Adoptees' Ethnic Identity Within Family and Social Contexts Columbia University Press

Bloomsbury World Englishes offers a comprehensive and rigorous description of the facts, implications and contentious issues regarding the forms and functions of English in the world. International experts cover a diverse range of varieties and topics, offering a more accurate understanding of English across the globe and the various social contexts in which it plays a significant role. With volumes dedicated to research paradigms, language ideologies and pedagogies, the collection pushes the boundaries of the field to go beyond traditional descriptive paradigms and contribute to moving

research agendas forward. Volume 2: Ideologies explores the politics and economics of English, and the impact of language on local societies and cultures. In doing so, chapters discuss how English is often entangled in societal issues, such as inequality, (de-)colonization, racism, oppression and liberation.

 "The global spread of English (Blommaert, 2010), the emphasis on English language proficiency in various professional and educational fields (Hu & McKay, 2012), and the symbolic value of English (Bourdieu, 1994) all entail the importance of English language, including in Korea. Therefore, Korean mothers heavily invest in their children's English development, especially in the form of English Study Abroad (ESA) experiences, which have become an important response to the global push for learning English. Extending

previous research on the effects of globalization and drawing on sociolinguistics of globalization (Blommaert, 2010) and symbolic capital (Bourdieu, 1986), this study explores Korean mothers' perspectives on and experiences with pressure about their children's English education; how they respond to this pressure; and how these responses influence family life. The data were drawn from in-depth interviews with 15 Korean middle-class mothers, five from each of three categories of study abroad: "wild-geese" families where the father stays in the home country to earn money while the mother and children live abroad; "parachute-kids" where the child studies abroad alone; and "summer-camp" study abroad experiences. The study used modified grounded theory (Charmaz, 2006) as the analytic framework for the data. The study's main findings show that

Korean mothers constantly seek distinctive ways to mobilize their resources for the purposes of class reproduction by gaining their children's distinction (Bourdieu, 1984) through forms of ESA. A key finding is the identification of an emerging subculture of tight competition among middle-class mothers in the social field of Korea, a phenomenon I call "competitive cooperation." In addition, the study documents how the unequal distribution of resources, access, and opportunities for English education (Blommaert, 2010) in Korea reinforce the asymmetry of power relations among mothers. Implications from this study for policy makers and educators include improving education approaches to teaching English as well as understanding the emotional impact on Korean mothers."--Pages vii-viii.

During the 1990s, the number of children adopted from poorer countries to the more affluent West grew exponentially. Close to 140,000 transnational adoptions occurred in the United States alone. While in an earlier era, adoption across borders was assumed to be straightforward—a child traveled to a new country and stayed there—by the late twentieth century, adoptees were expected to acquaint themselves with the countries of their birth and explore their multiple identities. Listservs, Web sites, and organizations creating international communities of adoptive parents and adoptees proliferated. With contributors including several adoptive parents, this unique collection looks at how transnational adoption creates and transforms cultures. The cultural experiences considered in this volume raise important questions about race and nation; about kinship, biology, and belonging; and about the politics of the sending and receiving nations. Several essayists explore the images and narratives related to transnational adoption. Others examine the recent preoccupation with “roots” and “birth cultures.” They describe a trip during which a group of Chilean adoptees and their Swedish parents traveled “home” to Chile, the “culture camps” attended by thousands of young-adult Korean adoptees whom South Korea is now eager to reclaim as “overseas Koreans,” and adopted children from China and their North American parents grappling with the question of what “Chinese” or “Chinese American” identity might mean. Essays on Korean birth mothers, Chinese parents who adopt children within China, and the circulation of children in Brazilian families reveal the complexities surrounding

adoption within the so-called sending countries. Together, the contributors trace the new geographies of kinship and belonging created by transnational adoption. Contributors. Lisa Cartwright, Claudia Fonseca, Elizabeth Alice Honig, Kay Johnson, Laurel Kendall, Eleana Kim, Toby Alice Volkman, Barbara Yngvesson Essential Korean Reader Routledge "This is a textbook for undergraduate students studying the Asian American experience and ethnic studies in the fields of Sociology, Political Science, History, and Cultural Studies."--Jacket.

