According to Pinkerton—the leading provider of risk management services in the world—workplace violence is second only to cybersecurity as the top threat faced by organizations today. Incidents involving active shooters in the workplace are on the rise and becoming more violent and deadly. Active Shooter provides the tools necessary to identify potential violent individuals, along with the options and responses needed to save lives, reduce corporate liability, and recover from an active

shooter event should it happen. Active Shooter begins with a brief history of active shooters and how they have changed over time. It shows why many perpetrators initiate attacks, what they often are thinking, and some of the indicators that could have been identified prior to the attack. The book shows how to develop an active shooter program in an organization, walking readers through the entire process including training exercises to test the efficiency of the program. With the uniquely private security perspective, Active Shooter illustrates how to communicate with law enforcement, government agencies, and the media in the event of active shooter incident. The book concludes with a discussion of how organizations can recover promptly after an incident, which is crucial for operational survival. Illustrates what businesses should consider prior to,

during, and after an active shooting event, including developing business continuity plan Demonstrates the importance of preparedness, an effective coordinated response, and planning all the way down to the frontline employee Addresses the private sector and public sector coordination efforts needed for an effective active shooter program Offers teaching and learning tools such as text boxes, end-of-chapter discussion questions, lists of key DHS, FBI and FEMA websites and resources, as well as training exercises and case studies

Schools have increasingly adopted threat assessment to prevent violence, but there is limited insight into whether assessors adhere to recommended practices and consider assessment acceptable and feasible in their schools. Therefore, the present study surveyed 146 assessors from schools in the United States and Canada. Most assessors (79%) reported that their school has a mandated protocol and most (>70%) use practices consistent with several recommendations (e.g., form a multidisciplinary team, collect information, determine risk level). However, a third were local models rather than well-known models discussed in the literature. Some shortcomings in practices were also reported (e.g., in training teams, educating about reporting concerns, screening concerns). Although assessors perceive assessment as having a positive impact, such as increasing support for individuals, most (>60%) do not perceive it to reduce suspensions and expulsions. The primary challenges assessors reported relate to training, time, and monitoring.

The field of threat assessment and the research surrounding it have exploded since the first edition of *Threat Assessment and Management Strategies: Identifying the Howlers and Hunters*. To reflect those changes, this second edition contains more than 100 new pages of material, including several new chapters,

charts, and illustrations, as well as updated cases. The book has been reorganized into two parts. The first part offers the authors' current thinking on how to conduct practical and effective threat management processes. The second provides an in-depth analysis of how howlers and hunters behave and how understanding those behaviors can be used to manage each type of problem individual. This new edition draws on the latest research, as well as ideas and concepts from the authors' previous books. It integrates the sum of their careers in threat management—both their individual experiences managing problem situations and their research and writing on the topic—into a single volume. As in each of their previous books, it focuses on operationally effective and practical methods for managing problem situations. This book also covers special issues in threat management, exploring the relationship between the law and the intimacy effect as well as different ways to identify, assess, and manage howlers and hunters. Each chapter concludes with a real-life situation analysis relevant to the subject under focus. Drawing upon the latest research and on the previous work of its authors, *Threat Assessment and Management Strategies, Second Edition* provides a complete guide to setting up successful threat management processes. It approaches the presented strategies as guidelines rather than prescriptions, emphasizing that threat managers must use their intelligence and originality to modify strategies as necessary to suit each situation.

Important 2018 Secret Service reports about school shootings are reproduced: Making Schools Safer (February 2018) * Enhancing School Safety Using a Threat Assessment Model (July 2018) * Enhancing School Safety Using a Threat Assessment Model: An Operational Guide for Preventing Targeted School Violence As a bonus, this compilation also reproduces another interesting USSS report: Attacks on Federal Government 2001-2013. The tragic events of the February 14, 2018 shooting at Marjory Stoneman Douglas High School in Parkland, Florida, and the May 18, 2018 shooting at Santa Fe High School in Santa Fe, Texas, demonstrated the ongoing need to provide leadership in preventing future school attacks. As such, the U.S. Secret Service, along with many of our partners, have redoubled our efforts and are poised to continue enhancing school safety. As part of these efforts, NTAC created an operational guide that provides actionable steps that schools can take to develop comprehensive targeted violence prevention plans for conducting threat assessments in schools. Ensuring safe learning environments for elementary and secondary school students, educators, administrators, and others is essential. Everyone - whether a member of the school community or even a resident of the local area - has a role in identifying potential threats to a school and sharing that information with those who can take action to assess and manage the risk posed. Although infrequent, a single act of a targeted school attack impacts students, teachers, the local community, and at times the entire nation. Consider what role you can play in the larger efforts to make our schools safer. After a series of high profile school-based attacks, the U.S. Secret Service partnered with the U.S. Department of

Education Office of Safe and Drug-free Schools to study targeted school violence. This study, the Safe School Initiative, published in 2002, examined school-based attacks carried out by current students or those who had recently left school. The study created a foundation of knowledge and guidance related to threat assessment - that is identifying, assessing, and managing risks - in K-12 schools. Following the study, the Secret Service again partnered with the Department of Education on an effort that examined why students who had information about a planned attack either withheld or came forward with the information. This second study, published in 2008, identified aspects of a school's climate that either facilitated or hindered information sharing. Since then, the Secret Service, through its National Threat Assessment Center, has continued to provide training to thousands of school administrators, faculty, staff, and law enforcement on developing innovative programs that foster safer school climates, enhance the trust students have in school staff and administrators, effectively identify potential threats, and assess and handle them in a thorough and systematic way. There are many aspects to creating positive school climates and enhancing school safety. School administrators manage reports of all types of concerning behavior, ranging from vandalism to bullying, fights to drugs, suicidal behaviors and violence. With limited resources, schools must be creative in how they address these issues.

