How to craft a personal statement that secures interviews and admissions: "Reliable advice . . . a gift to premeds."—Sujay Kansagra, MD, author of *The Medical School Manual* *The Premed Playbook: Guide to the Medical School Personal Statement* shows students how to effectively craft their stories for medical school admission committees. It's not only a collection of essays from students who

got into top schools, but a showcase of essays that started badly and were honed to tell great stories. Ryan Gray, MD shares the stories of students who seemed unlikely to have a shot but ultimately succeeded, in part because of the advice laid out in *The Premed Playbook*. They had to fight their way into medical school—and told a great story to do it. The drafts-in-progress, example essays, and insider tips included here can help you do the same.

You've finally finished your personal statement and it's perfect! There's just one thing to consider before hitting the "send" button - will it meet the admission team's expectations? How will you know? CASPA guidelines are vague - "Write a brief statement expressing your motivation or desire to become a physician assistant." School websites aren't generally more helpful. Do they want to hear that you've dreamed of becoming a PA since you were five and loved your toy stethoscope? Are they interested in your volunteer work at a homeless shelter? Will it help that you've been a science nerd since 9th grade Biology? How should you tell your story? Should it read like a textbook, a novel or something in between? The fact is there hasn't been much guidance. Until now. Admissions directors and faculty from PA programs across the country have shared their thoughts on personal statements - what they hope to see, what they wish they'd never see, and tips to make an essay shine. When compiling this book, we realized that access to insider information

is just the first step to writing a winning personal statement. That's why we teach you everything you need to know about essay writing, from form to finesse, with step-by-step tips and examples. This is your all-in-one guide to writing the ideal personal statement for Physician Assistant programs anywhere in the country.

Do you want to be a "vanilla" applicant, or the "Perfect Applicant" at your physician assistant school interview? How to Ace the Physician Assistant School Interview is a proven, "must-have", for those PA school applicants who desire to have a competitive edge when interviewing for PA school. Written by Andrew J. Rodican, PA-C, author of *The Ultimate Guide to Getting Into Physician Assistant School*, this book is the best-selling interview book on the market for PA school applicants. In the second edition of *How to Ace the Physician Assistant School Interview*, you'll learn how to really supercharge your entire interview using targeted answers to questions you'll encounter on the big day. You'll learn how to go from a "vanilla" applicant, to the "Perfect Applicant." The

author will teach you how to tailor your answers relative to the PA program(s) that you are interviewing with, by infusing the Qualities, most important to that program, into every answer. You'll also learn how and where to find those Qualities before your interview. This book is the secret weapon you need to blow away the competition and get accepted into the PA school of your choice. Includes sample questions and answers to the toughest interview questions: Traditional questions Behavioral questions Situational questions Ethical questions Illegal questions The author also dedicates an entire chapter to the MMI interview.

"A surgeon can kill you...and you'll sleep right through it." The most dramatic—and seemingly glamorous—of medical fields, surgery captivates the public's imagination. Written for inquisitive laymen as well as anyone in the medical profession, this fascinating first-person

account documents the career of one of America's top surgeons. Readers accompany Sidney Schwab through medical school at Case Western Reserve University; an internship; junior and senior residencies (with a detour to Vietnam, where he won a Purple Heart); and finally his chief residency years in San Francisco. With humor and poignancy—and sometimes graphic detail—Schwab recalls memorable surgeries, surgeons, and patients. He takes care to explain, in understandable and interesting fashion, a variety of diseases, medical issues, and surgical techniques. More than just a memoir, *Cutting Remarks* offers a compelling look at how trauma and surgery are handled at a major hospital, and provides valuable insight into a surgeon's relationship with both peers and patients.

Weeks with Meditation presents a secular, mainstream view of meditation and applies it practically as a tool for personal transformation. Each week's lesson in the 8-week program contains a key for navigating the journey of self-awareness, and each week's meditation practice builds on those of the previous weeks, making the process accessible and enjoyable for novices and experts alike. Inspiring stories from Sarah's own experience and from the students she's taught in her 20-year career as a meditation teacher further enrich the text. Her approach is grounded in leading-edge brain research that shows meditating for 27 minutes a day over 8 weeks can make a huge difference by altering the gray matter in areas of the brain that govern learning, memory, empathy, and stress. Each of the lessons in the 8-week program is designed to provide a structure for creating a successful and sustainable meditation practice. As the readers build their meditation practice, they learn to undo stressful habits that don't serve them, cultivate compassion for themselves and others, and listen to and trust their inner wisdom. The Soul-Centered journey

is one of finding out who you really are; navigating your life based on that peaceful, loving, wise part of yourself; then fully and fearlessly expressing yourself in the world.

