A Down-to-Earth Approach James Henslin shares the excitement of sociology in Essentials of Sociology: A Down-to-Earth Approach, 11/e. With his acclaimed "down-to-earth" approach and personal writing style, the author highlights the sociology of everyday life and its relevance to students' lives. With wit, personal reflection, and illuminating examples, Henslin stimulates students' sociological imagination so they can better perceive how the pieces of society fit together. In addition to this trademark down-to-earth approach, other distinctive features include: comparative perspectives, the globalization of capitalism, and visual presentations of sociology. MySocLab is an integral part of the Henslin learning program. Engaging activities and assessments provide a teaching a learning system that helps students see the world through a sociological lens. With MySocLab, students can develop critical thinking skills through writing, explore real-world data through the new Social Explorer, and watch the latest entries in the Core Concept Video Series. Revel from Pearson is a new learning experience designed for the way today's students read, think, and learn. Revel redesigns familiar and respected course content and enriches it for today's students with new dynamic, rich-media interactives and assessments. Designing Engineers First Edition is written in short modules, where each module is built around a specific learning outcome and is cross-referenced to the other modules that should be read as pre-requisites, and could be read in tandem with or following that module. The book begins with a brief orientation to the design process, followed by coverage of the design process in a series of short modules. The rest of the book contains a set of modules organized in several major categories: Communication & Critical Thinking, Teamwork & Project Management, and Design for Specific Factors (e.g. environmental, human factors, intellectual property). A resource section provides brief reference material on economics, failure and risk, probability and statistics, principles & problem solving, and estimation.

The field of technical communication is rapidly expanding in both the academic world and the private sector, yet a problematic divide remains between theory and practice. Here Stuart A. Selber and Johndan Johnson-Eilola, both respected scholars and teachers of technical communication, effectively bridge that gap. Solving Problems in Technical Communication collects the latest research and theory in the field and applies it to real-world problems faced by practitioners—problems involving ethics, intercultural communication, new media, and other areas that determine the boundaries of the discipline. The book is structured in four parts, offering an overview of the field, situating it historically and culturally, reviewing various theoretical approaches to technical communication, and examining how the field can be advanced by drawing on diverse perspectives. Timely, informed, and practical, Solving Problems in Technical Communication will be an essential tool for undergraduates and graduate students as they begin the transition from classroom to career.

The book covers all the important aspects of research methodology, and addresses the specific requirements of engineering students, such as methods and tools, in detail. It also discusses effective research in engineering today, which requires the ability to undertake literature reviews utilizing different online databases, to attribute credit for any prior work mentioned, to respect intellectual property rights while simultaneously maintaining ethics in research, and much more. Further, the book also considers soft skills like research management and planning, dealing with criticism in research and presentation skills, which are all equally important and need to include in research methodology education. Lastly, it provides the technical knowhow needed to file patents in academia, an important area that is often ignored in research methodology books. The book is a

particularly valuable resource for PhD students in India and South East Asia, as research methodology is a part of their coursework.

Technical communication instructors need professional development opportunities that will aid them in creating their online courses; in developing curricula; and in teaching in what may be a new environment. Although instructors can turn to instructional design teams for assistance in using Learning Management System and its functions, they specifically need their own first-hand, immersive learning within their pedagogical training. In other words, teachers need to learn in an online context like the environment that their students will use; such direct training helps instructors to facilitate student learning in a technologically distributed classroom. Beyond learning technological skills to facilitate a course, these teachers need to learn to use the technology effectively to keep students on track and to teach them skills and material. This collection—which includes three contributions from 2007 and 10 from 2017—focuses on the types of professional development instructors need to be successful in the online technical communication classroom. Formed as a 10-year retrospective of the field and its advances in online education professional development, the book offers instructors theoretical and practical suggestions for creating and teaching successful online courses and managing entire online technical communication programs. This book was originally published as a special issue of *Technical Communication Quarterly* (TCQ). **Practical Strategies for Technical Communication + Launchpad for Practical Strategies for Technical Communication Six-month Access** John Wiley & Sons

What does it mean to be a productive professor in higher education? What would it feel like to have more peace and productivity? To have nothing fall through the cracks? The *Productive Online and Offline Professor* is written for today's busy higher education professional. Through an exploration of what it means to make work meaningful, this book offers practical strategies and tips to support higher education professionals in efficiently managing and effectively using a wide range of technologies and productivity tools. Higher education instructors will find this guide helps them to fulfill their teaching roles with excellence and to build engaging relationships with students while also successfully managing other priorities in their professional and personal lives. The *Productive Online Professor* assists those who teach online and blended courses with managing their personal productivity. Faculty are often expected to provide support and feedback to learners outside of normal work hours in non-traditional classes. Programs that are designed with more asynchronous content may cause faculty to perceive that it is difficult to ever press the "off button" on their teaching. The author offers guidance and suggests software tools for streamlining communication and productivity that enable faculty to better balance their lives while giving rich feedback to students. Part 1 addresses the challenges in defining productivity and presents a working definition for the text. Part 2 describes the ability to communicate using both synchronous and asynchronous methods, along with ways of enriching such communication. Part 3 describes methods for finding, curating, and sharing relevant knowledge both within one's courses and to a broader personal learning network (PLN). Part 4 examines specific tools for navigating the unique challenges of productivity while teaching online. It includes ways to grade more productively while still providing rich feedback to students. Part 5 shares techniques for keeping one's course materials current and relevant in the most efficient ways possible. The *Productive Online Professor* is a practical guide for how to provide high quality online classes to diverse students. This book shares specific technology and other tools that may be used in charting a course toward greater productivity. It is intended to be a professional resource for fulfilling our roles with excellence and joy, while managing other priorities in our personal and professional lives.
