Beginning with a general theory of

function applied to body organs,

behaviors, customs, and both inner and

outer representations, Ruth Millikan

argues that the intentionality of language

can be described without reference to

speaker intentions and that an

understanding of the intentionality of

thought can and should be divorced from

the problem of understanding

consciousness. The results support a

realist theory of truth and of universals,

and open the way for a nonfoundationalist

and nonholistic approach to epistemology.