Medical interviews have changed a lot with time; in the last two decades, multiple mini interviews (MMIs) have revolutionized the assessment strategies for entrance to medical schools. MMIs usually consist of 6-10 stations of independent assessments done in a timed circuit so that the same examiner evaluates a specific skill for a station among the candidates. Many of these stations assess a candidate's soft skills, including critical thinking, problem solving, team working, leadership and professional attitudes in addition to their knowledge, skills and motivation towards choosing

medicine as a career. MMIs are not just a test of a candidate's knowledge or skills, but their ability to use it appropriately at the right time. Aristotle said, 'we are what we repeatedly do. Excellence, then, is not an act, but a habit'. Candidates wishing to succeed in medical MMI interviews need repetitive practice in the various stations. These stations usually include assessments on communication skills, medical ethics, recent medical facts, role play with an empathetic approach, data interpretation and calculations, scenario-based situations, personal character, motivation and judgment. This book will provide an excellent variety of opportunities to practice these stations and guide the candidate with a framework of answers. This book can be used for various medical university entrance exams, including those in the United Kingdom via the Universities and Colleges Admissions Service (UCAS), the United States via the American Medical College Application Service (AMCA), Canada via the respective Medical School Applications Service, Australia via the specific state Tertiary Admissions Centre and many other countries via their specific admission

pathways. Dr. Thanthullu Vasu has previously published four medical books alongside many chapters and articles in leading international journals. He has founded, organized and directed many teaching courses that have received excellent feedback. He regularly organizes national MMI courses for candidates applying to medical schools; these courses are in high demand and have consistently produced a successful outcome. Many of the contributors in the book are team members from the RISE Foundation Leicestershire, a charity based in Leicestershire (<https://risefoundationuk.com/>). All the contributors have extensive experience as examiners in many interviews and courses. The royalties from the sale of this book will be donated to the RISE Foundation Leicestershire. Thank you for buying this book, as the money will go towards helping various causes supported by this charity. We wish you much success in your interviews and your future medical career.

Physician-Assisted Death is the eleventh

volume of Biomedical Ethics Reviews. We, the editors, are pleased with the response to the series over the years and, as a result, are happy to continue into a second decade with the same general purpose and zeal. As in the past, contributors to projected volumes have been asked to summarize the nature of the literature, the prevailing attitudes and arguments, and then to advance the discussion in some way by staking out and arguing forcefully for some basic position on the topic targeted for discussion. For the present volume on Physician-Assisted Death, we felt it wise to enlist the services of a guest editor, Dr. Gregg A. Kasting, a practicing physician with extensive clinical knowledge of the various problems and issues encountered in discussing physician assisted death. Dr. Kasting is also our student and just completing a graduate degree in philosophy with a specialty in biomedical ethics here at Georgia State University. Apart from a keen interest in the topic, Dr. Kasting has published good work in the area and has, in our opinion, done an excellent job in taking on the lion's share of editing this well-balanced and probing set of essays. We hope you

will agree that this volume significantly advances the level of discussion on physician-assisted euthanasia. Incidentally, we wish to note that the essays in this volume were all finished and committed to press by January 1993. "A must-have for every future doctor's collection. Great advice, comprehensive, and to the point. Dr. Gray breaks it down, play by play." —Sujay Kansagra, MD, author of The Medical School Manual The

Premed Playbook Guide to the Medical School Interview is the only book needed to prepare premed students for their medical school interviews. Through interviews with Admissions Committee members and others, Dr. Gray has compiled the most comprehensive book on this subject. Premed students want to know what to expect, but more importantly they need to see examples of what successful applicants have done. The Premed Playbook not only gives them close to six hundred potential interview questions, it also gives them real answers and feedback from interview sessions that Dr. Gray has held with students. "This book touches on every aspect of the interview from applying, during the interview and things to do/not to do after the interview. I highly recommend this book for every student to read and have available for reference during the medical school interview season." —Antonio J. Webb, MD, orthopedic resident surgeon, motivational speaker, and author of Overcoming the Odds "He challenges the reader to examine their strengths and weaknesses and gives them a blueprint on how to put their best foot forward. His

advice is real-world and complied by many interviewers, including myself, who have years of experience interviewing medical

school applicants. I highly recommend this book as a fundamental preparation tool for the application process.” —Gregory M. Polites, MD, Associate Professor of
