AIYANA KARLEE

[Data Mining for Scientific and Engineering Applications](#) Springer Nature

This book constitutes the refereed proceedings of the 6th International Conference on Intelligent Data Engineering and Automated Learning, IDEAL 2005, held in Brisbane, Australia, in July 2005. The 76 revised full papers presented were carefully reviewed and selected from 167 submissions. The papers are organized in topical sections on data mining and knowledge engineering, learning algorithms and systems, bioinformatics, agent technologies, and financial engineering.

Video Mining Springer Science & Business Media

Welcome to the 2nd International Conference on Image and Video Retrieval, CIVR2003. The goal of CIVR is to illuminate the state of the art in visual information retrieval and to stimulate collaboration between researchers and practitioners. This year we received 110 submissions from 26 countries. Based upon the reviews of at least 3 members of the program committee, 43 papers were accepted for the research track of the conference. First, we would like to thank all of the members of the Program Committee and the additional referees listed below. Their reviews of the submissions played a pivotal role in the quality of the conference. Moreover, we are grateful to Nicu Sebe and Xiang Zhou for helping to organize the review process; Shih-Fu Chang and Alberto del Bimbo for setting up the practitioner track; and Erwin Bakker for editing the proceedings and designing the conference poster. Special thanks go to our keynote and plenary speakers, Nevenka Dimitrova from Philips Research, Ramesh Jain from Georgia Tech, Chris Porter from Getty

Images, and Alan Smeaton from Dublin City University. Furthermore, we wish to acknowledge our sponsors, the Beckman Institute at the University of Illinois at Urbana-Champaign, Tsinghua University, the Institution of Electrical Engineers (IEE), Philips Research, and the Leiden Institute of Advanced Computer Science at Leiden University. Finally, we would like to express our thanks to several people who performed important work related to the organization of the conference: Jennifer Quirk and Catherine Zech for the local organization at the Beckman Institute; Richard Harvey for his help with promotional activity and sponsorship for CIVR2003; and to the organizing committee of the first CIVR for setting up the international mission and structure of the conference.

Foundations of Intelligent Systems Springer Science & Business Media

Transdiagnostic Group Therapy Training and Implementation

provides clinicians with a user-friendly roadmap for delivering a brief, transdiagnostic group therapy that can be used for patients suffering from stress, depression, anxiety, and a range of other related mental health problems. This is supplemented by over an hour of training videos hosted on the book's companion website, visually demonstrating how to effectively implement the therapy. The book introduces the empirical research that has led to a greater emphasis on transdiagnostic treatment approaches, and details how to implement each phase of the therapy, supported by clinical examples to make practical application easier. Presents therapy suitable for a variety of mental health problems Outlines how to adapt therapy for different patient populations Includes Method of Levels transdiagnostic cognitive therapy Features video demonstrations, worksheets, slides, and more on companion website

Image and Video Retrieval Bloomsbury Publishing

This two-volume set LNCS 12792 and 12793 constitutes the refereed proceedings of the Third International Conference on Adaptive Instructional Systems, AIS 2021, held as Part of the 23rd International Conference, HCI International 2021, which took place in July 2021. Due to COVID-19 pandemic the conference was held virtually. The total of 1276 papers and 241 posters included in the 39 HCI 2021 proceedings volumes was carefully reviewed and selected from 5222 submissions. The papers of AIS 2021, Part I, are organized in topical sections named: Conceptual Models and Instructional Approaches for AIS; Designing and Developing AIS; Evaluation of AIS; Adaptation Strategies and Methods in AIS. Chapter "Personalized Mastery Learning Ecosystems: Using Bloom's Four Objects of Change to Drive Learning in Adaptive Instructional Systems" is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Proceedings of the International Conference on Frontiers of Intelligent Computing: Theory and Applications (FICTA) 2013 Springer Science & Business Media

This book constitutes the refereed proceedings of the 9th Pacific Rim International Conference on Artificial Intelligence, PRICAI 2006, held in Guilin, China in August 2006. The book presents 81 revised full papers and 87 revised short papers together with 3 keynote talks. The papers are organized in topical sections on intelligent agents, automated reasoning, machine learning and data mining, natural language processing and speech recognition, computer vision, perception and animation, and more.

