OSHA's mission is to assure the safety and health of America's working men and women by promulgating and enforcing standards and regulations; providing training, outreach, and education; establishing partnerships; and encouraging continual improvement in workplace safety and health as well as the development of comprehensive safety and health management systems. Effective and efficient use of resources requires careful, flexible planning. In this way, the overall goal of hazard abatement and employee protection is best served. This instruction provides National, Regional, and Area Office personnel with policy and guidelines for implementation of competency-based training programs for OSHA compliance personnel. This instruction provides guidance and direction to the Occupational Safety and Health Administration (OSHA) National, Regional, and Area Offices concerning OSHA's policies and procedures for training of Compliance Safety and Health Officers (CSHOs). It is essential that CSHOs have the requisite knowledge, skills, capability and varied professional backgrounds to accomplish OSHA's mission of promoting safe and healthful working conditions for America's working men and women. In this instruction, OSHA has provided detailed guidance for training required during the initial three-year period of a CSHO's career, including recommended training that assists the CSHO with preparation for professional certification exams. This instruction identifies training paths that provide assistance to the regions in managing their training programs.

OSHA Made Easy CreateSpace

This workbook is intended to provide entry level general industry workers information about their rights, employer responsibilities, and how to identify, abate, avoid and prevent job related hazards on a job site. This workbook covers a variety of general industry safety and health hazards which a worker may encounter at a work site. Training will emphasize hazard identification, avoidance, control and prevention. Please note that this workbook is only a study guide. It is not a requirement of OSHA, or the Department of Labor, and is not a substitute for OSHA training. Please visit osha.gov to find an OSHA Authorized Trainer.

This instruction provides guidance and direction to the Occupational Safety and Health Administration (OSHA) National, Regional, and Area Offices concerning OSHA's policies and procedures for training of Compliance Safety and Health Officers (CSHOs). It is essential that CSHOs have the requisite knowledge, skills, capability and varied professional backgrounds to accomplish OSHA's mission of promoting safe and healthful working conditions for America's working men and women. In this instruction, OSHA has provided detailed guidance for training required during the initial three-year period of a CSHO's career, including recommended training that assists the CSHO with preparation for professional certification exams. This instruction identifies training paths that provide assistance to the regions in managing their training programs. The goal of this instruction is to assist CSHOs and their supervisors with direction, guidance and training options that directly contribute to the CSHO's ability to represent OSHA with a high degree of professional expertise. In addition, the CSHO training program identifies a correlation between CSHO competency and achieving respected credentials in the fields of safety, health and construction such as Certified Safety Professional (CSP), Certified Industrial Hygienist (CIH) and Certified Construction Health and Safety Technician (CCHST(r)). This instruction describes the revised training program for OSHA compliance personnel and supersedes TED 01-00-012, Training Program for OSHA Compliance Personnel, dated July 7, 1992. Changes include: Each newly-hired CSHO will be required to complete a minimum of eight courses offered by the OSHA Training Institute (OTI) during the first three years of his/her career as a CSHO. The order and sequence of these courses are as prescribed in this

instruction. The OTI training program offers Regional Administrators the opportunity to incorporate up to four additional technical courses into the CSHO's initial three-year training plan. Each CSHO and his/her supervisor will be required to track progress throughout the initial three-year period. An Individual Development Plan (IDP) will be updated annually. The IDP (Form DL-80) will be used as a planning and tracking document for reference by the CSHO and his/her supervisor to ensure that the CSHO receives all required training. A time extension policy has been added and the waiver policy has been clarified. Appendix A has been revised and expanded. Appendix A combines formalized training with self-instruction and on-the-job training recommendations in a comprehensive format. Supervisors and CSHOs will find this a useful tool for planning and sequencing professional development during the first year of the CSHO's career. Appendix B has been added to provide supervisors with recommended CSHO self instruction and follow-up on-the-job training to reinforce OTI training provided in years two and three. Appendix C lists OTI courses that are required or recommended in OSHA directives as a quick reference guide. This reference may be used to assist supervisors and CSHOs in developing IDPs for continuing professional development. Appendix D provides information to assist supervisors and CSHOs determine which OTI courses could help prepare a CSHO for the Certified Construction Health and Safety Technician (CCHST(r)), Certified Industrial Hygienist (CIH) or Certified Safety Professional (CSP) professional certification exam.

