A world renowned anthropologist explores the nonverbal signs, signals, and cues human beings exchange to attract and keep their mates. As a medium of communication, Love's silent language predates speech by millions of years. Today, we still express emotions and feelings largely apart from words. The postures, gestures, and facial cues of attraction are universal, in all societies and cultures. According to Dr. Givens, courtship moves slowly through five distinct phases: attracting attention, recognition phase, conversation phase, touching phase, making love. Since potential mates "test" each other before uniting as one, courtship is a choreographed give and take of signs granting physical and emotional closeness. Love Signals is part ethnography and part how-to. Dr. Givens documents the little courting rituals witnessed in elevators, on subways, and in the workplace. He examines the essential role the face plays in courtship and how it can be optimally displayed. He decodes the body to find silent messages given off by shoulders, neck, arms, hands, waist, calves, ankles, feet, and toes. Dr. Givens analyzes expressive shapes, colors, and markings encoded in arm wear, shoulder wear, leg wear, and shoes. He deciphers the background messages of spaces, places and interiors to learn how environs help or hinder in the meeting process. Chemical cues emanating from aromas, tastes, steroids, sterols, and hormones strongly shape a partner's feelings, so they are explored as well. The book suggests ways to gaze, ways to read eyes across a room, and ways to sit, stand, align, walk dress, and lift a drink to

participate in the fascinating adventure of finding, winning, and keeping a mate. Knowing the unspoken vocabulary of love signals will give readers an edge. What this means for courtship is that the reader becomes able to read unspoken motives, emotions, and feelings with great clarity and precision. The more readers know about the nonverbal idiom of attraction, the more likely they will find a loving, lasting partner.

Wall Street Journal bestseller! For anyone who wants to be heard at work, earn that overdue promotion, or win more clients, deals, and projects, the bestselling author of *Captivate*, Vanessa Van Edwards, shares her advanced guide to improving professional relationships through the power of cues. What makes someone charismatic? Why do some captivate a room, while others have trouble managing a small meeting? What makes some ideas spread, while other good ones fall by the wayside? If you have ever been interrupted in meetings, overlooked for career opportunities or had your ideas ignored, your cues may be the problem – and the solution. Cues – the tiny signals we send to others 24/7 through our body language, facial expressions, word choice, and vocal inflection – have a massive impact on how we, and our ideas, come across. Our cues can either enhance our message or undermine it. In this entertaining and accessible guide to the hidden language of cues, Vanessa Van Edwards teaches you how to convey power, trust, leadership, likeability, and charisma in every interaction. You’ll learn: • Which body language cues assert, “I’m a leader, and here’s why you should join me.” • Which vocal cues make you sound more confident • Which verbal cues to use in your résumé, branding, and emails to increase trust (and generate excitement about interacting with you.) • Which visual cues you are sending in your profile pictures, clothing, and professional brand. Whether you're pitching an investment, negotiating a job offer, or having a tough conversation with a colleague, cues can help you improve your relationships, express empathy, and create meaningful connections with lasting impact. This is an indispensable guide for entrepreneurs, team leaders, young professionals, and anyone who wants to be more influential.

A guide for using body language to lead more effectively Aspiring and seasoned leaders have been trained to manage their leadership communication in many important ways. And yet, all their efforts to communicate effectively can be derailed by even the smallest nonverbal gestures such as the way they sit in a business meeting, or stand at the podium at a speaking engagement. In *The Silent Language of Leaders*, Goman explains that personal space, physical gestures, posture, facial expressions, and eye contact communicate louder than words and, thus, can be used strategically to help leaders manage, motivate, lead global teams, and communicate clearly in the digital age. Draws on compelling psychological and neuroscience research to show leaders how to adjust their body language for maximum effect. Stands out as the only book to address specifically how leaders can use body language to increase their effectiveness Goman, a respected management coach, is widely considered as the expert in body language issues in the workplace *The Silent Language of Leaders* will show readers how to take advantage of the most underused skills in the leadership toolkit—nonverbal skills—to improve their credibility and stay ahead of the curve.

In the first book to study the short film using the yin yang complementarity, Raskin proposes a new paradigm—describing major forms of yin and yang, redefined as ungendered, freed of patriarchal bias. Yin evokes such properties as holding back and an openness to interpretation while yang promotes structure, causality, and control. Ten exemplary short films show how the model illuminates their storytelling. Features richly illustrated, shot-by-shot breakdowns—many in color—and links. "Richard Raskin changed my way of thinking about short films twenty years ago with his marvelous book *The Art of the Short Fiction Film*. And now he manages to do it again! *The Yin and Yang of Short Film Storytelling* offers a totally new approach to analyzing and making short films. This beautifully written book is fascinating to read and gives valuable tools as well as enormous inspiration to all short film lovers, whether film makers or film researchers. Don't miss this big little pearl!" — Saara Cantell, Film Director, Script Writer, Doctor of Arts (Finland) "Short films are the laboratory of cinema. And no one is more comfortable in this laboratory than Richard Raskin. His book gives an entirely new and fresh approach to creating short films. Think different! Read it, study these ten case studies, and enter an entirely new

and original way of shaping shorts armed with the advice of the master of short filmmaking." — Elliot Grove, Founder Raindance Film Festival and British Independent Film Awards "Richard Raskin is a world-renowned scholar and filmmaker whose work has been foundational in bringing attention and respect to short films. His brilliant new book promises to be another touchstone that inspires shorts enthusiasts, scholars, and filmmakers. With its beautifully curated selection of ten "case study" films, it provides an original and fascinating framework that conveys the richness and depth that one can bring to the appreciation - and making - of short form media." — Cynthia Felando, Editor of Short Film Studies and Senior Lecturer, University of California, Santa Barbara "Raskin's book is a must-read for any film-lover or scholar of film and literature. In this wonderfully lucid and creative work, the central concepts and thesis are carefully spelled out, brilliantly applied, and made truly illuminating. Raskin has also stripped the yin-yang distinction of its sexist pitfalls in a way that enhances its utility and appeal. The book is destined to be a classic!" — Andrew Effrat, former Dean of Education, University of Massachusetts, Amherst "This is a fascinating read. Raskin has taken his encyclopedic knowledge of short films and created a tool, an analytical system, to help illuminate what makes a short film successful. I love that it's a tool that can be applied to almost any piece of art for that matter." — David Greenspan, Palme d'Or for Best Short Film at Cannes in 2001; directed or edited numerous episodes of *Grey's Anatomy*, *Station 19*, and other TV series
