Understanding games--whether computer games, card games, board games, or sports--by analyzing certain common traits. *Characteristics of Games* offers a new way to understand games: by focusing on certain traits--including number of players, rules, degrees of luck and skill needed, and reward/effort ratio--and using these characteristics as basic points of comparison and analysis. These issues are often discussed by game players and designers but seldom written about in any formal way. This book fills that gap. By emphasizing these player-centric basic concepts, the book provides a framework for game analysis from the viewpoint of a game designer. The book shows what all genres of games--board games, card games, computer games, and sports--have to teach each other. Today's game designers may find solutions to design problems when they look at classic games that have evolved over years of playing.

The *Characteristics of Mechanical Engineering Systems* focuses on the characteristics that must be considered when designing a mechanical engineering system. Mechanical systems are presented on the basis of component input-output relationships, paying particular attention to lumped-parameter problems and the interrelationships between lumped components or "black-boxes" in an engineering system. Electric motors and generators are treated in an elementary manner, and the principles involved are explained as far as possible from physical and qualitative reasoning. This book is comprised of five chapters and begins with an introduction to the engineering system and how it works, citing a number of examples such as internal combustion engines, electric generators, and power converters in series. The discussion then turns to power conversion, with emphasis on general forms of converter output characteristic, demand characteristic, and efficiency characteristic. Power transmission is also considered, along with dynamic performance and energy storage. The final chapter examines the linear dynamics of mechanical systems and covers topics such as small excursion dynamics, integral control, and sinusoidal disturbance. Examples of control systems are given. This monograph should be of interest to mechanical engineers.

The church finds itself in a period of great diversification and multiple expressions. In the midst of great change, we have become confused about what really makes for healthy and authentic pastoral leadership. What are the basic and common characteristics necessary for pastors to be effective? How can lay people understand the pastoral call more fully and partner better with pastors for the health of their church? Here Mannoia and Walkemeyer examine the foundations of pastoral effectiveness and bring together nine experienced pastoral leaders to discuss the basic characteristics that exist in effective pastors. Regardless of context or personality, ineffectiveness in pastors and subsequent ill health in churches is often not the result of a lack of calling, but instead is the result of misappropriated efforts to find success. Let's help those who are called to be good stewards of their call. And let's help churches have a chance to be healthy under the leadership of effective pastors!

Have you ever asked yourself the question, That doesn't seem very Christian like, does it? When has this occurred? Was it at church or on a Christian TV show? How about a friend or neighbor that you know personally, and they claim to be a Christian. Are there any rules for us as regular everyday humans to know or discern whether or not someone is who they say they are? The answer is an unequivocal yes! God has plainly said in His word that only He has the right to judge some one's salvation. After all that is what Christianity is really all about, who is a follower of Jesus Christ! You see God is the only one that has the ability to see inside of a man or woman to their very core, their heart. Only He can know the thoughts and intents of the heart according to the book of Hebrews. He has however told us that every man, woman or child will exhibit fruit. This fruit will show itself in the form of our character. Then God said that we would know them by their fruit. In other words, we are to be fruit inspectors. To be a God ordained fruit inspector, you must first know what the fruit is and what a good fruit is supposed to look like. This takes training by someone who is an accomplished inspector and a desire on your part to become a good inspector. As the government hires and trains people to inspect our meat, vegetables and fruit, for our health, so God takes you and I, trains us to be fruit inspectors for our spiritual health.

It includes exercises (which can also serve as the basis for discussions) and examples chosen from a wide variety of games. There are occasional mathematical digressions, but these can be skipped with no loss of continuity. Appendixes offer supplementary material, including a brief survey of the two main branches of mathematical game theory and a descriptive listing of each game referred to in the text.

I was always intrigued by the question: Why are some people successful in life while others just can't get it right, even if they are from the same background. I have researched this phenomenon over many years, and now I believe I have a fairly accurate list of the characteristics of successful people. As this book is meant for the man in the street, I have written it in layman's terms and I used examples and humor to bring the points across. Furthermore, I attempted to show how to learn the characteristics of successful people in order for the reader to internalize the principles and become successful himself.

