Corneal transplantation has been performed with increasing success for more than 100 years. In the last 20 years, standards, outcomes and developments in the field of corneal transplantation and eye banking have been discussed at the annual meetings of the European Eye Bank Association (EEBA) to share and promote good practice and guarantee a high level of safety for the recipients. The EEBA standards for donor selection and eye banking provide professional advice and guidance to eye banks and corneal surgeons. This book highlights the history and development of eye banking and all significant steps

including the donation, processing and distribution of corneas for transplantation. Additional contributions on the sclera, amnion and retinal pigment epithelium provide further insights into ocular surgery and the future potential for transplantation. This book contributes the essentials in eye banking activities for ophthalmologists and eye bankers as well as for regulatory and legislative authorities.

For the Least of My Brethren is the story of St. Michael's Hospital, founded by the Sisters of St. Joseph in 1892 to meet the needs of Toronto's sick poor. Sustained by the

Gospel's assurance "What you have done for the least of My Brethren you have done for Me," a plucky little group of fewer than twenty people – sisters, doctors, and nurses – located in an old Baptist church, laid the foundations for what would grow into a major urban university teaching hospital. The book traces the development to 1992 of the first hospital in Toronto under Roman Catholic auspices, and the first Catholic school of nursing in Canada. Within the context of a not-always-friendly political, social, economic, and religious culture, the author has identified the forces – the people, events, struggles, triumphs, and failures – that have shaped St. Michael's into what it is

today.

Micropropagation is a reliable technology applied commercially worldwide for large-scale plant multiplication, germplasm conservation, pathogen elimination, genetic manipulations and supply of selected plants. In Protocols for Micropropagation of Selected Economically-Important Horticultural Plants, well recognised researchers in the field compile step-wise protocols for rapid plant multiplication of economically-important horticultural species. The book contains 35

chapters, divided into four major sections. The first three sections (Section A, B and C) contain 29 micropropagation protocols of selected fruit and nut species, indoor and outdoor ornamental plants, cut flowers, and vegetables. In addition to the detailed protocols of in vitro shoot initiation, proliferation, root induction and acclimatization, chapters also include detailed information on medium preparation, explant selection and preparation. The six chapters of Section D cover specific reviews on pivotal topics, such as in vitro rejuvenation, synthetic seed technology, thermotherapy and meristem culture in banana, genetic

transformation of pineapple, flower color somaclonal variation in torenia, and cryotherapy of horticultural crops. Moreover, as a part of the highly successful Methods in Molecular Biology series, chapters include introductions to the respective topic, lists of necessary materials, notes, and illustrative photos. Comprehensive and well-written, Protocols for Micropropagation of Selected Economically-Important Horticultural Plants offers a useful resource for horticulturists, researchers, commercial companies, plant propagators, biotechnologists and students interested in micropropagation. By cooking food at temperatures that are far higher than conventional ovens pressure cookers drastically reduce cooking times enabling us to cook in a cheaper, healthier and greener way. Pasta and rice can be made from scratch in less than 10 minutes; thrifty cooks can tenderise flavoursome cheap cuts in just 20 minutes and pulses can be cooked without having to soak them. As a busy working mother,

Guardian writer Catherine Phipps is wholly reliant on her pressure cooker to produce quick and easy one-pot meals for her family. Her authoritative guide is aimed at those who are new to pressure cookers as well as established fans. Alongside recipes ranging from pot-roast chicken and seafood risotto to Boston baked beans, pulled pork sandwiches and Scotch eggs, and even cheesecake and chocolate pots, Catherine offers handy tips on how to adapt conventional recipes for the pressure cooker, safety ideas and a guide to using certain ingredients. With colour photography throughout, this is an indispensable partner

A standalone Without Precedent novel. No strings attached is easier, until love tangles things. Privileged playboy Innes Kent has been unmoored since his regular escort quit on him. Though he's a talented lawyer at a successful firm, without the distractions of a gorgeous man and frequent sex, his mind often wanders in unpleasant directions. For instance, toward his estranged daughter and his many regrets

therein. Charlie is a budding fashion designer, but the need to support his unwell mother has left him scraping to get by. When his cleaning job sends him to a lavish office one desperate night, he's overwhelmed by the excessive luxury he sees, and when Innes catches him thieving, he's at the lawyer's mercy. But Charlie is just the distraction that Innes needs: a proud and determined scrap of a man who challenges him, annoys him, and attracts him all at once. The perfect choice for a personal assistant who won't bore him to tears or run screaming from his bad temper. Working together leads to sleeping together, but they're both too clever to mess up a perfectly

good arrangement by getting feelings involved. Aren't they? The Australian Official Journal of Trademarks

