The story of HDFC Bank.

Intertwined Lives New

Press, The

Nearly four decades ago,

Dilip Hiro's *Inside India*

Today, banned by Indira

Gandhi's government,

was acclaimed by *The*

Guardian as simply "the

best book on India." Now Hiro returns to his native country to chronicle the impact of the dramatic economic liberalization that began in 1991, which ushered India into the era of globalization. Hiro describes how India has been reengineered not only in its economy but also in its politics and cultural mores. Places such as Gurgaon and Noida on the outskirts of Delhi have been

transformed from nondescript towns into forests of expensive high-rise residential and commercial properties. Businessmen in Bollywood movies, once portrayed as villains, are now often the heroes. The marginal, right-wing Hindu militants of the past now rule the nominally secular nation, with Prime Minister Narendra Modi as their avatar, one whose electoral victory was

funded by big business. Hiro provides a gripping account of the role played by Indians who have settled in the United States and Britain since 1991 in boosting India's GDP. But he also highlights the negatives: the exponential growth in sleaze in the public and private sectors, the impoverishment of farmers, and the rise in urban slums. A masterful panorama, *The Age of Aspiration* covers the whole social spectrum of Indians at home and abroad.

When a person dies, the *Aware 2* study says, it is not death in the real sense. The first ten minutes are crucial. It is temporary death and is known as the Transformative Experience of Death when there is no pulse, no breathing, and no movement. The cells of the body are not dead. The cells have all kinds of food available to them-be it oxygen or nutrition. The brain cells are alive for up to four minutes, and these

minutes are known as the Grey Zone. The Grey zone is uncertain. It is in these four minutes; you have a chance to bring back a life!

FEATURES EXCLUSIVE INTERVIEW with SUBRATA ROY EVERYTHING YOU WANTED TO KNOW ABOUT SUBRATA ROY AND SAHARA INDIA PARIWAR, BUT WERE AFRAID TO ASK... Sahara: The Untold Story is based on painstaking research

to demystify India's most secretive and largely unlisted conglomerate, the Sahara India Pariwar. It also delves into the group's ongoing legal battle with the market regulator. Entrepreneur Subrata Roy, the guardian angel of the group, whose feet are touched by everybody in the Pariwar, wants to reach out to a million lives and feels impeded and shuttered in by regulations. So the clash with the regulators was inevitable. But when a regulator slams one door, maverick Roy opens

another. This play has been on since 1978, when Sahara was set up. Roy is well known for glamour and his association with film stars, cricketers and politicians. He exudes patriotism, with a statue of Bharat Mata (the presiding deity of the group) on a chariot driven by four fierce-looking lions adorning his headquarters in Lucknow. He is the Robin Hood of a country where only 35% of the adult population has access to formal banking services. This India and its millions of illiterate poor

depositors stand in awe and admiration of him. But does he also exploit them? Do these poor people actually keep money with him or are they fronting for others? EXCERPT FROM THE SAHARA INDIA PARIWAR DISCLAIMER 'The book at best can be treated as a perspective of the author with all its defamatory content, insinuation and other objections, which prompted us to exercise our right to approach the court of law in order to save the interest of the organization and its

crores of depositors and 12 lakh workers.’ Tamal Bandyopadhyay, a deputy managing editor of Mint, is one of the most respected business journalists in India. Tamal has kept a close watch of the financial sector for over a decade and a half and has had a ringside view of the enormous changes in Indian finance and banking over this period. His first book, *A Bank for the Buck*, released by P Chidambaram in November 2012, has been a non-fiction bestseller.

The Happiness Trail

Harper Collins
An insider's view of Pakistan's vicissitudes over the last two decades, by the former head of the country's renowned intelligence agency. Oxford University Press
Travelling in the twenty-first century is not only about check-ins, posting selfies or writing status messages with hashtags. It is about the visiting places one may have only read about, seen in movies or heard about; it's about standing on a landmark and feeling

something; it's about refreshing memories and making new memories. Every Mile a Memory is not only a travelogue about monuments and landscapes. It is not only about famous cities like London, Paris and Rome, but it is also about a solitary walk on a village road on English countryside, about quiet boat-ride on the Ganga and about long train journeys to nowhere. It is sipping a cup of coffee in a café in Barcelona and yet it is also about

enjoying chai from a kulhad on some half-forgotten railway station in Indian hinterland. As Partha Sarthi Sen Sharma travels a round the globe and his own motherland, all the events, sights, thoughts, memories and feelings form a complex kaleidoscope, which eventually crystallizes into words to give a unique perspective on places - Britain, continental Europe, Turkey, Morocco and of course, India.

