 Art-form, send-up, farce, ironic disarticulation, pastiche, propaganda, trololololol, mode of critique, mode of production, means of politicisation, even of subjectivation - memes are the inner currency of the internet's circulatory system. Independent of any one set value, memes are famously the mode of conveyance for the alt-right, the irony left, and the apoliticos alike, and they are impervious to many economic valuations: the attempts made in co-opting their discourse in advertising and big business have made little headway, and have usually been derailed by retaliative meming. POST MEMES: SEIZING THE

MEMES OF PRODUCTION takes advantage of the meme's subversive adaptability and ripeness for a focused, in-depth study. Pulling together the interrogative forces of a raft of thinkers at the forefront of tech theory and media dissection, this collection of essays paves a way to articulating the semiotic fabric of the early 21st century's most prevalent means of content posting, and aims at the very seizing of the memes of production for the imagining and creation of new political horizons. With contributions from Scott and McKenzie Wark, Patricia Reed, Jay Owens, Thomas Hobson and Kaajal Modi, Dominic Pettman, Bogna M. Konior, and Eric Wilson, among others, this essay volume offers the freshest approaches available in the field of memes studies and inaugurates a new kind of writing about the newest manifestations of the written online. The book aims to become the go-to

resource for all students and scholars of memes, and will be of the utmost interest to anyone interested in the internet's most viral phenomenon. Earth today? Will history repeat itself in our time? I.D.E. Thomas reveals startling similarities between the past and today; between ancient peoples and modern peoples, signs that point to a return of mysterious beings known in the Bible as "Nephilim". The Omega Conspiracy could well be their final battle.

Drawing on a millennia of calligraphy theory and history, *Brushed in Light* examines how the brushed word appears in films and in film cultures of Korea, Japan, Taiwan, Hong Kong, and PRC cinemas. This includes silent era intertitles, subtitles, title frames, letters, graffiti, end titles, and props. Markus Nornes also looks at the role of calligraphy in film culture at large, from gifts to correspondence to advertising. The book begins with a historical dimension, tracking how calligraphy is initially used in early cinema and how it is continually rearticulated by transforming conventions and the integration of new technologies. These chapters ask how calligraphy creates new meaning in cinema and demonstrate how calligraphy, cinematography, and acting work together in a single film. The last part of the book moves to other regions of theory. Nornes explores the cinematization of the handwritten word and explores how calligraphers understand their own work. *Runner Havens* Galde Press, Inc.

From a rising new star of horror comes a killer read that will make you lose track of time and reality. The *Crimson Labyrinth* is

a wicked satire on extremist reality TV in the tradition of *The Running Man*-if that indeed is what it is. Welcome to *THE MARS LABYRINTH* where things aren't what they seem. Welcome to the world of *Kishi*, where the plot is as gnarly as the humor is twisted. When an unemployed former math major wakes up one day, he wonders if he's somehow ended up on the red planet. The good-looking young woman with aid-she says her name is Ai and that she draws erotic comics for a living-seems to have no clue either as to their whereabouts. Their only leads are cryptic instructions beamed to a portable device. Has the game begun? There is no reset button, no saving and no continue-make the wrong move and it's really **GAME OVER**. In the cruel world of *THE MARS LABYRINTH*, mercy and compassion are only for the weak or the very, very strong. The stakes are nothing less than your life-and apparently a lot of money. If you're a fan of *Lost* or *Battle Royale*, don't miss this one.

What is memory? It is at the same time ephemeral, unreliable and essential to everything we do. Without memory we lose our sense of identity, reasoning, even our ability to perform simple physical tasks. Yet it is also elusive and difficult to define, and throughout the ages philosophers and psychologists have used metaphors as a way of understanding it. First published in 2000, this fascinating book takes the reader on a guided tour of these metaphors of memory from ancient times to the present day. Crossing continents and disciplines, it provides a compelling history of ideas about the mind by exploring the way these metaphors have been used - metaphors often derived from the techniques and instruments developed over the years to store information, ranging from wax tablets and books to photography, computers and even the hologram. Accessible and thought-provoking, this book should be

read by anyone who is interested in memory and the mind.

Extraordinary salespeople develop a business plan that reaches for an extraordinary reputation that provides a powerful stream of enthusiastic referrals and repeat business. The result is a marketing advantage that cannot be matched by any other method. The common elements driving these extraordinary salespeople are 7 Simple "Take the High Road" Habits