Intelligent Tutoring Systems Psychology Press

With the explosion of video and image data available on the Internet, desktops and mobile devices, multimedia search has gained immense importance. Moreover, mining semantics and other useful information from large-scale multimedia data to facilitate online and local multimedia content analysis, search,

and other related applications has also gained an increasing attention from the academia and industry. The rapid increase of multimedia data has brought new challenges to multimedia content analysis and multimedia retrieval, especially in terms of scalability. While on the other hand, large-scale multimedia data has also provided new opportunities to address these challenges and other conventional problems in multimedia analysis. The massive associated metadata, context and social information available on the Internet, desktops and mobile devices, and the large number of grassroots users, are a valuable resource that could be leveraged to solve these difficulties. This is the first reference book on the subject of internet multimedia search and mining and it will be extremely useful for graduates, researchers and working professionals in the field of information technology and multimedia content analysis.

The Feedback Game Macmillan

Learn Prompt Engineering in 2 Hours and Start Boost Efficiency with ChatGPT Learn the basics of prompt engineering and how to use it to Boost Efficiency with ChatGPT, the world's most powerful language model. In this ebook, you will: Understand the basics of how ChatGPT works Learn how to write effective prompts Explore different prompt engineering techniques Practice your skills with hands-on exercises By the end of this ebook, you will be able to: Generate creative text with ChatGPT Use prompt engineering to improve the quality of your results Apply your skills to a variety of tasks, such as writing, translating, and summarizing text Bonus: This ebook includes a chapter on the ChatGPT prompt cheat sheet, which provides a quick reference guide to the most common prompt engineering techniques. This ebook is perfect for: Anyone who wants to learn how to use ChatGPT Developers who want to use prompt engineering to improve their applications Creative writers who want to generate new ideas Learn how to use prompt engineering to unlock the power of ChatGPT and start Boost Efficiency today! Why should you buy this ebook? This ebook is the fastest and easiest way to learn prompt engineering. You will learn from an experienced prompt engineer who has been using ChatGPT for years. The ebook includes a chapter on the ChatGPT prompt cheat sheet, which is a valuable resource for anyone who wants to use prompt engineering. The ebook is available for a low price, making it an affordable way to learn a valuable skill. Don't wait, buy this ebook today and start learning how to use prompt engineering to Boost Efficiency with ChatGPT! **Cooperation in Classification and Data Analysis** Springer Take charge of your career by taking charge of your business relationships and communication skills. We all know how it feels when our colleagues talk about us but not to us. It's frustrating, and it creates tension. When effective communication is missing in the workplace, employees feel like they're working in the dark. Leaders don't have crucial conversations; managers are

frustrated when outcomes are not what they expect; and employees often don't get positive feedback or constructive feedback. Many of us remain passive against poor communication habits and communication barriers, hoping that business communication will miraculously improve--but it won't. Business communication and relationships won't improve without skills and effort. The people you work with can work with you, around you, or against you. How people work with you depends on the business relationships you cultivate. Do your colleagues trust you? Can they speak openly to you when projects and tasks go awry? Do you have effective communication skills? Take charge of your career by eliminating communication barriers and taking charge of your business relationships. Make your work environment less tense and more productive by improving communication skills. Set relationship expectations, work with people how they like to work, and give positive feedback and constructive feedback. In *How to Say Anything to Anyone*, you'll learn how to: - ask for what you want at work - improve communication skills - strengthen all types of working relationships - reduce the gossip and drama in your office - tell people when you're frustrated and have difficult conversations in a way that resonates - take action on your ideas and feelings - get honest positive feedback and constructive feedback on your performance Harley shares the real-life stories of people who have struggled to get what they want at work. With her clear and specific business communication roadmap in hand, Harley enables you to improve communication skills and create the career and business relationships you really want--and keep them.

Machine Learning: ECML 2004 Springer

This book constitutes the refereed proceedings of the 9th International Conference on Intelligent Tutoring Systems, ITS 2008, held in Montreal, Canada, in June 2008. The 63 revised full papers and 61 poster papers presented together with abstracts of 5 keynote talks were carefully reviewed and selected from 207 submissions. The papers are organized in topical sections on emotion and affect, tutor evaluation, student modeling, machine learning, authoring tools, tutor feedback and intervention, data mining, e-learning and Web-based ITS, natural language techniques and dialogue, narrative tutors and games, semantic Web and ontology, cognitive models, and collaboration.