Narrative and Numbers
Hassell Street Press

How can a company that has never turned a profit have a multibillion dollar valuation? Why do some start-ups attract large investments while others do not? Aswath Damodaran, finance professor and experienced investor, argues that the power of story drives corporate value, adding substance to numbers and persuading even cautious investors to take risks. In business, there are the storytellers who spin compelling narratives and the number-crunchers

who construct meaningful models and accounts. Both are essential to success, but only by combining the two, Damodaran argues, can a business deliver and sustain value. Through a range of case studies, *Narrative and Numbers* describes how storytellers can better incorporate and narrate numbers and how number-crunchers can calculate more imaginative models that withstand scrutiny. Damodaran considers Uber's debut and how narrative is key to

understanding different valuations. He investigates why Twitter and Facebook were valued in the billions of dollars at their public offerings, and why one (Twitter) has stagnated while the other (Facebook) has grown. Damodaran also looks at more established business models such as Apple and Amazon to demonstrate how a company's history can both enrich and constrain its narrative. And through Vale, a global Brazil-based mining company, he shows the

influence of external narrative, and how country, commodity, and currency can shape a company's story. Narrative and Numbers reveals the benefits, challenges, and pitfalls of weaving narratives around numbers and how one can best test a story's plausibility.

The Ultimate Goal

Columbia University Press We live in a fast-paced and highly competitive world. The last few years have seen changes not witnessed in centuries. Have all these

developments increased our sense of well-being? Data seems to suggest otherwise! The Happiness Trail shows us an attainable, contextual way to achieve two seemingly complementary goals, happiness and success, that we many a time discover to be contradictory. In this book Ramesh Venkateswaran lays down five easy-to-follow approaches to a happy and successful life, which he calls the five I's: Integrity, Interact, Involve, Imbibe and Impact. Armed with this road map, the

ever-elusive happiness seems within reach and success a natural consequence.

The Journey of Partition itself -- after Partition. The Partition of British India and the subsequent creation of two antagonist countries is a phenomenon that we are still trying to comprehend. Millions displaced, thousands slaughtered, families divided and redefined, as home became alien land and

the unknown became home. So much has been said about it but there is still no writer, storyteller or poet who has been able to explain the madness of Partition. Using the oral narratives of four generations of people -- mainly Pakistanis but also some Indians -- Anam Zakaria, a Pakistani researcher, attempts to understand how the perception of Partition and the 'other' has evolved over the years. Common sense dictates that the bitter memories of Partition would now be

forgotten and new relationships would have been forged over the years, but that is not always the case. The memories of Partition have been repackaged through state narratives, and attitudes have only hardened over the years. Post-Partition events -- wars, religious extremism, terrorism -- have left new imprints on 1947. This book documents the journey of Partition itself - - after Partition. "Maria Toorpakai is a true inspiration, a pioneer for millions of other women struggling to pave their own paths to autonomy, fulfillment, and genuine personhood." --Khaled Hosseini, author of *The Kite Runner*, *A Thousand Splendid Suns*, and *And the Mountains Echoed*
Maria Toorpakai hails from Pakistan's violently oppressive northwest tribal region, where the idea of women playing sports is considered haram-un-Islamic-forbidden-and girls rarely leave their homes. But

she did, passing as a boy in order to play the sports she loved, thus becoming a lightning rod of freedom in her country's fierce battle over women's rights. A Different Kind of Daughter tells of Maria's harrowing journey to play the sport she knew was her destiny, first living as a boy and roaming the violent back alleys of the frontier city of Peshawar, rising to become the number one female squash player in Pakistan. For Maria, squash was more than liberation-it was salvation. But it was

also a death sentence, thrusting her into the national spotlight and the crosshairs of the Taliban, who wanted Maria and her family dead. Maria knew her only chance of survival was to flee the country. Enter Jonathon Power, the first North American to earn the title of top squash player in the world, and the only person to heed Maria's plea for help. Recognizing her determination and talent, Jonathon invited Maria to train and compete internationally in Canada. After years of

living on the run from the Taliban, Maria packed up and left the only place she had ever known to move halfway across the globe and pursue her dream. Now Maria is well on the way to becoming a world champion as she continues to be a voice for oppressed women everywhere.

