Stenhouse Publishers  
The 1619 Project's  
lyrical picture book in  
verse chronicles the  
consequences of  
slavery and the history  
of Black resistance in  
the United States,

thoughtfully rendered  
by Pulitzer Prize-  
winning journalist  
Nikole Hannah-Jones  
and Newbery honor-  
winning author Renée  
Watson. A young  
student receives a  
family tree assignment  
in school, but she can  
only trace back three  
generations. Grandma  
gathers the whole  
family, and the student

learns that 400 years ago, in 1619, their ancestors were stolen and brought to America by white slave traders. But before that, they had a home, a land, a language. She learns how the people said to be born on the water survived. And the people planted dreams and hope, willed themselves to keep living, living. And the people learned new words for love for friend for family for joy for grow for home. With powerful verse and striking illustrations by Nikkolas Smith, *Born on the Water* provides a pathway for readers of all ages to reflect on the origins of American identity.

Completely revised and updated, this best-

selling introduction to programming in JavaScript focuses on writing real applications. JavaScript lies at the heart of almost every modern web application, from social apps like Twitter to browser-based game frameworks like Phaser and Babylon. Though simple for beginners to pick up and play with, JavaScript is a flexible, complex language that you can use to build full-scale applications. This much anticipated and thoroughly revised third edition of *Eloquent JavaScript* dives deep into the JavaScript language to show you how to write beautiful, effective code. It has been updated to reflect the current state of JavaScript and web browsers and includes brand-new material on

features like class notation, arrow functions, iterators, async functions, template strings, and block scope. A host of new exercises have also been added to test your skills and keep you on track. As with previous editions, Haverbeke continues to teach through extensive examples and immerses you in code from the start, while exercises and full-chapter projects give you hands-on experience with writing your own programs. You start by learning the basic structure of the JavaScript language as well as control structures, functions, and data structures to help you write basic programs. Then you'll learn about error handling and bug fixing, modularity, and

asynchronous programming before moving on to web browsers and how JavaScript is used to program them. As you build projects such as an artificial life simulation, a simple programming language, and a paint program, you'll learn how to:

- Understand the essential elements of programming, including syntax, control, and data
- Organize and clarify your code with object-oriented and functional programming techniques
- Script the browser and make basic web applications
- Use the DOM effectively to interact with browsers
- Harness Node.js to build servers and utilities

Isn't it time you became fluent in the language of the Web? \*

This text is an introduction to the future of mass media and mass communications - cross-media communications. Cross-media is explained through the presentation and analysis of contemporary examples and project-based tutorials in cross-media development. The text introduces fundamental terms and concepts, and provides

a solid overview of cross-media communications, one that builds from a general introduction to a specific examination of media and genres to a discussion of the concepts involved in designing and developing cross-media

communications. There is also an accompanying DVD-ROM full of hands-on exercises that shows how cross-media can be applied. For the DVD-ROM: <http://www.lulu.com/content/817927>

In resource poor, cost saving times, this book provides practical advice on new methods and technologies involved in systematic searching

and explores the role of information professionals in delivering these changes. The editors bring together expert international practitioners and researchers to highlight the latest thinking on systematic searching. Beginning by looking at the methods and techniques underlying systematic searching, the book then examines the current challenges and the potential solutions to more effective searching in detail, before considering the role of the information specialist as an expert searcher. Systematic Searching blends theory and practice and takes into account different approaches to information retrieval with a special focus

being given to searching for complex topics in a health-related environment. The book does not presume an in-depth prior knowledge or experience of systematic searching and includes case studies, practical examples and ideas for further research and reading. The book is divided into three parts: Methods covers theoretical approaches to evidence synthesis and the implications that these have for the search process, including searching for complex topics and choosing the right sources. Technology examines new technologies for retrieving evidence and how these are leading to new directions in information retrieval

and evidence synthesis. People considers the future of the information specialist as an expert searcher and explores how information professionals can develop their skills in searching, communication and collaboration to ensure that information retrieval practice is, and remains, evidence-based. Systematic Searching will be essential reading for library and information service providers and information specialists, particularly those in a health-related environment. It will also be of interest to students of library and information science, systematic reviewers, researchers and practitioners conducting complex searches in settings

including social care, education and criminal justice.

