#1 New York Times Bestseller In this pathbreaking guide, two of the world's most popular and trusted pet care advocates reveal new science to teach us how to delay aging and provide a long,

happy, healthy life for our canine companions. Like their human counterparts, dogs have been getting sicker and dying prematurely over the past few decades. Why? Scientists are beginning to understand that the chronic diseases afflicting humans—cancer, obesity, diabetes, organ degeneration, and autoimmune disorders—also beset canines. As a result, our beloved companions are vexed with preventable health problems throughout much of their lives and suffer shorter life spans. Because our pets can't make health and lifestyle decisions for themselves, it's up to pet parents to make smart, science-backed choices for lasting vitality and health. The Forever Dog gives us the practical, proven tools to protect our loyal four-legged companions. Rodney Habib and Karen Becker, DVM, globetrotted (pre-pandemic) to galvanize the best wisdom from top geneticists, microbiologists, and longevity researchers; they also interviewed people whose dogs have lived into their 20s and even 30s. The result is this unprecedented and comprehensive guide, filled with surprising information, invaluable advice, and inspiring stories about dogs and the people who love them. The Forever Dog prescriptive plan focuses on diet and nutrition, movement, environmental exposures, and stress reduction, and can be tailored to the genetic predisposition of particular breeds or mixes. The authors discuss various types of food—including what the commercial manufacturers don't want us to know—and offer recipes, easy solutions, and tips for making sure our dogs obtain the nutrients they need. Habib and Dr. Becker also explore how external factors we often don't think about can greatly affect a dog's overall health and wellbeing, from everyday insults to the body and its physiology, to the role our own lifestyles and our

vets' choices play. Indeed, the health equation works both ways and can travel "up the leash." Medical breakthroughs have expanded our choices for canine health—if you know what they are. This definitive dog-care guide empowers us with the knowledge we need to make wise choices, and to keep our dogs healthy and happy for years to come.

World-renowned dog behaviourist and psychologist Mark Vette (of Driving Dogs and Flying Dogs fame) shows you how to transform your dog and create a harmonious life-long bond. This book looks at how the dog evolved from the wolf, and the ancient co-evolved bond that exists between humans and dogs, before explaining how to get your dog into a fundamental calm 'learning state' so you can encourage the behaviours you want from your pet. Mark then explains how to train your new puppy, and if you have an older dog that wasn't trained properly at that crucial early stage, how to correct each of the top ten behavioural problems that occur. Drawing from Mark's own life and experiences there are case studies throughout with beautiful photographs of these amazing animals. The top ten problems are: 1. Hyperactivity 2. Phobias 3. Excessive submission 4. Dog-to-dog aggression 5. Dog-to-human aggression 6. Barking 7. Separation distress 8. House training 9. Destructive behaviours 10. Recall This book is absolutely packed with information. It is a comprehensive practical guide combining the latest cognitive science with modern, loving, training techniques.

When Pigs Fly! National Geographic Books

From the #1 New York Times bestselling author of Inside of a Dog and The Year of the Puppy, an eye-opening, informative, "entertaining, and enlightening" (BookPage) celebration of the human-canine relationship for the curious dog owner and science-lover alike. We keep dogs and are kept by them. We love dogs and (we assume) we are loved by them. We buy them

sweaters, toys, shoes; we are concerned with their social lives, their food, and their health. The story of humans and dogs is thousands of years old but is far from understood. In *Our Dogs, Ourselves*, Alexandra Horowitz explores all aspects of this unique and complex relationship that "dog lovers will savor and absorb" (Shelf Awareness). As Horowitz considers the current culture of dogdom, she reveals the odd, surprising, and contradictory ways we live with dogs. We celebrate their individuality but breed them for sameness. Despite our deep emotional relationships with dogs, legally they are property to be bought, sold, abandoned, or euthanized as we wish. Even the way we speak to our dogs is at once perplexing and delightful. In thirteen thoughtful and charming chapters, *Our Dogs, Ourselves* affirms our profound affection for this most charismatic of animals—and makes us "see canine companions in new ways" (Science News).

In every event, he brings his love for people with him and shares his warmth with everyone he meets. Through Mosby's humorous, sometimes solemn, always inspirational exploits, learn how a dog can encourage you to take God into your life and work for Him every day of the week, not just on Sundays.

Ancestors and canine cousins of our dogs didn't eat "krunchy kibble" or "meat 'n gravy in a can." They ate what they found or caught... and it wasn't cooked or "enriched" either! It was high in protein, with balanced fats, and usually included a few fruits, vegetables and grasses. Steve Brown, an expert on canine nutrition, shows how you can bring the benefits of the canine ancestral diet to your dog by feeding him differently as little as just one day a week. And no, you won't need to lead a pack of dogs on a hunting expedition! Just follow Steve's well-researched and easy to follow ABCs to make improvements to whatever your dog currently eats. BONUS! Raw food or home prepared feeders will learn how to balance nutrients more precisely, especially fats, for optimum health. A dog diet to get wild about!

- Learn about the latest research on the importance of protein and healthy fats in your dog's diet.
- Find out why commercial foods can't include these fragile-but-crucial nutrients, and how you can make sure your dog gets them.
- Just one day a week, or more frequently if you choose, follow the simple recipes that balance the nutrition in the commercial food you are feeding—wet or dry!

COOKING LIGHT Snacktastic! HarperCollins

A leading reporter offers a tour of military working dogs' extraordinary training, heroic accomplishments, and the lasting impacts they have on those who work with them. People all over the world have been riveted by the story of Cairo, the Belgian Malinois who was a part of the Navy SEAL team that led the raid on Osama bin Laden's compound. A dog's natural intelligence, physical abilities, and pure loyalty contribute more to our military efforts than ever before. You don't have to be a dog lover to be

fascinated by the idea that a dog—the cousin of that furry guy begging for scraps under your table—could be one of the heroes who helped execute the most vital and high-tech military mission of the new millennium. Now Maria Goodavage, editor and featured writer for one of the world's most widely read dog blogs, tells heartwarming stories of modern soldier dogs and the amazing bonds that develop between them and their handlers. Beyond tales of training, operations, retirement, and adoption into the families of fallen soldiers, Goodavage talks to leading dog-cognition experts about why dogs like nothing more than to be on a mission with a handler they trust, no matter how deadly the IEDs they are sniffing, nor how far they must parachute or rappel from aircraft into enemy territory. "Military working dogs live for love and praise from their handlers," says Ron Aiello, president of the United States War Dogs Association and a former marine scout dog handler. "The work is all a big game, and then they get that pet, that praise. They would do anything for their handler." This is an unprecedented window into the world of these adventurous, loving warriors.