The Footprints of Partition PartridgeIndia After India achieved independence from the British in 1947, there remained five scattered territories governed by the French imperial state. It was not until 1962 that France fully relinquished control. Once decolonization took hold across the subcontinent, Western-led ashrams and utopian communities

remained in and around the former French territory of Pondicherry—most notably the Sri Aurobindo Ashram and the Auroville experimental township, which continue to thrive and draw tourists today. *Unsettling Utopia* presents a new account of the history of twentieth-century French India to show how colonial projects persisted beyond formal decolonization. Through the experience of the French territories, Jessica Namakkal recasts the relationships among

colonization, settlement, postcolonial sovereignty, utopianism, and liberation, considering questions of borders, exile, violence, and citizenship from the margins. She demonstrates how state-sponsored decolonization—the bureaucratic process of transferring governance from an imperial state to a postcolonial state—rarely aligned with local desires. *Namakkal* examines the colonial histories of the Aurobindo Ashram and Auroville,

arguing that their continued success shows how decolonization paradoxically opened new spaces of settlement, perpetuating imperial power. Challenging conventional markers of the boundaries of the colonial era as well as nationalist narratives, *Unsettling Utopia* sheds new light on the legacies of colonialism and offers bold thinking on what decolonization might yet mean.

From the Cypriot fourth division to the Indian national team, Stephen Constantine's career has taken the scenic route. Ever since leaving his home in Cyprus with nothing at the age of 16, Constantine has been used to life on the road; his sense of adventure dwarfed only by his appetite to improve and develop those he works with. That yearning for fresh experience has inevitably led Constantine into a host of unique situations. He has hugged a pitch- invading prince in

Kathmandu. He has been threatened with kidnap in Khartoum. He has seen the Millwall chairman tip £10,000 onto the changing room floor, and he has watched his goalkeeping coach attack a pitch invader in Congo. Many in the game allege to have seen it all, but there is no one with a better claim to such a statement than Constantine, a veteran manager of six different national sides across four continents. But 'From Delhi to the Den' isn't simply a tale of one man

planning his next coaching expedition in another far-flung corner of the world. Constantine explores the pressures of paying the mortgage when most jobs don't last 12 months, and the solitude of life on the road when your wife and children still reside thousands of miles away. We hear of how qualifications are trumped by reputations, and why dealing with Football Associations isn't exactly plain-sailing, especially with governmental interference.

Constantine's journey -- for the time being, anyway -- ends up India, where he is looking to stir the passions and enhance the professionalism of Asia's sleeping giant. Progress has already been achieved, but nothing is finished yet. Anyone interested in football, travel, or adventure will love this book. *Business India* Penguin Enterprise In DEMAND: Giving People What They Love Before They Know They Want It (Crown Business; October 2011), Adrian Slywotzky,

named by Industry Week one of the world's six most influential management thinkers, provides a radically new way to think about demand, with a big idea and a host of practical applications—not just for people in business but also for social activists, governments leaders, non-profit managers, and other would-be innovators. They all need to master such ground-breaking concepts as the hassle map (and the secrets of fixing it); the curse of the incomplete

product (and how to avoid it); why very good ≠ magnetic; how what you don't see can make or break a product; the art of transforming fence sitters into customers; why there's no such thing as an average customer; and why real demand comes from a 45-degree angle of improvement (rather than the five degrees most organizations manage).

Unsettling Utopia

Harper Collins

This is the first definitive biography of arguably India's most influential and powerful civil servant: P.N. Haksar, Indira Gandhi's alter ego during her period of glory.

Educated in the sciences and trained in law, Haksar was a diplomat by profession and a communist-turned-democratic socialist by conviction. He had known Indira Gandhi from their student days in London in the late-1930s, even

though family links predated this friendship. They kept in touch, and in May 1967, she plucked him out of his diplomatic career and appointed him secretary in the prime minister's Secretariat. This is when he emerged as her ideological beacon and moral compass, playing a pivotal role in her much-heralded achievements including the nationalization of banks, abolition of privy purses and princely privileges, the Indo-Soviet Treaty, the creation of Bangladesh,

rapprochement with Sheikh Abdullah, the Simla and New Delhi Agreements with Pakistan, the emergence of the country as an agricultural, space and nuclear power and, later, the integration of Sikkim with India. This power and influence notwithstanding, Haksar chose to walk away from Indira Gandhi in January 1973. She, however, persuaded him to soon return, first as her special envoy and later as deputy chairman of the Planning Commission where he left his

distinctive imprint. Exiting government once and for all in May 1977, he then continued to be associated with a number of academic institutions and became the patron for various national causes like protecting India's secular traditions, propagating of a scientific temper, strengthening the public sector and deepening technological self-reliance. Successive prime ministers sought his counsel and in May 1987, he initiated the reconstruction of India's relations with China. He

remained an unrepentant Marxist and one of India's most respected elder statesman and leading public figures till his death in November 1998. Drawing on Haksar's extensive archives of official papers, memos, notes and letters, Jairam Ramesh presents a compelling chronicle of the life and times of a truly remarkable personality who decisively shaped the nation's political and economic history in the 1960s and 1970s that continues to have relevance for

today's India as well.
Written in Ramesh's

inimitable style, this work
of formidable scholarship
brings to life a man who is

fast becoming a victim of
collective amnesia.
