Touchstone Level 4 Student's Book A
 Touchstone, together with Viewpoint, is a six-level English program based on research from the Cambridge English Corpus. Touchstone Second Edition Full Contact with DVD, Level 4 includes four key components of the Touchstone Second Edition series: Student's Book, Level 4; Workbook, Level 4; Level 4 Video Activity Pages; and Video on DVD.

Widening the Circle of Concern Routledge
 This detailed book is a "how-to" guide to building controlled vocabulary tools, cataloging and indexing cultural materials with terms and names from controlled vocabularies, and using vocabularies in search engines and databases to enhance discovery and retrieval online. Also covered are the following: What are controlled vocabularies and why are they useful? Which vocabularies exist for cataloging art and cultural objects? How should they be integrated in a cataloging system? How should they be used for indexing and for retrieval? How should an institution construct a local authority file? The links in a controlled vocabulary ensure that relationships are defined and maintained for both cataloging and retrieval, clarifying whether a rose window and a Catherine wheel are the same thing, or how pot-metal glass is related to the more general term stained glass. The book provides organizations and individuals with a practical tool for creating and implementing vocabularies as reference tools, sources of documentation, and powerful enhancements for online searching.

Sketches of the History of Man Oxford University Press
 When conducting research in developing countries, an ability to negotiate a bewildering array of cultural and logistical obstacles is essential. *Overseas Research: A Practical Guide* distills essential lessons from scores of students and scholars who have collected data and done fieldwork abroad, including how to prepare for the field, how and where to find funding for one's fieldwork, issues of personal safety and security, and myriad logistical and relational issues. By encouraging researchers to think through the challenges of research before they begin it, *Overseas Research* will help prepare fieldworkers for the practical, logistical, and psychological considerations of very demanding work, help save valuable time, make the most of scarce financial resources, and enhance the quality of the field research. This third edition contains new material on social media, including representation of research subjects/collaborators, students' digital branding and image, and representing universities abroad when posting publicly. It also covers emerging technologies such as solar panels for power in remote locations, new ways of digitally

sending and receiving money, and incorporates more perspectives of women, LGBTQ+ people, and people of color researching abroad. The book will be of interest to overseas fieldworkers, and also to undergraduates in subjects such as anthropology, economics, geography, history, international studies, politics, sociology, and development studies.

Business Driven Action Learning National Geographic Books
 The bestselling author of *Undoing Depression* offers a brain-based guide to permanently ending bad habits Richard O'Connor's bestselling book *Undoing Depression* has become a touchstone in the field, helping thousands of therapists and patients overcome depressive patterns. In *Rewire*, O'Connor expands those ideas, showing how we actually have two brains—a conscious deliberate self and an automatic self that makes most of our decisions—and how we can train the latter to ignore distractions, withstand temptations, and interrupt reflexive, self-sabotaging responses. *Rewire* gives readers a road-map to overcoming the most common self-destructive habits, including procrastination, excessive worrying, internet addiction, overeating, risk-taking, and self-medication, among others. By learning valuable skills and habits—including mindfulness, self-control, confronting fear, and freeing yourself from mindless guilt—we can open ourselves to vastly more successful, productive, and happy lives.

Rewire Palgrave Macmillan
 "Marmodoro's monograph engages with Aristotle's views on a philosophically challenging question regarding perception, which has been central in the history of philosophy and is very much the focus of current debates in a number of philosophical and psychological disciplines: How do we become perceptually aware of objects in the world? Despite the significance of the question, the ways in which ancient philosophers have addressed it have only just begun to be explored. There is a great wealth of insight on this question to be found in Aristotle, regarding our ability to perceive items in our environment, which he develops through his very demanding metaphysics, and Marmodoro explores these insights in depth here. Aristotle's attempts at accounting for our awareness of complex perceptual content were highly original, drawing on and building on the metaphysics he has developed elsewhere in his works, but have not been adequately explored to date"--
Examiner New Press, The
 In the few years since the attack on the World Trade Center on September 11, 2001, evil has become a central theme in the media and human consciousness: the evil of terrorism, the evil of secular culture, concern for poverty, and climate change... Yet different cultures and religious traditions have different ideas of what evil is and what its root causes are. Although there is no massive clash of cultures, many disagreements and also conflicts in the world arise from the deep differences in views of evil. This

volume explores religious views of evil. Scholars from different religions and from various parts of the world describe how people probe the depths of evil—and by necessity that of good—from their own background in various worldviews. In their explorations, almost all address the need to go beyond morality, and beyond legalistic definitions of evil and of good. They point to the radical depths of evil in the world and in human society and reinforce our intuition that there is no easy solution. But if we can gain a better understanding of what people from other worldview traditions and cultures consider evil, we are that much closer to a more peaceful world.