From the bestselling author of *What the Best College Teachers Do*, the story of a new breed of amazingly innovative courses that inspire students and improve learning. Decades of research have produced profound insights into how student learning and motivation can be unleashed—and it's not through technology or even the best of lectures. In *Super Courses*, education expert and

bestselling author Ken Bain tells the fascinating story of enterprising college, graduate school, and high school teachers who are using evidence-based approaches to spark deeper levels of learning, critical thinking, and creativity—whether teaching online, in class, or in the field. Visiting schools across the United States as well as in China and Singapore, Bain, working with his longtime collaborator, Marsha Marshall Bain, uncovers super courses throughout the humanities and sciences. At the University of Virginia, undergrads contemplate the big questions that drove Tolstoy—by working with juveniles at a maximum-security correctional facility. Harvard physics students learn about the universe not through lectures but from their peers in a class where even reading is a social event. And students at a Dallas high school use dance to develop growth mindsets—and many of them go on to top colleges, including Juilliard. Bain defines these as super courses because they all use powerful researched-based elements to build a “natural critical learning environment” that fosters intrinsic motivation, self-directed learning, and self-reflective reasoning. Complete with sample syllabi, the book shows teachers how they can build their own super courses. The story of a hugely important breakthrough in education, *Super Courses* reveals how these classes can help students reach their full potential, equip them to lead happy and productive lives, and meet the world's complex challenges.

What is your occupation? Are you in that particular line of work because God put you there? If so, then what has God taught you about Himself and living a life that honors Him through your job? After four years of teaching in the public school system Randall Grabau spent his adult life as a dairy farmer. During the 38 years as a full time dairyman, he developed an understanding of the beneficial characteristics found in the most productive cows in his herd. Interestingly, he began to also notice that the characteristics he wanted to see and develop in his dairy herd are the same ones that God wants in those people who are part of His Kingdom. What are the characteristics of a good cow? How do they relate to us as a part of God's Kingdom? What can we learn from cows about how to be productive in God's herd? The studies in this book will help you answer those questions. Hopefully, you will also be motivated to evaluate your own occupation in the light of what God wants to teach you through the work that you do. The *SETTING THE HEART* Bible study series addresses questions with questions. The art of interview includes questioning the one of interest. The first-hand information in the Holy Bible gives a balanced perspective of the One being studied. Randall Grabau gives the reader the benefit of his own questions regarding God's being and our relationship to Him.

Information on test-takers collected at the time of examinations provides a rich description of AP students, but what are the characteristics of their teachers? The current study provides a glimpse into these characteristics by summarizing the results of the largest survey of AP teachers to date (32,109 responses). The AP Teacher Survey contained 40 questions covering the following content areas: classroom characteristics, teacher background, professional development, training and resource needs, technology, and important issues for AP teachers. A list of advanced placement courses is appended.

This 3rd edition of *12 Characteristics of an Effective Teacher* includes 25 new essays written by college students about their favorite K-12 teacher. These heartwarming essays are additional true stories of outstanding teachers who helped students deal with a variety of personal, emotional, social, and academic concerns such as: sexual identity, bullying, ADHD, dyslexia, hearing impairment, losing a parent due to cancer, and helping students with physical appearance needs such as; arranging for a student to get her hair done in order to sing at Carnegie Hall. This 3rd edition also includes additional stories of great teachers who used unique teaching techniques in order to educate the children in their classroom. After years of listening to students speak about their favorite and most memorable teacher, and after years of reading students' essays of teachers who made the most significant impact on their lives, the author's qualitative research has discovered 12 characteristics of an effective teacher.

**How Children Learn** Baker Books

Written by Early Education Associate Nancy Stewart with a foreword by Early Education President Helen Moylett, this book explores effective early childhood learning through focusing on how rather than what children learn. This will be an important theme in the revised Early Years Foundation Stage, set to be published in Spring 2012 for implementation in England from September 2012. Its content is however, applicable across the range of curricula and frameworks that govern early

childhood education across the four UK nations, as well as internationally.

