higher level ASE, AUR and
other qualifications.
Advanced Automotive
Fault Diagnosis covers the
fundamentals of vehicle
systems and components
and explains the latest
diagnostic techniques
employed in effective
vehicle maintenance and
repair. Diagnostics, or
fault finding, is an
essential part of an
automotive technician's
work, and as automotive
systems become
increasingly complex
there is a greater need for
good diagnostics skills.

For students new to the subject, this book will help to develop these skills, but will also assist experienced technicians in further improving their performance and keeping up with recent industry developments. In full colour and including examples of the latest technology, this is the guide that no student enrolled on an automotive maintenance and repair course should be without.

Central to Elements is an
 assay of the attributional
 union properties and
 relations have with their
 subjects, a topic
 historically left
 metaphorical. The work

critiques eight Aristotelian assumptions concerning attribute dependence and 'inherence', per se subjects ('substances'), attributes as agent-organizers, and unity-by-a-shared-one. Groups of these assumptions are seen to yield contradiction, vicious regress, or other problems. This analysis, joined with insights from an essay of ubiquitous structure, motivate ten theses explicating attribution and its primary ontic status. The theses detail: attributes proper

as individuated instances, structure as instance-generated facts and their two forms of composition, the conditioning role and universal nature of instances' component intensions, the primacy of attribute instances for generating all forms of composition and complex entities, and identity and indiscernibility criteria for the latter. Principal is the insight that attribution is intension-determined combinatorial agency. It is its systematizing implications that provide solutions to classic

problems, e.g., Composition, Individuation, and Universals, and in net generate a comprehensive one-category structuralist ontology.
