A Tale of Two Truckers

tells the story of the transition of the author from a perfectly normal life into the predominantly male operated trucking industry in the early 1980's and the trials she endured. The story takes you back to a lifestyle and time many young people today could never imagine because there was little technology - not

even mobile phones! The tale reveals the relentless struggles and challenges she faced along with her partner Randy, and her dog named Hooter, as they ventured forth to secure a career in the trucking industry. She finds herself in unimaginable and sometimes frightful predicaments, taking her readers with her into a world they never knew existed. Maintaining her sense of humor

throughout the ordeal, she is not afraid to tell it like it was, something her trucker partner Randy, never would have done. [How Many Trucks Can a Tow Truck Tow?](#) Cartwheel Books Each of us will be touched by cancer in the course of

our lifetime – as a person diagnosed with the disease or as a family member or friend who must witness its course in someone we love. For all of us, this encounter with cancer will entail an exploration of the margins of life and death. Too often, especially once the curative stage is passed, patients and their loved ones make this journey in silence and without the full support of a medical system whose chief mandate is to "win the battle" against cancer. In Cancer Stories five people

share their journeys, their stories, and the suffering they faced before their deaths. These narratives chronicle the despair, hope, and love they experienced while living and dying with cancer, giving the power of the human spirit full voice. Lessons learned are presented as "gifts" at the conclusion of each of the five narratives. This book is for people living with the disease and their caregivers. Nurses and physicians, students in any health-related discipline, as well as

persons engaged in qualitative research will also find this an invaluable resource. The importance of incorporating qualitative, research-based approaches in caring for the dying emerges from the narratives. Cancer Stories points toward a more holistic research/treatment agenda, one that bridges the medical and social sciences. David M. Gregory is associate professor in the Faculty of Nursing, University of Manitoba. Cynthia K.

Russell is assistant professor in the College of Nursing, University of Tennessee, Memphis.