The Advisory Board of the Literacy Coaching Clearinghouse suggests six characteristics that define effective literacy coaching. These characteristics can guide districts and schools to think carefully about the qualifications of the literacy coaches they hire, the realistic roles for coaches to fill, and the support systems that coaches need to be successful. Effective literacy coaching: (1) Involves collaborative dialogue for teachers at all levels of knowledge and experience; (2) Facilitates development of a school vision about literacy that is site-based and links to district goals; (3) Is characterized by data-oriented student and teacher learning; (4) Is a form of ongoing, job-embedded professional learning that increases teacher capacity to meet students' needs; (5) Involves classroom observations that are cyclical and that build knowledge over time; and (6) Is supportive rather than evaluative. (Contains 1 figure.).

This book describes the most important kinds of texts in English and introduces the methodological techniques used to analyse them. Three analytical approaches are introduced and compared, describing a wide range of texts from the perspectives of register, genre and style. The primary focus of the book is on the analysis of registers. Part 1 introduces an analytical framework for studying registers, genre conventions, and styles. Part 2 provides detailed descriptions of particular text varieties in English, including spoken interpersonal varieties (conversation, university office hours, service encounters), written varieties (newspapers, academic prose, fiction), and emerging electronic varieties (e-mail, internet forums, text messages). Finally, Part 3 introduces advanced analytical approaches using corpora, and discusses theoretical concerns, such as the place of register studies in linguistics, and practical applications of register analysis. Each chapter ends with three types of activities: reflection and review activities, analysis activities, and larger project ideas.

Constructing test items for standardized tests of achievement, ability, and aptitude is a task of enormous importance. The interpretability of a test's scores flows directly from the quality of its items and exercises. Concomitant with score interpretability is the notion that including only carefully crafted items on a test is the primary method by which the skilled test developer reduces unwanted error variance, or errors of measurement, and thereby increases a test score's reliability. The aim of this entire book is to increase the test constructor's awareness of this source of measurement error, and then to describe methods for identifying and minimizing it during item construction and later review. Persons involved in assessment are keenly aware of the increased attention given to alternative formats for test items in recent years. Yet, in many writers' zeal to be 'curriculum-relevant' or 'authentic' or 'realistic', the items are often developed seemingly without conscious thought to the interpretations that may be garnered from them. This book argues that the format for such alternative items and exercises also requires rigor in their construction and even offers some solutions, as one chapter is devoted to these alternative formats. This book addresses major issues in constructing test items by focusing on four ideas. First, it describes the characteristics and functions of test items. A second feature of this book is the presentation of editorial guidelines for writing test items in all of the commonly used item formats, including constructed-response formats and performance tests. A third aspect of this book is the presentation of methods for determining the quality of test items. Finally, this book presents a

compendium of important issues about test items, including procedures for ordering items in a test, ethical and legal concerns over using copyrighted test items, item scoring schemes, computer-generated items and more.

As a sergeant in the United States Marine Corps, it was my sworn duty to guide, teach, and protect those who served in subordinate positions. In this role, it was critical to provide clear and concise

information so that those who trusted my leadership would not be ignorant to the mission or threats. The apostle Paul gives a clear warning to Christian believers pertaining to the gifts of the Spirit: "I would not have you be ignorant." His first-century warning is quite relevant in this twenty-first century, where doctrinal literacy is lacking and knowledge of the Holy Ghost obtained through the Word of God and experience has been replaced with choreographed programs. Without clear and concise teaching, the warrior in Christ is left with a butter knife rather than a sword to cut through the traditions, customs, and church politics that leave a believer paralyzed in ignorance.

The Gifts of the Spirit and the Characteristics of Those Who Have Them is a book written to be a field infantry manual for the believer that is clear and concise. It provides the believer with definitions of the gifts of the Spirit and examples of how they operated both in the first-century church and this present age. Lastly, this book will provide the believer with the information needed to examine oneself and answer the question "What gift do I have?" This is done by describing the effect the gift has on a believer's character and behavior while operating in and out of the church.