Transdiagnostic Group Therapy Training and Implementation Springer Science & Business Media

This volume contains the papers presented at the Second International Conference on Frontiers in Intelligent Computing: Theory and Applications (FICTA-2013) held during 14-16 November 2013 organized by Bhubaneswar Engineering College (BEC), Bhubaneswar, Odisha, India. It contains 63 papers focusing on application of intelligent techniques which includes evolutionary computation techniques like genetic algorithm, particle swarm optimization techniques, teaching-learning based optimization etc for various engineering applications such as data mining, Fuzzy systems, Machine Intelligence and ANN, Web technologies and Multimedia applications and Intelligent computing and Networking etc.

SIGIR '94 Springer Science & Business Media

This volume contains the papers selected for presentation at the 14th International Symposium on Methodologies for Intelligent Systems, ISMIS 2003, held in Maebashi City, Japan, 28-31 October, 2003. The symposium was organized by the Maebashi Institute of Technology in co-operation with the Japanese Society for Artificial Intelligence. It was sponsored by the Maebashi Institute of Technology, Maebashi Convention Bureau, Maebashi City Government, Gunma Prefecture Government, US AFOSR/AOARD, the Web Intelligence Consortium (Japan), Gunma Information Service Industry Association, and Ryomo Systems Co., Ltd. ISMIS is a conference series that was started in 1986 in Knoxville, Tennessee. Since then it has been held in Charlotte (North Carolina), Knoxville (Tennessee), Turin (Italy), Trondheim (Norway), Warsaw (Poland), Zakopane (Poland), and Lyon (France). The program committee selected the following major areas for ISMIS 2003: active media human-computer interaction, autonomic and evolutionary computation, intelligent agent technology, intelligent information retrieval, intelligent information systems, knowledge representation and integration, knowledge discovery and data mining, logic for artificial intelligence, soft computing, and Web intelligence.

An Interdisciplinary Introduction to Image Processing Springer

Welcome to the proceedings of the 8th European Conference on Computer - sion! Following a very successful ECCV 2002, the response to our call for papers was almost equally strong - 555 papers were submitted. We accepted 41 papers for oral and 149 papers for poster presentation. Several innovations were introduced into the review process. First, the number of program committee members was increased to reduce their review load. We managed to assign to program committee members no more than 12 papers. Second, we adopted a paper ranking system. Program committee members were asked to rank all the papers assigned to them, even those that were reviewed by additional reviewers. Third, we allowed authors to respond to the reviews consolidated in a discussion involving the area chair and the reviewers. Fourth, thereports,thereviews,andtheresponsesweremadeavailabletotheauthorsas well as to the program committee members. Our aim was to provide the authors with maximal feedback and to let the program committee members know how authors reacted to their reviews and how their reviews were or were not reflected in the final decision. Finally, we reduced the length of reviewed papers from 15 to 12 pages.

ThepreparationofECCV2004wentsmoothlythankstotheorganizing committee, the area chairs, the program committee, and the reviewers. We are indebted to Anders Heyden, Mads Nielsen, and Henrik J. Nielsen for passing on ECCV traditions and to Dominique Asselineau from ENST/TSI who kindly provided his GestRFIA conference software. We thank Jan-Olof Eklundh and Andrew Zisserman for encouraging us to organize ECCV 2004 in Prague.

Intelligent Data Engineering and Automated Learning - IDEAL 2005 Cryptoiner Inc

This book constitutes the refereed proceedings of the 11th International Conference on Intelligent Tutoring Systems, ITS 2012, held in Chania, Crete, Greece, in June 2012. The 28 revised full papers, 50 short papers, and 56 posters presented were carefully viewed and selected from 177 submissions. The specific theme of the ITS 2012 conference is co-adaption between technologies and human learning. Besides that, the highly interdisciplinary ITS conferences bring together researchers in computer science, informatics, and artificial intelligence on the one side - and cognitive science, educational psychology, and linguistics on the other side. The papers are organized in topical sections on affect/emotions, affect/signals, games/motivation and design, games/empirical studies, content representation, feedback, non conventional approaches, conceptual content representation, assessment constraints, dialogue, dialogue/questions, learner modeling, learning detection, interaction strategies for games, and empirical studies thereof in general.

ECAI 2008 Morgan Kaufmann

"This book disseminates current information on multimedia retrieval, advancing the field of multimedia databases, and educating the multimedia database community on machine learning techniques for adaptive multimedia retrieval research, design and applications"--Provided by publisher.

