Herbal Company in Indonesia *Public-Private Partnerships* OMF Literature Given today's challenges, companies are confronted with pressing questions: Are marketing and sustainability a contradiction? How can digitalization support marketers beyond digital advertising? These questions must be addressed in an international context since, for most companies, international business is more a reality than just a strategic option as it was just a few decades ago. This book provides insights into the fundamentals of international marketing with a focus on these topics because they are commonplace in today's international marketing. It presents theories and concepts of international marketing in a concise form along with many real-world examples. The book explores how digitalization makes potential connections and advances available to marketing and how marketing can contribute to shaping a more sustainable future. It is a must read for students interested in the topic and managers who are confronted with these challenges.

VCO-Based Quantizers Using Frequency-to-Digital and Time-to-Digital Converters Penguin

This work covers the design of CMOS fully integrated low power low phase noise voltage controlled oscillators for telecommunication or datacommunication systems. The need for low power is obvious, as mobile wireless telecommunications are battery operated. As wireless telecommunication systems use oscillators in frequency synthesizers for frequency translation, the selectivity and signal to noise ratio of receivers and transmitters depend heavily on the low phase noise performance of the implemented oscillators. Datacommunication systems need low jitter, the time-domain equivalent of low phase noise, clocks for data detection and recovery. The power consumption is less critical. The need for multi-band and multi-mode systems pushes the high-integration of telecommunication systems. This is offered by sub-micron CMOS featuring digital flexibility. The recent crisis in telecommunication clearly shows that mobile hand-sets became mass-market high-volume consumer products, where low-cost is of prime importance. This need for low-cost products - livens

tremendously research towards CMOS alternatives for the bipolar or BiCMOS solutions in use today.

"A compelling story about the kind of moral, life-giving decisions that businesses can make to do good while doing well."—Mark Bittman, author of *Animal, Vegetable, Junk* What's in a label? For Dr. Bronner's, more than ingredients or intentions—it spells out an ethical commitment to fairness and sustainable growth, uniting consumers and companies worldwide. Dr. Bronner's Magic Soaps are renowned for their dense product labels ("All-One!") and the curious tingling of peppermint. But how did this unusual natural soap transform the small print into soaring sales—inspiring customer loyalty not just with lather, but with good clean business? In *Honor Thy Label*, Dr. Bronner's head of Special Operations, Gero Leson, reveals the inside story of how a little-known family-run soap company grew from countercultural roots to create a revolutionary fair trade and organic supply chain from the ground up—and rode the waves of popular demand without losing sight of the process. Through stories of harrowing setbacks and hard-won triumphs in projects that spanned the globe, in Sri Lanka, Ghana, India, and beyond, Leson demystifies the process of building and scaling ethical production. And he proves that if done right, the results ripple outward to benefit customers, communities, and the environment we share. Told with spirit and conviction, *Honor Thy Label* invites socially conscious entrepreneurs and shoppers on a journey to break the boundaries of production with the pioneers of socially just business—spreading Dr. Bronner's radical vision of simple ingredients with cosmic impact.

This book is an attempt to comprehend and compile the history, present status, and future trends of the gender roles in agriculture. The book comprises of three divisions viz., Gender in agriculture development (Part I), Gender in allied sectors of agriculture (Part II) and Data, Tools and approaches in gender analysis (Part III), that explicates the prevalent gendered relegations. It provides insights on the gender dimensions in Indian agriculture, including initiatives, policy reforms and mends the literature gap in gender roles in the sector. The gender roles and impacts from different cultural and geographical horizons of agricultural

and allied sectors in the emerging contexts of globalization, urbanization, climate change and the Covid19 pandemic are discussed in the book. It will be helpful to academics, researchers, students, and social workers who strive towards a gender-neutral world. This book is co-published with NIPA. Taylor and Francis does not sell or distribute its print and electronic editions in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka. *FCC Record* European Alliance for Innovation

On the Way to the Web: The Secret History of the Internet and Its Founders is an absorbing chronicle of the inventive, individualistic, and often cantankerous individuals who set the Internet free. Michael A. Banks describes how the online population created a new culture and turned a new frontier into their vision of the future. Design of High-Performance CMOS Voltage-Controlled Oscillators presents a phase noise modeling framework for CMOS ring oscillators. The analysis considers both linear and nonlinear operation. It indicates that fast rail-to-rail switching has to be achieved to minimize phase noise. Additionally, in conventional design the flicker noise in the bias circuit can potentially dominate the phase noise at low offset frequencies. Therefore, for narrow bandwidth PLLs, noise up conversion for the bias circuits should be minimized. We define the effective Q factor (Q_{eff}) for ring oscillators and predict its increase for CMOS processes with smaller feature sizes. Our phase noise analysis is validated via simulation and measurement results. The digital switching noise coupled through the power supply and substrate is usually the dominant

source of clock jitter. Improving the supply and substrate noise immunity of a PLL is a challenging job in hostile environments such as a microprocessor chip where millions of digital gates are present.

This four-volume handbook covers important concepts and tools used in the fields of financial econometrics, mathematics, statistics, and machine learning. Econometric methods have been applied in asset pricing, corporate finance, international finance, options and futures, risk management, and in stress testing for financial institutions. This handbook discusses a variety of econometric methods, including single equation multiple regression, simultaneous equation regression, and panel data analysis, among others. It also covers statistical distributions, such as the binomial and log normal distributions, in light of their applications to portfolio theory and asset management in addition to their use in research regarding options

and futures contracts. In both theory and methodology, we need to rely upon mathematics, which includes linear algebra, geometry, differential equations, Stochastic differential equation (Ito calculus), optimization, constrained optimization, and others. These forms of mathematics have been used to derive capital market line, security market line (capital asset pricing model), option pricing model, portfolio analysis, and others. In recent times, an increased importance has been given to computer technology in financial research. Different computer languages and programming techniques are important tools for empirical research in finance. Hence, simulation, machine learning, big data, and financial payments are explored in this handbook. Led by Distinguished Professor Cheng Few Lee from Rutgers University, this multi-volume work integrates theoretical, methodological, and practical issues based on his years of academic and industry experience.
