 Series simply by
 Incorporated turning the
 Communicate page As a
 immediately nurse, you
 with Spanish- need to be

prepared for anything. But what if that anything is a language barrier with your Spanish-speaking patients? McGraw-Hill's Nursing Spanish Visual Phrasebook helps you overcome this difficulty and understand your patients' needs. With no experience in the language, you can find out the due date of an expectant mother; review a young child's medical history; let an elderly man

know you are starting an IV; and reassure a worried parent that an interpreter is on the way. McGraw-Hill's Nursing Spanish Visual Phrasebook works in three easy steps: Point to each question. Patient responds with a simple head nod, with a "yes" or "no" answer, or by pointing to a diagram. Continue using the phrasebook to assist with patient assessment. Just point and flip, and you can close the

communication gap between you and your Spanish-speaking patients. *Blind Copy Mentoring for the Spanish Speaking Nurse* McGraw-Hill Education Bruno Lambourg, MD originally from Fleurance, France and currently residing in both Boynton Beach, FL and Bordeaux, France since 2001, is the author of HNS NCLEX-RN Prep. The first text of its kind in that it presents a

review of material key to success on the NCLEX -RN both in English and in Spanish. According to Dr. Lambourg, one of the greatest challenges foreign nursing graduates face in their mission of trying to attain licensure are barriers in the language. This text helps the student to accomplish two key goals in practicing nursing in the U.S. the first improving English medical

terminology and secondly to learn to think critically to be able to successfully pass the NCLEX-RN exam. Each chapter depending on the topic contains a review in pertinent physiology, followed by the assessments or signs and symptoms associated to particular pathologies and implementations required of each condition. This information is presented both in English

and in Spanish. Additionally, the text includes key test taking techniques to assist the perspective nurse in learning how to conquer the NCLEX. The assessment and implementations referred to within the text are considered standard criterion referred to in many public materials including the Centers for Disease control, and many Nurse Practice acts across the

procedures, medications, and diagnoses when faced with a variety of medical situations involving non English speaking patients and families. This text offers the instructor a complete course that can be used in practically any classroom situation. However, it can be adapted for home use as well. Createspace Independent Publishing Platform
THE QUICKEST ROUTE TO LEARNING

HOW TO COMMUNICATE WITH SPANISH-SPEAKING PATIENTS-- NOW AVAILABLE IN CD FORMAT!
 Much more than mere phrase books, these book/CD packages arm health care providers with the tools they need to communicate confidently with their Spanish-speaking patients. In no time, even those with no prior Spanish language experience can build competence in interviewing

patients, taking histories, conducting physical exams and tests, giving medication, and performing follow-ups. Offering health care providers a quick, easy, and enjoyable way to learn to communicate with Spanish-speaking patients, each package features: More than 2,500 key general and medical terms with pronunciation tips Jargon-free explanations

<p>of essential grammar concepts and structures</p> <p>Realistic dialogues reflecting the most common medical situations</p> <p>Exercises, games, and puzzles that reinforce understanding and fluency</p> <p>Quick-reference bilingual glossary</p> <p>Three 75-minute CDs containing vocabulary, phrases, and dialogues spoken by a variety of native speakers</p> <p>10 CME tests worth up to 30</p>	<p>hours of AMAApproved continuing education credit</p> <p><u>Spanish Today for Medical and Emergency Personnel</u></p> <p>McGraw Hill Professional Research Paper (postgraduate) from the year 2017 in the subject Communications - Intercultural Communication, grade: 4.0, , course: Practicum, language: English,</p> <p>abstract: The purpose of this quantitative project was to</p>	<p>examine if the implementation of a mentoring program for Spanish speaking nurses facilitated improvement in communication. This project focused on answering did the improved communication resulting from the mentoring program lead to improved patient interactions and ultimately improved patient satisfaction as evidenced by their Hospital Consumer Assessment of</p>
---	---	--

Healthcare Providers and Systems survey results. The project studied 78 nurses randomly selected from the nurses on a Southwest telemetry unit. Nurses were then assigned the role of mentor or mentee. To qualify as a mentor, the nurse had to speak fluent English have an above average employment evaluation. The director of the unit approved the mentor mentee assignments.

The communication section of the HCAHPS survey was compared from the time frame in 2016 to the exact same time frame in the year previously. A statistical analysis of the data revealed there was no difference in communication by nurses based on the mentor - mentee program outcomes as demonstrated on the HCAHPS survey results. It can be concluded that the

mentor program may not be cost and time effective. The study recommends that hospital educators formulate policies that support effective communication of nurses while also considering the efficient use of nurses' time and institutional financial resources. El Paso, Texas is fewer than five miles from the United States-Mexico border and 81.2% of its residents identify as

Hispanic. Many of these residents speak Spanish as their first language; the same is true for nurses working in the city and its surrounding areas. Approximately 80% of the nurses in a given unit at the Southeastern Hospital speak Spanish and 90% of the patients are English speaking. Patient satisfaction measured by the HCAHPS is low, and for this hospital it appears to result from the number of Spanish speaking nurses that serve patients in these units. Evidence suggests that difficulty communicating with patients is common for Spanish speaking nurses and those that speak other non-English languages. The result is a high turnover rate among nurses, as well as poor patient outcomes and satisfaction; these results are consistent with what has been observed at Southeastern Hospital.