DARPA Proceedings Bloomsbury Publishing USA

Advances in technology are making massive data sets common in many scientific disciplines, such as astronomy, medical imaging, bio-informatics, combinatorial chemistry, remote sensing, and physics. To find useful information in these data sets, scientists and engineers are turning to data mining techniques. This book is a collection of papers based on the first two in a series of workshops on mining scientific datasets. It illustrates the diversity of problems and application areas that can benefit from data mining, as well as the issues and challenges that differentiate scientific data mining from its commercial counterpart. While the focus of the book is on mining scientific data, the work is of broader interest as many of the techniques can be applied equally well to data arising in business and web applications. Audience: This work would be an excellent text for students and researchers who are familiar with the basic principles of data mining and want to learn more about the application of data mining to their problem in science or engineering.

Information Sciences 2007 IGI Global

Information retrieval (IR) is becoming an increasingly important area as scientific, business and government organisations take up the notion of "information superhighways" and make available

their full text databases for searching. Containing a selection of 35 papers taken from the 17th Annual SIGIR Conference held in Dublin, Ireland in July 1994, the book addresses basic research and provides an evaluation of information retrieval techniques in applications. Topics covered include text categorisation, indexing, user modelling, IR theory and logic, natural language processing, statistical and probabilistic models of information retrieval systems, routing, passage retrieval, and implementation issues.

Stress Scripting Springer

This book constitutes the thoroughly refereed and extended post-proceedings of the joint European Web Mining Forum, EWMF 2005, and the International Workshop on Knowledge Discovery and Ontologies, KDO 2005, held in association with ECML/PKDD in Porto, Portugal in October 2005. The 10 revised full papers presented together with one invited paper and one particularly fitting contribution from KDO 2004 were carefully selected for inclusion in the book.

PRICAI 2006: Trends in Artificial Intelligence Springer

Radical Candor is the sweet spot between managers who are obnoxiously aggressive on the one side and ruinously empathetic on the other. It is about providing guidance, which involves a mix of praise as well as criticism, delivered to produce better results and help employees develop their skills and boundaries of success. Great bosses have a strong relationship with their employees, and Kim Scott Malone has identified three simple principles for building better relationships with your employees: make it personal, get stuff done, and understand why it matters. Radical Candor offers a guide to those bewildered or exhausted by management, written for bosses and those who manage bosses. Drawing on years of first-hand experience, and distilled clearly to give actionable lessons to the reader, Radical Candor shows how to be successful while retaining your integrity and humanity. Radical Candor is the perfect handbook for those who are looking to find meaning in their job and create an environment where people both love their work, their colleagues and are motivated to strive to ever greater success.

Semantics, Web and Mining Springer

This book constitutes the workshop proceedings of the 15th International Conference on Database Systems for Advanced Applications, DASFAA 2010, held in Tsukuba, Japan, in April 2010. The volume contains six workshops, each focusing on specific research issues that contribute to the main themes of the DASFAA conference: The First International Workshop on Graph Data Management: Techniques and Applications (GDM 2010), The Second International Workshop on Benchmarking of Database Management Systems and Data-Oriented Web Technologies (BenchmarkX'10); The Third International Workshop on Managing Data Quality in Collaborative Information Systems (MCIS2010), The Workshop on Social Networks and Social Media Mining on the Web (SNSMW2010), The Data Intensive eScience Workshop (DIEW 2010), and The Second International Workshop on Ubiquitous Data Management (UDM2010).

Database Systems for Advanced Applications World Scientific

Stress Scripting presents a unique and tested program of stress management. Its basic idea is that writing thought and action scripts for stress situations can enhance effective coping. Comprehensive, scholarly, and very accessible, it is unlike any other stress management book. With a focus on assertiveness training, cognitive restructuring, stress inoculation training, and relaxation, this book is an extremely versatile tool for therapy, workshops, university instruction, business consultation, and self-help groups. Innovative topics include: the link between assertiveness, defense, and coping; the similarity of problem solving and negotiation; relapse prevention; the phases of stress and stress inoculation training coping philosophies; and cognitive-behavioral relaxation training. Divided into four parts, Stress Scripting is carefully designed to be used either in its entirety, or each chapter separately. Part I presents the basic ideas of stress scripting: defense and coping, assertiveness, thinking and stress, cues, reinforcement, and the phases of stress. It concludes with an option to contract for behavior change. Concentrating on behavior change, Part II introduces assertiveness scripts, relapse prevention, problem solving and negotiation, desensitization, and the coping philosophy. Part III presents an optional cognitive-behavioral relaxation training program. Stress Scripting can be integrated with whatever approach the user prefers. Part IV concludes this volume with an extensive series of individual and group exercises.