Overseas Research iUniverse
 From the bestselling author of *Blink* and *The Tipping Point*, Malcolm Gladwell's *Outliers: The Story of Success* overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. *Outliers* will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times

 From the author of the wildly popular bestseller *The 7 Habits of Highly Effective Teens* comes the go-to guide that helps teens cope with major challenges they face in their lives—now updated for today's social media age. In this newly revised edition, Sean Covey helps teens figure out how to approach the six major challenges they face: gaining self-esteem, dealing with their parents, making friends, being wise about sex, coping with substances, and succeeding at school and planning a career. Covey understands the pain and confusion that teens and their parents experience in the face of these weighty, life-changing, and common difficulties. He shows readers how to use the 7 Habits to cope with, manage, and ultimately conquer each challenge—and become happier and more productive. Now

updated for the digital and social media age, Covey covers how technology affects these six decisions, keeping the information and advice relevant to today's teenagers.

The Illustrated London News Oxford University Press, USA
Critical theoretical essays, case studies, and manifestos offer insights from diverse contexts and geographies of feminist and queer care ethics. What happens when feminist and queer care ethics are put into curating practice? What happens when the notion of care based on the politics of relatedness, interdependence, reciprocity, and response-ability informs the practices of curating? Delivered through critical theoretical essays, practice-informed case studies, and manifestos, the essays in this book offer insights from diverse contexts and geographies. These texts examine a year-long program at Schwules Museum Berlin focused on the perspectives of women, lesbian, inter, non-binary and trans people at Schwules Museum Berlin; the formation of the Queer Trans Intersex People of Colour Narratives Collective in Brighton; Métis Kitchen Table Talks, organized around indigenous knowledge practices in Canada; complex navigations of motherhood and censorship in China; the rethinking of institutions together with First Nations artists in Melbourne; the reanimation of collectivity in immigrant and diasporic contexts in welfare state spaces in Vienna and Stockholm; struggles against Japanese vagina censorship; and an imagined museum of care for Rojava. Strategies include crippling and decolonizing as well as emergent forms of digital caring labor, including curating, hacking, and organizing online drag parties for pandemic times. Contributors Nataša Bachelez-Petrešin, Edna Bonhomme, Birgit Bosold, Imayna Caceres, Pèdra Costa, COVEN BERLIN, Nika Dubrovsky, Lena Fritsch, Vanessa Gravenor, Julia Hartmann, Hitomi Hasegawa, Vera Hofmann, Hana Janečková, Klare: Agnieszka Habraschka and Mia von Matt, Gilly Karjevsky, Elke Krasny, Chantal Küng, Sophie Lingg, Claudia Lomoschitz, Cathy Mattes, Elizaveta Mhaili, Jelena Micić, Carlota Mir, Fabio Otti, Ven Paldano, Nina Prader, Lesia Prokopenko, Patricia J. Reis, Elif Sarican, Rosario Talevi, Amelia Wallin, Verena Melgarejo Weinandt, Stefanie Wuschitz.

Touchstone, together with Viewpoint, is a six-level English program based on research from the Cambridge English Corpus. Touchstone uses a corpus-informed syllabus ensuring students are learning the language that people really use. Activities include a strong focus on inductive learning, personalized practice, and encouraging learner autonomy. Student's Book, Level 4A includes Units 1-6 of the Level 4 Student's Book and is at the intermediate CEFR level (B1-B2).

The Femicide Machine University of Hawaii Press

Appointed by the Board of Trustees of the Unitarian Universalist Association of Congregations in 2017, the UUA Commission on Institutional Change served through June 2020. Widening the Circle of Concern: Report of the UUA Commission on Institutional Change represents the culmination of the Commission's work analyzing structural and systemic racism and white supremacy culture within Unitarian Universalism and makes recommendations to advance long-term cultural and institutional change that redeems the essential promise and ideals of Unitarian Universalism. The members and staff of the UUA Commission on Institutional Change were Chair Rev. Leslie Takahashi, Mary Byron, Cir L'Bert Jr., Rev. Dr. Natalie Fenimore, Dr. Elías Ortega, Caitlin Breedlove, DeReau K. Farrar, and Project Manager Rev. Marcus Fogliano.

