What happens when you have God's blessing nailed down, and then without warning an evil intruder rips everything apart? I had a corner on the good life. Driven by my material appetite, strategically balanced by religion, I desperately played both sides. Comfortable in a good marriage, with two kids, and a home situated on a small horse farm, I was truly blessed. Everything changed in an instant with the discovery of a lump, but some things changed in ways I could never have imagined. By probing the joy and heartache of the past in the redemptive light of precious promises kept, this narrative paints a picture of beauty defiled unfolding to startling beauty revealed. You're invited on a journey of discovery that may change the way you think about blessing. A story of praise and healing, though not in the popular sense; it's a drama of marital love and faithfulness that prevails against great odds." Rev. Sherwin (Chic) Broersma, D. Min., Retired RCA Pastor "Mark's journey into death leads you beyond the struggle to a hallowed place of surrender. You will be both encouraged and equipped through this book." Sarah Schieber, singer, songwriter, author, speaker "Find hope in the midst of deep grief and loss. Take and read!" Rev. Keith A. Derrick, Dir. of Journey, Center for Learning at Western Theological Seminary

 Following his successful How to Pass the APC: Essential Advice for General Practice Surveyors, Austen Imber's latest publication examines surveyors' work in practice. The case work is based mainly on examples of APC candidates' critical analysis, and is supported by additional guidance on the key issues arising in practice. In a clear, practical way the book covers the public, private and corporate sectors and enables graduates to understand the roles of the various participants in the property industry. Subjects covered include investment valuation, development valuation/appraisal, profits

valuation, the Red Book, lettings, sales, rent reviews, lease renewals, estate management, ratings, planning, development, regeneration, compulsory purchase, telecoms and insolvency. The hands-on style of the candidates' critical analysis, clearly shows the detailed reasoning behind the initial strategies and decisions throughout a case. The examples of APC interview questions and tasks for study are invaluable in encouraging graduates to consider further issues - including the many practical problems which graduates need to understand in order to succeed in practice and with their APC interview. Professional ethics are also represented within the cases featured. The APC Casebook is an essential tool in preparing for the final assessment stage of the APC, as well as being an important reference source for candidates throughout their APC training.

This book explores international trends in naming and contributes to the growing field of onomastic enquiry. Naming practices are viewed here through a critical lens, demonstrating a high level of political and social engagement in relation to how we name people and places. The contributors to this publication examine why names are not only symbols of a person or place, but also manifestations of cultural, linguistic and social heritage in their own right. Presenting analyses of geographically and culturally diverse perspectives and case studies, the book investigates how names can represent deeper kinds of identity, act as objects of attachment and dependence, and reflect community mores and social customs while functioning as powerful mechanisms of inclusion and exclusion. The book will be of interest to researchers in onomastics, sociology, human geography, linguistics and history.

The book presents a mixed research method adopted to assess and present the Toyota Way practices within construction firms in general and for firms in China specifically. The results of an extensive structured questionnaire survey based on the Toyota Way-styled attributes identified were developed and data collected from building professionals working in construction firms is presented. The quantitative data presented in the book explains the status quo of the Toyota Way-styled practices implemented in the construction industry, as well as the extent to which these attributes were perceived for lean construction management. The book highlights all the actionable attributes derived from the Toyota Way model appreciated by the building professionals, but alerts the readers that some attributes felled short of implementation. Further findings from in-depth interviews and case studies are also presented in the book to provide to readers an understanding how these Toyota Way practices can be implemented in real-life projects. Collectively, all the empirical findings presented in this book can serve to enhance understanding of Toyota Way practices in the lean construction management context. The readers are then guided through to understand the gaps between actual practice and Toyota Way-styled practices, and the measures that they may undertake to circumvent the challenges for implementation. The book also presents to readers the SWOT analysis that addresses the strengths, weaknesses, opportunities and threats towards the implementation of the Toyota Way in the construction industry. The book prescribes the Toyota Way model for use in construction firms to strategically implement lean construction management. The checklist presented in the book enables readers to draw lessons that may be used additionally as a holistic assessment tool for measuring the maturity of firms with respect to their Toyota Way implementation. Consequent to this, management would then be in a better position to develop plans for Toyota Way implementation by focusing on weak areas, strengthening them, and thus increasing the likelihood of success in the implementation of the Toyota Way. In a nutshell, this book provides a comprehensive and valuable resource for firms not only in the construction industry but also businesses outside of the construction sector to better understand the Toyota Way and how this understanding can translate to implementation of lean construction/business management to enhance profitability and survivability in an increasingly competitive global market place.

For nearly a century families have been out-migrating to suburbs and peri-urban areas. In this book, Johanna Lilius conceptualizes the relatively recent phenomenon of families choosing to live in the inner city. Drawing on a range of qualitative data, the book offers a holistic approach to simultaneously understanding changes within parenting practices and changes connected to city development. The book explains not only why families choose to stay in the inner city and how they use the city in their everyday lives, but also how families change the landscape of contemporary cities, and how the family is, and has been, perceived in urban planning and policy-making. The Nordic perspective provided by Lilius makes this book an important contribution in helping understand inner city change outside the Anglo-American context, and will appeal to an international audience.