OSHA Compliance Manual Aspen Publishers

OSHA Made Easy comes in a User-Friendly format for quick, easy access. It also contains easy to understand explanations of the three most cited categories of standards: 1. Recordkeeping 2. Employee Training Requirements 3. Written Safety Plans` It uncovers hundreds of safety and health requirements otherwise hidden under layers of unreadable government gobbledeygook. It cures the #1 reason for non-compliance: not knowing the OSHA requirements. This book has tremendous value. It is 3 books in 1. OSHA Made Easy gives you the confidence of knowing that you won't overlook your OSHA obligations or be guilty of ignorance of the law. You need only check the topics of interest to you and it will direct you to all applicable OSHA standards. It will tell you whether or not there is an OSHA standard regulating the three categories. For example, if the subject you select is "Respirators" you will find page numbers under all three categories (records, written programs and training.) If you select "Safety Data Sheets "you will notice that there are page numbers under the first two headings of "Records" and "Training". Thus, you will know that there is no number under "written programs "requirement that is specific to that that subject. The list covers over 300 topics

Our Guide is an essential tool for complying with OSHA regulations and for reducing the most common workplace injuries. the OSHA Training Guide is written by H. Ray Kirk, Ph.D., a Certified Trainer (CT) and Certified Environmental Specialist (CES), and edited by an attorney. New features in this edition of the Guide include a chapter on Electrical Safety (Awareness Level Only), new quizzes and answer sheets for each training module, video display terminal checklists to ensure workstations are ergonomically sound, and updated information on bloodborne pathogens, block-out procedures and devices, energy control procedures, and guidance on hand protection. Each of the 13 training topics includes course work for the instructor and Training Certification Sheets for training documentation, as well as training handouts and testing materials for the trainees. Training topics are: Back Safety Bloodborne Pathogens (Awareness Level Only) Chemical or Hazardous Waste Spill (First Responders at Awareness Level) Controlling Hazardous Energy (Lock-Out/Tag-Out) Electrical Safety (Awareness Level Only) Ergonomics Fire Safety Forklift Safety Hazard Communication (HAZCOM) Hearing Protection Personal Protective Equipment (PPE) Power Tool Safety Respiratory Protection Workplace Violence Protection Updated annually. Also available on CD.

Workplace Safety and Health Lulu.com

Many standards promulgated by the Occupational Safety and Health Administration (OSHA)

explicitly require the employer to train employees in the safety and health aspects of their jobs. Other OSHA standards make it the employer's responsibility to limit certain job assignments to employees who are certified, competent, or qualified meaning that they have had special previous training, in or out of the workplace. The term designated personnel means selected or assigned by the employer or the employer's representative as being qualified to perform specific duties. These requirements reflect OSHA's belief that training is an essential part of every employer's safety and health program for protecting workers from injuries and illnesses. Many researchers conclude that those who are new on the job have a higher rate of accidents and injuries than more experienced workers. If ignorance of specific job hazards and of proper work practices is even partly to blame for this higher injury rate, then training will help to provide a solution.

OSHA is generally responsible for setting and enforcing occupational safety and health standards in the nation's workplaces. OSHA carries out enforcement directly in 34 states and territories, while the remaining 22 have chosen to administer their own enforcement programs (state-run programs) under plans approved by OSHA. GAO was asked to review issues related to state-run programs. This report examines (1) what challenges states face in administering their safety and health programs, and (2) how OSHA responds to state-run programs with performance issues. GAO reviewed relevant federal laws, regulations and OSHA policies; conducted a survey of 22 state-run programs; and interviewed officials in OSHA's national office, all 10 OSHA regions, and from a nongeneralizable sample of 5 state-run programs; and interviewed labor and business associations and safety and health experts. State-run programs face several challenges that primarily relate to staffing, and include having constrained budgets, according to OSHA and state officials. States have difficulty filling vacant inspector positions, obtaining training for inspectors, and retaining qualified inspectors. Recruiting inspectors is difficult due to the shortage of qualified candidates, relatively low state salaries, and hiring freezes. Although OSHA has taken steps to make its courses more accessible to states, obtaining inspector training continues to be difficult. According to an agency official, OSHA's Training Institute faces several challenges in delivering training, including recruiting and retaining instructors, difficulty accommodating the demand for training, and limitations in taking some courses to the field due to the need for special equipment and facilities. These challenges are further exacerbated by states' lack of travel funds, which limit state inspectors' access to OSHA training. Retaining qualified inspectors is another challenge among states. Officials noted that, once state inspectors are trained, they often leave for higher paying positions in the private sector or federal government. GAO's survey of the 22 state-run programs that cover private and public sector workplaces showed that turnover was more prevalent among safety inspectors than health inspectors. Nearly half of these states reported that at least 40 percent of their safety inspectors had fewer than 5 years of service. In contrast, half of the states reported that at least 40 percent of their health inspectors had more than 10 years of service. These staffing challenges have limited the capacity of some state-run programs to meet their inspection goals. OSHA has responded in a variety of ways to state-run programs with performance issues. These include closely monitoring and assisting such states, such as accompanying state staff during inspections and providing additional training on how to document inspections. OSHA has also drawn attention to poor state performance by communicating its concerns to the governor and other high-level state officials. In addition, OSHA has shared enforcement responsibilities with struggling states or, as a last resort, has resumed sole responsibility for federal enforcement when a state has voluntarily withdrawn its program. Although OSHA evaluates state-run programs during its annual reviews, GAO found that OSHA does not hold states accountable for addressing issues in a timely manner or establish time frames for when to resume federal enforcement when necessary. In addition, the current statutory framework may not permit OSHA to quickly resume concurrent enforcement authority with the state when a state is struggling with performance issues. As a result, a state's performance problems can continue for years. OSHA officials acknowledged the need for a mechanism that allows them to intervene more quickly in such circumstances. GAO-13-320