Learn Medical Spanish in 100 Days
Lippincott Williams & Wilkins
A guide to the Spanish language for health care workers emphasizes the expressions and terminology needed in medical situations and offers advice on cultural differences.

Spanish/English Terms for Nurses Jones & Bartlett Publishers

School Nurses in a Spanish-speaking Community and Their Awareness of Folk Healers and Folk Healing Practices

McGraw Hill Professional
This book is designed to help doctors, nurses, and medical assistants communicate in Spanish

with Latino patients and their families who have little or no command of English. Fully updated text includes the addition of vocabulary for informing families about patients' medical care or death; instructing patients on how to navigate online forms; a sample disclosure and consent form in both Spanish and English; and a new section on working with medical interpreters. Every Spanish

word in the book is followed by its phonetic pronunciation. The book also provides easy-to-follow tips on understanding colloquial spoken Spanish. Author William Harvey concentrates on words and phrases likely to be used in a medical setting. True-to-life dialogues dramatize situations pertaining to pregnancy, broken bones, pediatric care, heart and lung diseases, pharmacy

prescriptions, and much more.

Generalist Medicine and the U.S. Health System
 McClelland & Stewart
 This Medical Spanish Course for Nurses has been taught at the college level since January of 2019. It can be used as a

college course, a self-study course, or as an exam preparation course to prepare individuals for the national Spanish for Nurses certification exam found on SCRON.org. Once the textbook is purchased, register for the free online lessons at <https://www.scron.org/register/> and within 24 hours, after verification of purchase, you will be given free access to the online lessons. If you don't receive access within 2 business days, please email contact@scron.org with your name and the date of your purchase, and you will be verified and given access to the online lessons. How Long Does it Take to Complete? On average, it takes individuals 3-5 hours per week for 15 weeks to complete the Spanish for Nurses course. What Level of Spanish is Needed to Take the Course? The course has been created for currently active Nurses as well as those studying to be nurses with little to no knowledge of Spanish. However, individuals who have taken a year or two of Spanish in High School or College will still greatly benefit from the course. How Many Words and Phrases Will I Learn? There are over 350 words and phrases that are contained in the

following sections of the medical Spanish for Nurses course: (1) Greetings (2) Chapters)(2) Negotiating a Conversation (1 Chapter)(3) Common Nurse Phrases (2) Chapters)(4) What is Your Name? (1 Chapter)(5) Do you speak English? (2) Chapters)(6) Basic Anatomy and Key Phrases (7) Chapters)(7) Where are you from? (2) Chapters)(8) Medical Verbs and Conversations (6	Chapters)(9) Medical Assessment (2) Chapters)(10) Final Review (1 Chapter)Be sure to "Look Inside" at the left of this product page to learn more about each chapter.How Does the Certification Course Work?There are 150 possible questions on the certification course. The course randomly chooses 100 of the 150 questions. The order, of the questions and answers, is changed	every time and it is a timed test. There is not enough time given for learners to look up the questions. They have to know them well before taking the exam or they will not pass. The certification exam costs \$100, but the exam prep course is free with the purchase of this textbook (see above). In the exam prep lessons, a practice exam can be taken unlimited times to
---	---	---

prepare for the final exam. The Theories Behind the Course This course was designed based on many pedagogical (learning) and neuroscience (brain science) theories that the author studied in-depth during his Master's degree in Language Pedagogy and throughout his career as Director of the U.S. Institute of Languages. Negotiating a Conversation The approach this course uses

recognizes that it takes new Spanish speakers years to become fluent. However, if a nurse learns the medical vocabulary and strategies to properly negotiate a conversation, (s)he can learn to work through virtually any situation in a relatively short period of time. For example, if a patient says something a nurse doesn't understand, the nurse can ask them to repeat it or say it slower.

If a nurse doesn't know how to say something, (s)he can point to it and ask ¿Cómo se dice? (How do you say that.) These and many other techniques that are taught to help a nurse work through new situations. Use of Technology The use of technology can be very helpful to get through tricky situations. However, if a nurse only uses technology, this provides a poor patient experience

<p>and demonstrates poor bedside manner. Also, if only technology is used, body language and gestures are missed and the meaning can be misinterpreted . It is recommended that the nurse</p>	<p>continue learning as much as possible using this course and software, then use technology to fill in the gap. Learn More about the AuthorsTake a "Look Inside" the textbook (at the left) to</p>	<p>learn more.