Radicalizing Care Unitarian Universalist Association of Congregations

The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations

to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

Introduction to Controlled Vocabularies BRILL

Conventional wisdom traces Tarot cards to medieval Italy, but their roots go back much further in time and draw on a surprisingly rich variety of cultures and spiritual traditions. Combining pioneering scholarship with practical spiritual instruction, *Origins of the Tarot* is the first book to unveil the full range of the ancient streams of wisdom from which the Tarot emerged. The timeless principles of conscious realization and cosmological unfoldment underlying the Tarot have never been explored in a comparably extensive and detailed way: herein the teachings of a tremendous range of traditions, including Kabbalah, Western esotericism and alchemy, Buddhism, Taoism, yogic disciplines, Sufism, mystical Christianity, Gnosticism, and Neoplatonism, are masterfully incorporated and synthesized. Author Dai Léon explores a confluence of philosophical schools from East and West as they relate to the Tarot, giving each its due in the exposition of a universal procession of evolution and the soul's quest for enlightenment. In the process, the Tarot is seen as a unique exemplification of perennial teachings on the soul and its liberation, as well as a still-unfolding window into concealed currents of human history. The book's profound learning and unprecedented range of references are sure to attract close study among students both of the world's most enduring esoteric tradition and of esotericism itself.

During the Cold War, freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA's] activities between

1947 and 1967" by the New York Times, the book presents shocking evidence of the CIA's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is "a real contribution to popular understanding of the postwar period" (*The Wall Street Journal*), and its story of covert cultural efforts to win hearts and minds continues to be relevant today.

The Cumulative Book Index Simon and Schuster

This groundbreaking study explores the later lives and late-life writings of more than two dozen British women authors active during the long eighteenth century. Drawing on biographical materials, literary texts, and reception histories, Devoney Looser finds that far from fading into moribund old age, female literary greats such as Anna Letitia Barbauld, Frances Burney, Maria Edgeworth, Catharine Macaulay, Hester Lynch Piozzi, and Jane Porter toiled for decades after they achieved acclaim -- despite seemingly concerted attempts by literary gatekeepers to marginalize their later contributions. Though these remarkable women wrote and published well into old age, Looser sees in their late careers the necessity of choosing among several different paths. These included receding into the background as authors of "classics," adapting to grandmotherly standards of behavior, attempting to reshape masculinized conceptions of aged wisdom, or trying to create entirely new categories for older women writers. In assessing how these writers affected and were affected by the culture in which they lived, and in examining their varied reactions to the prospect of aging, Looser constructs careful portraits of each of her Subjects and explains why many turned toward retrospection in their later works. In illuminating the powerful and often poorly recognized legacy of the British women writers who spurred a marketplace revolution in their earlier years only to find unanticipated barriers to acceptance in later life, Looser opens up new scholarly territory in the burgeoning field of feminist age studies.

The Psychology of Experiencing Penguin UK

We live in a world that offers many possible futures. The ever-expanding complexity of information and knowledge provide many choices for decision-makers, and we are all making decisions every single day! As the problems and messes of the world become more complex, our decision consequences are more and more difficult to anticipate, and our decision-making processes must change to keep up with this world complexification. This book takes a consilience approach to explore decision-making in The New Reality, fully engaging systems and complexity theory, knowledge research, and recent neuroscience findings. It also presents methodologies for decision-makers to tap into their unconscious, accessing tacit knowledge resources and increasingly relying on the sense of knowing that is available to each of us. Almost every day new energies are erupting around the world: new thoughts, new feelings, new knowing, all contributing to new situations that require new decisions and actions from each and every one of us. Indeed, with the rise of the Net Generation and social media, a global consciousness may well be emerging. As individuals and organizations we are realizing that there are larger resources available to us, and that, as complex adaptive systems linked to a flowing fount of knowing, we can bring these resources to bear to achieve our ever-expanding vision of the future. Are we up to the challenge?