When Daisy the warthog's classmates tease her, she finds comfort collecting lost and forgotten things. She knows they're special - and soon she meets a friend who knows it too. "Daisies seem so simple on the surface, but when you look closely you see their hidden beauty." That's what Daisy the warthog's mom always says, and it's the reason she got her name. But when Daisy goes to school, she

doesn't feel like her name. The other kids, Rose, Violet, and Petunia, make fun of her and call her "Thistle." Daisy spends a lot of time with her head down, but she doesn't need her classmates to have fun. When she looks at the forest floor, she starts to find all sorts of treasures, beautiful things that were once special and have since been forgotten. The other kids might make fun of her pastime, but it turns out she's not the only one who appreciates the hidden beauty of forgotten things when she meets a like-minded new friend. With vibrant, sun-dappled art, this is a book for any kid who has trouble fitting in and marches to the beat of their own drum, from the acclaimed

In their follow-up to Reading Wellness, Jan Burkins and Kim Yaris explore how some traditional scaffolding practices may actually rob students of important learning opportunities and independence. *Who's Doing the Work?* suggests ways to make small but powerful adjustments to instruction that hold students accountable for their own learning. Educators everywhere are concerned about students whose reading development inexplicably plateaus, as well as those who face challenging texts without applying the strategies they've been taught. When such problems arise, our instinct is to do more. But when we summarize text before reading or guide

students when they encounter difficult words, are we leading them to depend on our support? If we want students to use strategies independently, Jan and Kim believe that we must question the ways our scaffolding is getting in the way. Next generation reading instruction is responsive to students' needs, and it develops readers who can integrate reading strategies without prompting from instructors. In *Who's Doing The Work?*, Jan and Kim examine how instructional mainstays such as read-aloud, shared reading, guided reading, and independent reading look in classrooms where students do more of the work. Classroom snapshots

at the end of each chapter help translate the ideas in the book into practice. *Who's Doing the Work?* offers a vision for adjusting reading instruction to better align with the goal of creating independent, proficient, and joyful readers.

Six murders. One hundred pages.

Millions of possible combinations... but only one is correct. Can you solve

Torquemada's murder mystery? In 1934, the Observer's cryptic crossword compiler, Edward Powys Mathers (aka Torquemada), released a novel that was simultaneously a murder mystery and the most fiendishly difficult literary puzzle ever written. The pages have been printed in an entirely haphazard order, but it is possible - through logic and intelligent reading - to sort the pages into the only correct order, revealing six murder victims and their respective murderers. Only three

puzzlers have ever solved the mystery of Cain's Jawbone: do you have what it takes to join their ranks? Please note: this puzzle is extremely difficult and not for the faint-hearted.

Were it not for the calculus, mathematicians would have no way to describe the acceleration of a motorcycle or the effect of gravity on thrown balls and distant planets, or to prove that a man could cross a room and eventually touch the opposite wall. Just how calculus makes these things possible and in doing so finds a correspondence between real numbers

and the real world is the subject of this dazzling book by a writer of extraordinary clarity and stylistic brio. Even as he initiates us into the mysteries of real numbers, functions, and limits, Berlinski explores the furthest implications of his subject, revealing how the calculus reconciles the precision of numbers with the fluidity of the changing universe. "An odd and tantalizing book by a writer who takes immense pleasure in this great mathematical tool, and tries to create it in others."--New York Times Book Review

Publishing Research and Qualitative Interviews brings into focus the decisions that the interviewer faces by taking a data-led approach in order to open up choices and decisions in the process of planning for, managing, analysing and representing interviews. The chapters concentrate on the real-time, moment-by-moment nature of interview management and interaction. A key feature of the book is the inclusion of reflexive vignettes that foreground the voices and experience of qualitative researchers (both novices and more expert practitioners). The vignettes demonstrate the importance of reflecting on and

learning from interactional experience. In addition, the book provides an overview of different types of interviews, commenting on the orientation and make-up of each type. Overall, this book encourages reflective thinking about the use of research interviews. It distinguishes between reflection, reflective practice and reflexivity. All the chapters focus on recurring choices, dilemmas and puzzles; offering advice in opening out and engaging with these aspects of the research interview.

A Little Book of Language St. Martin's Griffin  
Equipping pastors to address racism faithfully from the pulpit. Of all the

activities that come with being a minister, sermon preparation can loom largest - especially when racism is the subject. You've got to address racism with your white congregation from the pulpit. But, truthfully, you can't wrap your head around how to preach about this topic thoughtfully and sensitively. In *Preaching about Racism*, preaching professor and pastor Carolyn Helsel speaks directly to other faith leaders about how to address racism from the pulpit. In her first book, *Anxious to Talk about It: Helping White Christians Talk Faithfully about Racism*, Helsel addressed the anxiety white Christians experience around conversations about

race. In this follow-up, Helsel provides strategies and a theoretical framework for crafting biblical and theological sermons that incorporate insights from social sciences and psychology, gleaned from more than a decade of writing and teaching about racism. Written for the busy pastor, several chapters are quick reads - helpful reminders as you prepare a thoughtful and sensitive sermon - while others dig deeper on the theory behind the crucial work of dismantling racism.
