Business Process
Management (BPM) is
about managing all the
work that is necessary for
delivering an end product

or service. This book is
well-suited for teaching an
academic course as a part
of a final year Bachelor
and Master Degree
programs in ITC,
Management, and also,
other related disciplines.
It can also be used for
conducting an equivalent
training programme for in-
house professionals.
Although no book can be
a substitute for the wide
and varied experience of

an instructor, this book will help the instructor to concentrate on teaching rather than worrying about creating the teaching material and assembling the student material. In view of the likely differences in background of the readers, some material has been placed into appendices to enable them to read on a need to know basis. Besides, this book, in its present form, is equally useful for the professionals, who wish to grasp the essentials of BPM without attending a

formal instructional course. KEY FEATURES □ Chapters are appropriately organized as per the process life cycle □ Written in bullet format for easy grasping □ Comprises theory and its applications systematically □ Emphasizes relevant deployment issues □ Separate chapter on Performance Monitoring □ Highly illustrative with diagrams and sketches □ Separate appendix on BPMS TARGET AUDIENCE □ ME (Computer Science/ Engineering/Technology)

□ MBA (Information Systems) □ MCA students Digital Business Saket Ghiria Classes Oracle Procure-to-Pay GuideMcGraw Hill Professional *BUSINESS PROCESS MANAGEMENT* Greenleaf Book Group Computer and Information Security Handbook, Third Edition, provides the most current and complete reference on computer security available in one volume. The purpose of this book is to remove the veil of secrecy surrounding SAP upgrade techniques and concepts, and to provide the user with a detailed description of the steps needed for a successful implementation. Today more than 12 million

people in 120 countries who are working for 36,200 companies are using SAP on a regular basis. This popular, but very complex software system must be constantly reconfigured and upgraded to accommodate its latest releases. Upgrading SAP provides a complete overview of the process to upgrade from one SAP release to the next one and explains with detailed descriptions, the use of all relevant SAP upgrade tools. Along with a technical description of

the SAP NetWeaver Application Server (AS), it also discusses personnel issues and the economic ramifications of such an upgrade project. Examples in this book are based on various different SAP products and releases, such as SAP NetWeaver 2004, 2004S (also known as NetWeaver 7.0 and 7.1), and SAP Business Suite 2005 with SAP ERP 6.0, BI, CRM, SCM, and SRM. Conceived as both a teaching book and as a reference manual, it covers all the techniques,

background information, notes, tips, and tricks needed for any SAP upgrade project. A CD-ROM accompanies the book with templates and outlines for the upgrading process, as well as third-party SAP-related material.

good at distilling the data within our own companies, but that's not enough if we want a competitive advantage. In Smarter Together, Coupa Software CEO Rob Bernshteyn explains how we will soon be able to draw upon the intelligence of the community—collectively what we, and the organizations we work for, know—to benefit the community, our companies, and ourselves. For example, we'll easily uncover:

- Real-time best practices

for virtually every element of our business. · The best way to offer our products and services. · Who delivers exactly what they say they will, on time, with the best price, quality and reliability. As Bernshteyn explains, the prescriptive insights gleaned from the massive amount of community data available worldwide will transform entire industries and break down long-standing barriers to value. All of us will grow smarter together. Commerce will never be the same again.
