For London lovers of all stripes, National Geographic London Book of Lists chronicles this ever-changing city from its ancient Roman origins to the present day. Organized with a minimum of organization, the 140 lists in this eclectic and hugely entertaining illustrated compendium cover the city's best, worst, highest, smallest, first, last, and everything in-between. Among the many intriguing facts, stats, and snippets, you'll discover: · Where you can find six old windmills within the confines of metropolitan London · Why the women's restroom at an East End pub is especially popular with avant-garde artists · When a tornado razed nearly 600 houses and destroyed London Bridge · The address of the only London flat where the four members of the Beatles lived together · Why local children beat the stone boundaries outside the Tower of London with willow branches every three years · Where you can find London's eight best waterfront pubs, seven greatest Victorian gin palaces, and ten most historic pubs · Which two famous London museums still show World War II bomb damage on their outer walls Royal palaces. Street markets. Stellar views. Cockney slang. Favorite meals of kings. Roman ruins. Secrets lost to time. With surprises on every page, National Geographic London Book of Lists takes you deep inside the city that never fails to fascinate.

Pop culture fans and trivia lovers will delight in National Geographic's highly browsable, freewheeling compendium of customs, notions and inventions that reflect human ingenuity throughout history. Dip into any page and discover extraordinary hidden details in the everyday that will inform, amuse, astonish, and surprise. From hand tools to holidays to weapons to washing machines, this book features hundreds of colorful illustrations, timelines, sidebars, and more as it explores just about every subject under the sun. Who knew that indoor plumbing has been around for 4,600 years, but punctuation, capital letters, and the handy spaces between written words only date back to the Dark Ages? Or that ancient soldiers baked a kind of pizza on their shields— when they weren't busy flying kites to frighten their foes?

From one of the most trusted names in field guides comes a new and lavishly illustrated guide to identifying North America's most common birds, mammals, insects, reptiles, and amphibians, plus fish and other aquatic creatures. Broad in scope and clearly organized, National Geographic Illustrated Guide to Wildlife is just like having five field guides in one. Each of the five realms of wildlife gets a chapter, and each chapter identifies 160 of the most common and most interesting

animals around, providing essential information and a bullet list of key points on each species.

Photographs and original artwork represent 900 species total, making this the ultimate field guide to the creatures of the continental United States and Canada, from your own backyard into the deepest wilderness.

Created for map lovers by map lovers, this rich book explores the intriguing stories behind maps across history and illuminates how the art of cartography thrives today. In this visually stunning book, award-winning journalists Betsy Mason and Greg Miller--authors of the National Geographic cartography blog "All Over the Map"--explore the intriguing stories behind maps from a wide variety of cultures, civilizations, and time periods. Based on interviews with scores of leading cartographers, curators, historians, and scholars, this is a remarkable selection of fascinating and unusual maps. This diverse compendium includes ancient maps of dragon-filled seas, elaborate graphics picturing unseen concepts and forces from inside Earth to outer space, devious maps created by spies, and maps from pop culture such as the schematics to the Death Star and a map of Westeros from Game of Thrones. If your brain craves maps--and Mason and Miller would say it does, whether you know it or not--this eye-opening visual feast will inspire and delight.

**Pristine Seas** National Geographic Books

"Why were the Easter Island heads erected? What really happened to the Maya? Who stole the Irish Crown Jewels? The first book in this exciting new series will cover history's heavy-hitting, head-scratching mysteries, including the Lost Colony of Roanoke, the Bermuda Triangle, the Oak Island Money Pit, Stonehenge, the Sphinx, the disappearance of entire civilizations, the dancing plague, the Voynich manuscript, and so many more. Chock-full of cool photos, fun facts, and spine-tingling mysteries"--Provided by publisher.

The past few years have witnessed a revolution in our ability to obtain DNA from ancient humans. This important new data has added to our knowledge from archaeology and anthropology, helped resolve long-existing controversies, challenged long-held views, and thrown up remarkable surprises. The emerging picture is one of many waves of ancient human migrations, so that all populations living today are mixes of ancient ones, and often carry a genetic component from archaic humans. David Reich, whose team has been at the forefront of these discoveries, explains what genetics is telling us about ourselves and our complex and often surprising ancestry. Gone are old ideas of any kind of racial 'purity.' Instead, we are finding a rich variety of mixtures. Reich describes the cutting-edge findings from the past few years, and also considers the sensitivities involved in tracing ancestry, with science sometimes jostling with politics and tradition. He brings an important wider message: that we should recognize that every one of us is the result of a long history of migration and intermixing of ancient peoples, which we carry as ghosts in our DNA. What will we discover next?

Celebrated National Geographic photojournalist Sartore continues his Photo Ark quest, photographing species around the world that are escaping extinction thanks to human efforts. The animals featured in these pages are either destined for extinction or already extinct in the wild but still alive today, thanks to dedication of a heroic group committed to their continued survival.

*History's Mysteries* National Geographic Books

Science of the Supernatural takes the findings of science and applies them to the doctrines of religion. It tells how the natural and the supernatural are just two different parts of the same real universe. It shows why the spiritual realm is unseen by us and yet is as real as the elements that make up the earth. It explains why we mortals can't see the spiritual realm, and yet, the spiritual realm can affect us. We can contact God and get answers and sometimes even get what are called miracles from him. It shows how creation came from what we call nothing and how the creation, as given in Genesis, is God organizing what is already there. It tells why the fall of Adam left us in such sad state and how it will be for our benefit in time. It explains how God works with this fallen world. And it explains how to not only search for God as so many do but how to actually find him.

Marvelous and wonderful truths are found when the theories of science are applied to the doctrines and truths of religion. They fit together quite well.

Mysterious and insular associations are a phenomenon as old as the pyramids. People have formed clandestine organizations, with idiosyncratic rules, rites and practices that have attracted the wealthy, respected, and powerful. From Freemasons and Knights Templar, to Sons of Liberty, Black Hand, and Skull and Bones, these groups have been religious, political, nefarious or just plain silly, and now this special edition from LIFE unlocks the door to these secretive worlds. From those organizations that were hidden behind the Founding Fathers that helped shape the course of history to those that have dabbled in the occult, this beautifully illustrated edition takes you deep inside these fascinating organizations.
