Can she finally stop running? Horse trainer Shelby Doucette never bothers to unpack her bags. With no roots, no ties and no fixed address but her granddad's old sedan, she's avoided emotional connections, and eluded her past, for fourteen years. Get in, do the job, get out. That's always been her way. Until she meets Jake. Widower Jake Cameron is unlike any man she's ever known, but that doesn't mean he can be trusted. He has a way of sneaking through her defenses, a way of making her want to stay for good. But being with Jake would mean finally facing her past. And heading directly into the storm...

Updating recommendations last made by the National Research Council in the mid-1980s, this report provides nutrient recommendations based on physical activity and stage in life, major factors that influence nutrient needs. It looks at how nutrients are metabolized in the bodies of dogs and cats, indications of nutrient deficiency, and diseases related to poor nutrition. The report provides a valuable resource for industry professionals formulating diets, scientists setting research agendas, government officials developing regulations for pet food labeling, and as a university textbook for dog and cat nutrition. It can also guide pet owners feeding decisions for their pets with information on specific nutrient needs, characteristics of different types of pet foods, and factors to consider when feeding cats and dogs.

Great Danes Are the Best! Dogwise Publishing

#1 New York Times Bestseller In this pathbreaking guide, two of the world's most popular and trusted pet care advocates reveal new science to teach us how to delay aging and provide a long, happy, healthy life for our canine companions. Like their human counterparts, dogs have been getting sicker and dying prematurely over the past few decades. Why? Scientists are beginning to understand that the chronic diseases afflicting humans—cancer, obesity, diabetes, organ degeneration, and autoimmune disorders—also beset canines. As a result, our beloved companions are vexed with preventable health problems throughout much of their lives and suffer shorter life spans. Because our pets can't make health and lifestyle decisions for themselves, it's up to pet parents to make smart, science-backed choices for lasting vitality and health. *The Forever Dog* gives us the practical, proven tools to protect our loyal four-legged companions. Rodney Habib and Karen Becker, DVM, globetrotted (pre-pandemic) to galvanize the best wisdom from top geneticists, microbiologists, and longevity researchers; they also interviewed people whose dogs have lived into their 20s and even 30s. The result is this unprecedented and comprehensive guide, filled with surprising information, invaluable advice, and inspiring stories about dogs and the people who love them. *The Forever Dog* prescriptive plan focuses on diet and nutrition, movement, environmental exposures, and stress reduction, and can be tailored to the genetic predisposition of particular breeds or mixes. The authors discuss various types of food—including what the commercial manufacturers don't want us to know—and offer recipes, easy solutions, and tips for making sure our dogs obtain the nutrients they need. Habib and Dr. Becker also explore how external factors we often don't think about can greatly affect a dog's overall health and wellbeing, from everyday insults to the body and its physiology, to the role our own lifestyles and our vets' choices play. Indeed, the health equation works both ways and can travel "up the leash." Medical breakthroughs have expanded our choices for canine health—if you know what they are. This definitive dog-care guide empowers us with the knowledge we need to make wise choices, and to keep our dogs healthy and happy for years to come.

Stealing Fatima's Hand is an unforgettable collection of interconnected narratives presenting an alternative view of Morocco - a country not of labyrinthine alleys, Kasbahs, and smoky tea rooms - but a more madcap Morocco, one left to be discovered after all the coach tours depart. Imagine the impossible: one finds oneself in a heady and mysterious locale on the edge of North Africa, a country replete with colorful characters, incomprehensible customs and taboos, a spoken language lacking an alphabet, often frustrating religious practices and, in spite of all this capital 'E' exoticism, one still doesn't want to marry a local? Or turn a decrepit ryad into a boutique hotel? Or write for the travel page in the Sunday paper? Carolyn Thriault does more than imagine it. After making a rather drunken New Year's Resolution to toss aside their conventional lifestyle and pension plans, Carolyn, a somewhat cynical, snarky ex-pat and self-proclaimed square-peg, with her photographer husband Chris decide to walk away from their comfortable jobs in the Land of the Round Doorknobs (Canada) to travel the world. Because their long-suffering attempts at financial independence (weekly lottery tickets) have not borne any fruit, the only apparent means to rectify this situation they believe is to teach English overseas. And Morocco seems to fit the bill. But does it? Unconventional and candid - Stealing Fatima's Hand stands out as an irreverent black sheep in the literary travel genre, succeeding in undoing for Morocco everything that Peter Mayle has done for Provence. The book spans two years of Carolyn's experiences in Rabat, where with humor and honesty she struggles with Moroccan bureaucracy, sexual harassment, the threat of terrorism, devious students, randy co-teachers, and the temptation of having French pastries washed down with gin & tonics for every meal. All this in a country, where apart from her, the only vegetarians are the sheep and the goats.

Applied Veterinary Clinical Nutrition provides current, clinically relevant nutritional advice intended for use in daily canine and feline practice. Highly practical, the book emphasizes solutions for integrating nutrition into clinical practice, with introductory chapters covering the foundation and science behind the recommendations and extensive references for further reading. Written by a group of leading veterinary nutritionists, Applied Veterinary Clinical Nutrition is a valuable resource on the principles of animal nutrition and feeding practices in healthy or diseased dogs and cats. The book begins with an overview of basic nutrition, energy requirements, and the basics of product guides, pet foods, home-prepared diets and dietary supplements. Subsequent chapters delve into feeding the healthy dog and cat, nutrition for weight management, and nutritional principles for a variety of diseases, with the final chapters covering enteral and parenteral nutrition. Applied Veterinary Clinical Nutrition is a daily reference for veterinary practitioners, students, and residents seeking authoritative information on feeding animals.