With a New Foreword The heartwrenching New York Times bestseller about the only known person born inside a North Korean prison camp to have escaped. North Korea's political prison camps have existed twice as long as Stalin's Soviet gulags and twelve times as long as the Nazi concentration camps. No one born and raised in these camps is known to have escaped. No one, that is, except Shin Dong-hyuk. In *Escape From Camp 14*, Blaine Harden unlocks the secrets of the world's most repressive totalitarian state through the story of Shin's shocking imprisonment and his astounding getaway. Shin knew nothing of civilized existence—he saw his mother as a competitor for food, guards raised him to be a snitch, and he witnessed the execution of his mother and brother. The late “Dear Leader” Kim Jong Il was recognized throughout the world, but his country remains sealed as his third son and chosen heir, Kim Jong Eun, consolidates power. Few foreigners are allowed in, and few North Koreans are able to leave. North Korea is hungry, bankrupt, and armed with nuclear weapons. It is also a human rights catastrophe. Between 150,000 and 200,000 people work as slaves in its political prison camps. These camps are clearly visible in satellite photographs, yet North Korea's government denies they exist. Harden's harrowing narrative exposes this hidden dystopia, focusing on an extraordinary young man who came of age inside the highest security prison in the highest security state. *Escape from Camp 14* offers an unequalled inside account of one of the world's darkest nations. It is a tale of endurance and courage, survival and hope.

Bloomsbury World Englishes Volume 2: Ideologies BRILL

This book is the story of the emergence and development of writing for children in modern Korea. Starting in the 1920s, a narrator-adult voice began to speak directly to a child-reader. This child audience was perceived as unique because of a new concept: the child-heart, the perception that the child's body and mind were transparent and knowable, and that they rested on the threshold of culture. This privileged location enabled writers and illustrators, educators and psychologists, intellectual elite and laypersons to envision the child as a powerful antidote to the present and as an uplifting metaphor of colonial Korea's future. Reading children's periodicals against the political, educational, and psychological discourses of their time, Dafna Zur argues that the figure of the child was particularly favorable to the project of modernity and nation-building, as well as to the colonial and postcolonial projects of socialization and nationalization. She demonstrates the ways in which Korean children's literature builds on a trajectory that begins with the child as an organic part of nature, and ends, in the post-colonial era, with the child as the primary agent of control of nature. Figuring Korean Futures reveals the complex ways in which the figure of the child became a driving force of nostalgia that stood in for future aspirations for the individual, family, class, and nation.

How do bilingual brothers and sisters talk to each other? Sibling language use is an uncharted area in studies of bilingualism. From a perspective of independent researcher and parent of three bilingual children Suzanne Barron-Hauwaert discusses the issues of a growing bilingual or multilingual family. What happens when there are two or more children at different stages of language development? Do all the siblings speak the same languages? Which language(s) do the siblings prefer to speak together? Could one child refuse to speak one language while another child is fluently bilingual? How do the factors of birth order, personality or family size interact in language production? With data from over 100 international families this book investigates the reality of family life with two or more children and languages. - - Back cover.

The Societal Codification of Korean English From K-pop to kimchi, Korean culture is becoming increasingly popular on the world stage. This cultural internationalisation is also mirrored linguistically, in the emergence and development of Korean English. Often referred to as 'Konglish', this book describes how the two terms in fact refer to different things and explains how Koreans have made the English language their own. Arguing that languages are no longer codified and legitimised by dictionaries and textbooks but by everyday usage and media, Alex Baratta explores how to reconceptualise the idea of 'codification.' Providing illustrative examples of how Koreans have taken commonly used English expressions and adjusted them, such as doing 'Dutch pay', wearing a 'Burberry' and using 'hand phones', this book explores the implications and opportunities social codification presents to EFL students and teachers. In so doing, The Societal Codification of Korean English offers wider

perspectives on English change across the world, seeking to dispel the myth that English only belongs to 'native speakers'. [A History of the Korean Language](#) Stanford University Press
