“Privilege and Prejudice: Twenty Years with the Invisible Knapsack” explores various areas of contemporary American culture where sexism and racism still leave an indelible print. In 1988, Peggy McIntosh published her groundbreaking essay “White Privilege and Male Privilege,” an examination of white privilege and its role in perpetuating racism. Twenty years later, these seven essays reveal problems that persist even in systems that are ostensibly trying to address problems of inequality. Beginning with a foreword by McIntosh on our society’s resistance to confronting privilege, this text then delves into a variety of fields. In the first section, on higher education, Simona Hill, Lucien Winegar, Juanita Johnson-Bailey and Ronald Cervero contribute two essays examining racism in the academy, while Donna Axel explores the stigma in law school alternative application processes. The next section interrogates privilege and its effects on females’ choices, with Kyla Bender-Baird questioning global contraception policies and Mary Carney giving a historical overview to contextualize persistent gender inequities in computer technology. Media studies and stereotypes are considered in the final section, in which Janice Stapley analyzes children’s birthday cards for gender bias and Ellen Miller critiques male dance films. This text would be useful for social science and humanities scholars of all types with its explorations of the continuing ramifications of race, gender, class, and their intersections.

Richard P. McCormick has chronicled the black student protest

movement at Rutgers University, from the 1960s to today. He examines the forces that produced the protest movement, the tactics that were employed, and the qualified gains that were achieved. He tells us about demonstrations, building occupations, committee hearings, and countless meetings, but he also paints portraits of the many student leaders who mobilized protest. This is the story of a lot of pain, some blunders, and some successes. In the mid-sixties, the University established committees to recruit black students and to add more blacks to the faculty. These efforts produced only modest results. By 1968, there were still not enough black students on campus, but there were enough to create a political presence for the first time. They were committed to acting against the racism they perceived within the University. To respond to their protests, in March 1969 the Board of Governors passed a dramatically new and controversial policy to encourage disadvantaged students who lived in Camden, Newark, and New Brunswick to apply to Rutgers, where they would take college-preparatory classes as unmatriculated students, and then enter Rutgers as matriculated students. This program, never very successful, lasted only two years. Unrest did not end with the sixties. During the seventies, black students sporadically voiced protests against what they perceived to be an unsupportive environment. During the eighties, black enrollment actually declined, as did the black graduation rate. In conclusion, McCormick points to the effort that has been made but even more to the effort that still needs to be made and the social cost of ignoring the problem.

Almost every day American higher education is making news with a list of problems that includes the incoherent nature of the curriculum, the resistance of the faculty to change, and the influential role of the federal government both through major investments in student aid and intrusive policies. Checklist for Change not only diagnoses these problems, but also provides constructive recommendations for practical change. Robert Zemsky details the complications that have impeded every credible reform intended to change American higher education.

He demythologizes such initiatives as the Morrill Act, the GI Bill, and the Higher Education Act of 1972, shedding new light on their origins and the ways they have shaped higher education in unanticipated and not commonly understood ways. Next, he addresses overly simplistic arguments about the causes of the problems we face and builds a convincing argument that well-intentioned actions have combined to create the current mess for which everyone is to blame. Using provocative case studies, Zemsky describes the reforms being implemented at a few institutions with the hope that these might serve as harbingers of the kinds of change needed: the University of Minnesota at Rochester's compact curriculum in the health sciences only, Whittier College's emphasis on learning outcomes, and the University of Wisconsin Oshkosh's coherent overall curriculum. In conclusion, Zemsky describes the principal changes that must occur not singly but in combination. These include a fundamental recasting of federal financial aid; new mechanisms for better channeling the competition among colleges and universities; recasting the undergraduate curriculum; and a stronger, more collective faculty voice in governance that defines not why, but how the enterprise must change.

From Protest to President describes an inspirational odyssey of a young, Black activist coming of age in Mississippi and Chicago in

the tumultuous 1960s and '70s, culminating in a notable thirty-five-year presidency at Thomas Edison State University. From barbershop encounters with Malcolm X to death threats at Illinois State University and gunfire at Towson State, Pruitt provides a powerful narrative poised at the intersection of social justice, higher education and politics. He recounts leadership experiences at HBCUs and public universities across the country, as he advocated for autonomy at Morgan State and fought to preserve Tennessee State University. His steadfast activism, integrity and courage led to groundbreaking work in providing access to higher education for working adults and the military. From his days as a student protester in high school and college to his appearances on Capitol Hill, Pruitt has earned the reputation as a candid and influential leader in higher education.

Few in the United States will dispute the assumption that every high school graduate should be entitled to go to college regardless of financial need. But should everyone be able to go regardless of academic preparedness? Jackson Toby explores the idea that federal financial aid programs, all of which peg student aid to need alone and not to academic performance, are dragging down college admissions and academic standards to the point where America's schools, students, and economy will no longer be globally competitive. After a half-century of teaching, distinguished educator Jackson Toby concludes that our current system all too often gives both high school and college students the impression that college is an entitlement and not a challenge. *The Lowering of Higher Education: Why Student Loans Should Be Based on Credit Worthiness* is Toby's unflinching look at this

broken system and the ways it can be fixed. This volume documents just how far college admission standards have fallen and measures the cost of remedial programs designed to get underprepared high school students to the level they should have been at in the first place. Toby is both pointed and frank in his discussion on the issue of grade inflation, which rewards laziness while demoralizing hard-working students. To reverse the national decline of academic standards in American colleges, Toby proposes a radical solution: Let federal student aid be tied to academic performance as well as financial need, incentivizing students to develop serious attitudes and study habits in high school and keep them up in college.