The concept of a 'return to Europe' has been integral to the movement for

Ukrainian national rebirth since the nineteenth century. While the goal of a more fully reformed politics remains elusive, numerous expressions of Ukrainian culture continue to develop in the European spirit. This wide-ranging book explores Ukraine's European cultural connection, especially as it has been reestablished since the country achieved independence in 1991. The contributors discusses many aspects of Ukraine's contemporary culture - history, politics, and religion in Part I; literary culture in Part II; and language, popular culture, and the arts in Part III. What emerges is a fascinating picture of a young country

grappling with its divided past and its colonial heritage, yet asserting its voice and preferences amid the diverse and at times conflicting realities of the contemporary political scene. Europe becomes a powerful point of reference, a measure against which the situation in post-independence Ukraine is gouged and debated. This framework allows for a better understanding of the complexities deeply ingrained in the social fabric of Ukrainian society.

Baby food doesn't have to come in jars, and making your own at home is not difficult. Baby food is strained, puréed or mashed adult food - just a different version of the

food you prepare for yourself. Here are three good reasons to make baby food at home: 1. Knowing what's in it, therefore ensuring healthy and wholesome meals. 2. Tailoring the texture to your baby's preferences. 3. Shaping baby's tastes and helping him/her learn what fresh foods taste like. Whether choosing to make all baby's food at home, or just some of it, the blender is a great way to offer new flavors in a baby-friendly texture. Once a child begins to eat table food, there is always an occasion for a fruit smoothie or a nutritious blended dip. Here's a sampling of the deliciously easy recipes: Six Months and Older: Peach and Pear Bananarama, Melon Madness,

Zucchini and Nectarines, Roasted Vegetable Puree Eight Months and Older: Vegetable Paella, Humus for Beginners, Chicken with Red Peppers and Corn, Beefy Broccoli Nine Months and Older: Lemon Raspberry Yogurt, Over the Top Applesauce, Spinach and Tomatoes with Ricotta, Fisherman's Pie Twelve Months and Older: Orange Banana Smoothie, Very Berry Pears, Broccoli and Cauliflower Melt, Veggie Cream Sauce

All the recipes in Blender Baby Food are accompanied by suggested age guidelines. Also included are lots of great tips for making baby food, storage and freezing guidelines as well as the appropriate way to thaw and

reheat food. Plus, none of the recipes calls for any of the salt, sugar, starches or fillers found in many commercially prepared baby foods. Blender Baby Food helps parents give their baby the best nutritional advantage.

External fixation in Orthopedic traumatology is a textbook that focuses on the use of external fixation in the acute management of patients with serious orthopedic injuries. The book highlights the indications for external fixation and provides an evidenced based guide to both the specialist orthopedic surgeon and the trainee. The manuscript is organised in 15 chapters covering the indications and surgical techniques for pelvis, lower limb and upper limb injuries, including detailed illustrations and clinical photographs that will enable the reader to rapidly visualise the

structure of the construct and to plan the surgery accordingly. More general topics such as damage control orthopedics, the biomechanics of external fixation and medico-legal considerations surrounding the injured patients are also included to provide an overall picture of the Orthopedic trauma patient. The Combined experience of the editors and authors, their involvement in a number of external fixation system designs and their international reputation in the field contribute to making this textbook an essential tool that should be available to all orthopedic surgeons dealing with injured patients.

This book uses a feminist approach to examine the vast amount of material on breast-feeding. Baby milk manufacture is usually seen as the sole cause of the decline in breast-feeding. Using interviews with women the author looks at other dimensions: the sexualization of breasts; the conditions under which infant feeding takes place and professional interventions into mothering. Policy documents and popular breast-feeding books are shown to be preoccupied with getting women to do what they deem natural rather than with women's real needs.
