creates an  
unforgettable  
children's  
classic. Otis is  
a special  
tractor. He  
loves his  
farmer and he  
loves to work.  
And he loves  
the little calf

in the next  
stall, whom he  
purrs to sleep  
with his soft  
motor. In fact,  
the two  
become great  
friends: they  
play in the  
fields, leap  
hay bales, and  
play ring-  
around-the-  
rosy by Mud  
Pond. But  
when Otis is  
replaced with  
the big yellow  
tractor, he is  
cast away  
behind the  
barn, unused,  
unnoticed . . .  
until the little  
calf gets stuck  
in Mud Pond.  
Then there is  
only one  
tractor—and  
it's not big or  
yellow—who  
can come to

the rescue. It is little old Otis who saves his friend. It is Otis who saves the day. In a wonderful new palette, and in the tradition of classics like Mike Mulligan and His Steam Shovel and The Story of Ferdinand, Loren Long has crafted an unforgettable new story—and character—celebrating the power of friendship and perseverance.

If you're a parent, witnessing your child fail to articulate himself can be heartbreaking. It's not easy to see your child struggle with simple speech, unable to express how hungry he is, or to articulate his emotions when he's sad or angry. The inability for a child to say what he wants can be stressful for both child and parent. It's crucial to have your child's condition diagnosed as

early as possible, and to start treatment right away. But what if I told you that there is something you can do to help too? This book includes a plethora of speech therapy exercises that parents can practice with children suffering from articulation or phonological disorder to help improve their child's speech. It starts off by helping you to better understand your child's condition and

the underlying cause for the disorder. Once you've identified the root cause, then treatment and therapy can begin. The exercises provided in this book are designed to be fun and interactive so as to get your child interested and eager to participate.

The Speech-language

Pathologist in Home Health Care Tandem Speech Therapy, PLLC International humanitarian efforts in cleft palate care often lack follow-up support for speech deficits. Ten Spanish speaking participants in Tijuana Mexico, age 3-12, with cleft palate were randomly assigned to a home speech program or a home speech program with additional weekly telesupport.

Speech

production was measured before an eight-week home treatment program and after treatment to determine the effectiveness of adding telesupport to a parent-implemented articulation approach. Age was significantly related to amount of time practiced, with older participants practicing more at home, with marginally increased practice for older students

provided telesupport. There were no significant differences in speech production between the two treatment groups, yet the parent report was positive. Parents in the telesupport group were more comfortable with therapy implementation. Possible reasons for lack of phonemic outcomes are explored, as well as the potential that telesupport holds for treating cleft palate speech

in children with limited access to resources, such as trained speech-language pathologists.

Use Storybooks to Reduce Planning Time Easily Work in Groups Simultaneously Target Communication and Academic Goals Storybooks provide a platform to address academic needs and therapeutic goals simultaneously while accounting for social and cultural factors. This book is over 200 pages of templates, activity ideas, and materials you need to powerfully change how students tell stories. We all love using storybooks in intervention but the question is: How do we do use them effectively? Literacy-Based Speech and Language Therapy Activities makes improving your therapy and reducing your planning time a reality. This 200-page book is full of templates, explanations, and examples for you to experience the same success we do with our busy, diverse caseloads. Section 1 highlights The Research Behind Why Literacy-Based Intervention Works so well. In Section 2 we learn how to decide if language difficulties are due to an impairment, second-language influence, or cultural difference. After reading Section 3, you will be able to take any activity including your favorite storybook and design therapy that

will last for several weeks. We provide pre-, during, and post-reading explanations and activities to assist in making your literacy-based intervention applicable to all age groups and disorder classes. Taking data and measuring progress are some of the most difficult things to do well. In Section 4, we walk step-by-step through a child's story to see what is present or missing, and how to write

concrete, measurable goals. Section 5 is 50 pages of easily reproducible templates to be used individually or in groups. Lastly, in Section 6, we harness the power of high engagement and make Incredible Games that Match Story Content. And a bonus! We end this book listing some of the best storybooks for intervention that are divided by age, grade, topic, and goals. Principles and

Addison Wesley Children, particularly those on the autism spectrum, are able to acquire communication skills much more easily when their learning incorporates movement. Even very simple actions such as tapping and hand clapping can have a noticeable impact on their speech and language development.

Speech in

Action is an innovative approach to learning that combines simple techniques from speech and language pathology with physical exercises that have been carefully designed to meet the individual child's particular needs and abilities. This practical workbook describes the approach, and how it works, and contains 90 fully-photocopiable lesson plans packed with fun and

creative ideas for getting both mouth and body moving. Suitable for use either at school or at home, the activities can be dipped into in any order, and are organised by level of ability, with something for everyone. The

final chapter contains the success stories of children the authors have used the activities with, demonstrating how the approach can be used in practice. This will be a useful resource for teachers,

occupational therapists, and other professionals who work with children with delayed communication skills, as well as parents and carers who would like to support their child's speech and language development at home.
