Smart. Funny. Fearless."It's pretty safe to say that Spy was the most influential magazine of the 1980s. It might have remade New York's cultural landscape; it definitely changed the whole tone of magazine journalism. It was cruel, brilliant, beautifully written and perfectly designed, and feared by all. There's no magazine I know of that's so continually referenced, held up as a benchmark, and whose demise is so lamented" --Dave Eggers. "It's a piece of garbage" --Donald Trump.

"The purpose of this book is to show how cosmeceuticals (defined as a skin care product with bioactive ingredients, which have a desired effect on the skin) work for a variety of skin care concerns, and in concert with cosmetic procedures commonly used by dermatologists and cosmetic physicians"--

Introduction to Biomedical Instrumentation and Its Applications

Springer Science & Business Media

The editor of *Skin Cancer Management: A Practical Approach*, Dr. Deborah

MacFarlane, gathers experts in selected techniques related to the assessment and management of skin cancer and has them critically review the existing literature in light of their considerable experience delivering care. The authors make recommendations for the best way to perform procedures. The tables provided in each chapter then become a manual of how to perform these procedures, and may in time be adopted by the wider universe of dermatologists as the standard of performance. The detailed descriptions of technique and treatment pearls lead the novice through the sequence of events in a way that instills confidence in their ability to safely perform the procedure. An example of the painstaking explanations is found in Chapter 5, Intralesional and

Perilesional Treatment of Skin Cancers. The reader is advised to place eye protection on the patient and those performing the injection of methotrexate into a keratoacanthoma with a central crust. Rest assured that there will be a spray or stream of methotrexate emitted from the crusted area. Having eye protection will prevent methotrexate from accidentally getting into someone's eye. Since we all learn to assimilate new information by taking action on the recommendations that we read, it would be a good idea for the physician to create, where relevant, a checklist for each procedure in the text. The checklist can be given to the office staff to set up the equipment for the procedure.

At the request of Springer-Verlag, Heidelberg, I have written with pride and pleasure the new edition of the Manual of Aesthetic Surgery. Volumes 1 (head and neck region) and 2 (body) have been integrated into one volume, which has been revised and extended with the addition of the topics "Cosmetic Aesthetic Surgery," "Breast Surgery," "Mini Lift," "Mini Abdomen," "Buttock Lift," and "Tumescence Li- suction with the MicroAire® System." The current trend is towards gentle surgical methods. The 'Mang School' has as its motto: Less is more! You should not see cosmetic surgery. Aesthetic surgery is feel-good surgery and not altering surgery. That should be the philosophy of this book. The first editions of both

volumes of the Manual of Aesthetic Surgery had high print runs and were translated into many languages, including Spanish, Russian, and Chinese. The new edition bridges a few gaps, namely breast lifting and breast reduction. These operations are described in detail in order to provide also plastic and aesthetic surgeons with standards. Standards are of crucial importance in aesthetic surgery. Results must be reproducible. Every aesthetic surgeon will then be able to build on this manual and refine his or her methods.