Out of the crucible of war has come a long list of best-selling, award-winning, and long-remembered novels: *The Red Badge Of Courage*, *All Quiet on the Western Front*, *The Caine Mutiny*, *Fields of Fire* and *The Thirteenth Valley*. But none so far has ever captured the power and drama of the United States Marine Corps's ill-fated mission to end the war for Lebanon, which ended in the barracks bombing that killed almost three hundred Marines. For Sergeant David Griffin, a "peace-time" Marine, Beirut was the chance to prove himself capable to the generation of Marines who had been bloodied in the Vietnam War. For Corporal Steven Downs, Beirut was a struggle to separate the civilian from the soldier, his distrust of the politicians' decisions from the military mission. For all of the Marines serving in Lebanon, it was another war in a foreign country where the enemy could be anywhere or anyone. Faced with Griffin's court-martial for engaging the enemy against orders, these two young men find themselves questioning their faith in themselves, their commanders, and eventually that which above all else they must have faith in--the Corps. With the insight that only a Marine Corps veteran could have, C. X. Moreau portrays the men who fought and died in Beirut with skill and ability that bring home to the

reader the true meaning of Semper Fi. "Affecting . . . A haunting slice of military life that unsparingly catalogues the risks, rewards, pain and joys of casting one's lot with warriors."--Kirkus Reviews "Moreau uses the building block of authentic detail to craft a solid take about a little-known, undeclared war. His debut should attract readers seeking to understand how the U.S. military is waging peace in the Middle East."--Publishers Weekly "Outstanding! A classic in, yet above and beyond, the war genre. Thank you, C. X. Moreau, for an enlightening work."--John M. Del Vecchio, New York Times best-selling author of *The Thirteenth Valley* and *For The Sake Of All Living Things* "With his first book, *Distant Valor*, C. X. Moreau, joins the company of top rank military novelists. He shows the reader what it really means to be a Marine."--W.E.B. Griffin, New York Times best-selling author of "The Corps" and "The Brotherhood of War" series "A clear picture of Marines in action and the politicization that often causes bungled operations. The picture is harsh; but it depicts the anguish and humanity of the Marines who so gallantly bear the brunt of carrying the flag to foreign shores. This first novel rings with the authenticity that only a serving Marine could supply."--The Florida Times-Union "A novel of character, as are all great war novels...cuts to the heart of the military experience in our time . . ."--San Jose Mercury News "An absolutely authentic portrayal of the Marines who endured the mud and the blood in Beirut. As captain of a ship offshore, I watched it; C. X. Moreau obviously lived it, up close and personal."--P.T. Deutermann, best-selling author of *Scorpion in the Sea* "C. X. Moreau has seen the military future first-hand in Beirut. In an age of fateful involvements in the wars of others, the terrible dilemmas

described so ably in *Distant Valor* are too often the essence of duty for today's Marines and soldiers. This book is as authentic as they come, heartrending and true, exciting and brutally tragic. It is a worthy monument to heroes cast aside."--Ralph Peters, New York Times best-selling author of *The War In 2020*

Harm to Others offers students and clinicians an effective way to increase their knowledge of and training in violence risk and threat assessment, and it also provides a comprehensive examination of current treatment approaches. Although the text includes many examples from K-12 and college/university settings, which are particularly relevant for mental health professionals in school settings, the underlying concepts and suggestions are useful for counselors, psychologists, and social workers who face these issues in their daily practice. In an easy-to-understand, jargon-free manner, Dr. Van Brunt shares his observations, extensive clinical expertise, and the latest research on what clinicians should be aware of when performing risk and threat assessments. In addition, he offers numerous examples from recent mass shootings and rampage violence to help explain the motivations and risk factors of those who make threats. Two detailed case examples are presented to illustrate key concepts related to assessing dangerousness. Treatment options are then described, using a variety of diverse case studies to demonstrate concrete approaches for clients who have been identified as at risk for violence following a threat assessment. *Requests for digital versions from the ACA can be found on wiley.com. *To request print copies, please visit the ACA

Violence Assessment and Intervention: The Practitioner's Handbook, now in its third edition, provides a proven methodology, grounded in the current empirical research and the authors' experience in successfully assessing and managing thousands of cases in a variety of contexts and environments, for analyzing concerning behaviors and potential threatening situations, and taking action in these challenging, dynamic environments before tragedy occurs. Threat and violence assessment and management is an essential process in reducing violence and its consequences. The ongoing challenge for those assessors, particularly in common workplace environments (e.g., educational settings, public agency settings, and business settings), is applying the applicable behavioral science research in a practical and effective manner to maximize safety. The book begins by demonstrating the threat and violence assessment process from the point of the initial call and proceeds through the steps that quantify the situation and determine the appropriate response. The next section covers information gathering, victimology, and formulas and tools for risk assessment. Finally, the book explores organizational influences, school violence, ethics, security and consultation issues; the formation and running of threat management teams, and relevant laws related

to violence assessment. This book is a valuable reference for human resource professionals, security professionals, mental health practitioners, law enforcement personnel, and lawyers who are members of threat assessment teams, provide threat and violence assessment and management consultations, as well as expert witnesses in cases involving workplace violence, school violence, security negligence; or wrongful termination or disputed school disciplinary actions related to aggressive, threatening, or violent behavior.