What Every Supervisor Must Know About OSHA - Construction This book was designed for use by the OSHA Training Institute Education Centers as part of the curriculum for the OSHA 500 Train the Trainer program. It can be used to deliver OSHA 10 or 30 hour training as well. What Every Supervisor Must Know About OSHA provides managers, supervisors and safety personnel with tools and knowledge needed to ensure a safe and worksite. This single source book provides guidance for construction workers to ensure compliance with mandated Federal Regulations. OSHA can and does inspect companies on a regular and routine basis and levies fines for non-compliance. Accidents and OSHA penalties impact the bottom line of businesses. This book addresses how accidents affect the hidden costs of lost productivity, workers compensation expense and legal liabilities for managers. While OSHA rules and regulations are explained in this book, the emphasis is on accident prevention using established guidelines. Steps for organizations to comply with OSHA's regulations and Safety Committees are outlined in an easy to use format. Topics are outlined that ensure compliance with Federal rules in a "how to" manner. This manual has been field tested with agencies that sought a simple, no-nonsense approach to OSHA compliance. Included in the book: An overview of OSHA, how it works, how to read the regulations, penalties Detailed guidance on compliance issues such as - FOCUS Inspections and Multi-employer worksites -Health hazards in construction -Asbestos, Lead and Bloodborne Pathogens -Hazard Communication -Personal Protective Equipment and Respirators -Permit Required Space Entry -Welding -Electrical Safety -Stairs and Ladders -Fall Protection -Scaffolding -Steel Erection -Cranes and material handling -Concrete and masonry -Fire Protection -Excavations -Hand and Power Tools -Demolition, Underground Construction and Blasting - Construction Training Requirements

OSHA's mission is to assure the safety and health of America's working men and women by promulgating and enforcing standards and regulations; providing training, outreach, and education; establishing partnerships; and encouraging continual improvement in workplace safety and health as well as the development of comprehensive safety and health management systems. Effective and efficient use of resources requires careful, flexible planning. In this way, the overall goal of hazard abatement and employee protection is best served. This Instruction provides guidance and direction to the Occupational Safety and Health Administration (OSHA) National, Regional, and Area Offices concerning OSHA's policies and procedures for training Compliance Safety and Health Officers (CSHOs). It is essential that CSHOs have the requisite knowledge, skills, capability and varied professional backgrounds to accomplish OSHA's mission of promoting safe and healthful working conditions for America's working men and women. In this Instruction, OSHA has provided detailed guidance for training required during a CSHO's career, including recommended training that assists the CSHO with preparing for professional certification exams. This Instruction identifies training paths that provide assistance to the regions in managing their training programs.

Catalog of Activities OSHA Made Easy

If sound policy is to be made on the issue of marijuana in the workplace, all available empirical evidence about its impact on job performance should be utilized in the decision process. Although a substantial amount of relevant research has been done, the results published in journals in widely divergent fields, are not easily summarized and present no single, simple message for decision makers. Schwenk and Rhodes offer a unique review of this complex body of work and challenge the many highly publicized but scientifically unsound mythical numbers touted as supporting various policy options. The authors provide a clear and objective presentation to managers on how to evaluate the evidence for themselves and make sound decisions for their own organizations. Scrupulously unbiased in its choice of material, the book will be an essential resource for organizational and public policy makers, and for university students and their teachers. The effect of marijuana on job performance has been widely accepted as harmful—but is it? Congress thought so, and in 1988, used productivity losses which it attributed to marijuana and other drugs to justify passage of legislation initiating a mandate for a drug-free workplace. Additional legislation expanding this mandate followed and a high percentage of large corporations and an increasing number of small businesses now expend scarce resources on anti-drug programs. Schwenk and Rhodes remain neutral in the debate over workplace drug policies, but argue that policy should be informed by empirical research on the impact of marijuana on job performance. Their book is both a challenge to the mythical numbers so often publicized as supporting a particular advocate's vested position, and a guide to both practitioners and scholars to help them evaluate the diverse body of existing evidence and the claims made by those committed to given policy positions. Schwenk and Rhodes reprint examples of high quality research previously published in major journals in the fields of psychology, anthropology, economics and medicine. Reviewing and summarizing existing findings, the authors relate these findings to the decision situations faced by policy-makers in the private and public sectors. While the book refuses to endorse any decision outcome with regard to marijuana and the workplace, it makes strong recommendations about the ^Iprocesses^R that should be used in selecting those outcomes. It provides guidelines for evaluating policy-relevant social scientific evidence and discusses the role such evidence can and should play in policy-making. The book shows that contrary to widely held beliefs, very little evidence that the substance has a consistent negative effect on worker productivity. Though social science does not show that resources devoted to creating a drug-free workplace are likely to pay off economically, the authors stress that the implications of this fact for corporate and government decisions are not cut and dried, but depend on the decision rules and the policy goals selected by policy-makers. This book will be an essential tool for managers, scholars, and anyone trying to make sense of the complicated and confusing maze of data and arguments surrounding this divisive issue.
