Mythology is a miscellaneous collection of old tales and legends which embraces all of what we now call religion, science and philosophy (natural moral and metaphysical). The Myths are the spiritual instructions of our forefathers. The mythical stories are not entertainment stories or folk-tales; because they can be told only at certain times of the year and under certain conditions. The belief systems of all the 14 (fourteen) mountain tribes and races of Sikkim were sandwiched between the faith of Buddhism from the north and Hinduism from the west in the beginning; and then Christianity from the south mainly during the chieftdom periods of Sikkim (1642-1975 A.D.) and Nepal (1769-2008 A.D.); affecting their indigenous belief systems tremendously. Today, the different tribes and races of Sikkim have awakened not against anybody else but themselves from within and have started rediscovering their own belief systems and traditions. Many of these hill tribes or races have adopted many well developed religions of the world with insignificant traces of their own within it. This book is an attempt to collect the valuable information of these lesser known oriental Belief System or Religion and Mythologies of the different ethnic mountain people of Sikkim for the first time for further research and development. *Faust in Copenhagen* J.K. Barrik  
 Physicist and Quantum Cop Madison Martin knows it's her responsibility to bring a quantum killer to justice. As the q-crimes increase, she worries that

reality itself if a goner. Can she take down the q-criminal before it's too late?

Penguin

A major anthology of the "hard SF" subgenre-arguing that it's not only the genre's core, but also its future. Something exciting has been happening in modern science fiction. After decades of confusion, many of the field's best writers have been returning to the subgenre called, roughly, "hard SF"--science fiction focused on science and technology, often with strong adventure plots. Now, World Fantasy Award-winning editors David G. Hartwell and Kathryn Cramer present an immense, authoritative anthology that maps the development and modern-day resurgence of this form, argues for its special virtues and present preeminence-and entertains us with some spectacular storytelling along the way. Included are major stories by contemporary and classic names such as Poul Anderson, Stephen Baxter, Gregory Benford, Ben Bova, David Brin, Arthur C. Clarke, Hal Clement, Greg Egan, Joe Haldeman, Nancy Kress, Paul McAuley, Frederik Pohl, Alastair Reynolds, Kim Stanley Robinson, Robert J. Sawyer, Karl Schroeder, Charles Sheffield, Brian Stableford, Allen Steele, Bruce Sterling, Michael Swanwick, and Vernor Vinge. The Hard SF Renaissance is an anthology that SF readers will return to for years to come. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied. Balance of Power Love Den Media Publishing

The untold story of the heretical thinkers who dared to question the nature of our quantum universe Every physicist agrees quantum mechanics is among humanity's finest scientific achievements. But ask what it means, and the result will be a brawl. For a century, most physicists have followed Niels Bohr's Copenhagen interpretation and dismissed questions about the reality underlying quantum physics as meaningless. A mishmash of

solipsism and poor reasoning, Copenhagen endured, as Bohr's students vigorously protected his legacy, and the physics community favored practical experiments over philosophical arguments. As a result, questioning the status quo long meant professional ruin. And yet, from the 1920s to today, physicists like John Bell, David Bohm, and Hugh Everett persisted in seeking the true meaning of quantum mechanics. What Is Real? is the gripping story of this battle of ideas and the courageous scientists who dared to stand up for truth.

[Song of the Eclectic Tambourine](#) Wildside Press LLC

The Harry Potter for a new generation - the stunning free first in series young adult fantasy from Chris Ward, acclaimed science fiction and dystopian writer of the Tube Riders Series. At the end of everything ... there is a new beginning. Benjamin Forrest wakes up on a strange beach. Two suns shine in the sky, and a couple of miles out from the shore, the sea drops off the edge of the world. Where is he? How did he get here? And most importantly, how can he get home? As he begins to encounter the unusual characters of Endinfinium, he finds himself at the centre of a battle for a secret world, one in which he will play a decisive role ... Benjamin Forrest is the Harry Potter for a new generation, and ENDINFINIUM the series Young Adult fans have been waiting for. Chris Ward is the critically acclaimed author of the dystopian Tube Riders series.

[Time Machine Tales](#) AuthorHouse

'When your grandpa was in hospital, he asked me one night to promise him that, when he had gone from us, I would teach you Islam - our Islam: the Islam I grew up with ... In that dark, impersonal room, he was thinking of you.' This is why one father began to teach his daughter night after night not only about his own religion, but about that which unites all believers, about God and death, about love and the infinity that surrounds us. This highly personal book is not only a magical literary masterpiece, but also a rich resource of knowledge, and this because Navid Kermani dares to venture into the darkness in order to give expression to our confusion. And because his way of talking, his openness, his knowledge which derives from his immersion in two cultures, are so unique, so light and so deep.

[The Universe](#) Ballantine Books

When Charles Darwin finally completed his life's greatest work, *On the Origin of Species*, he waited twenty-three years to publish it. That's roughly the life expectancy of a man in the fourteenth century, for scale. It took a mediaeval lifetime to contemplate whether or not the disruption to mankind's way of life was truly worth it. When Leonidas Archibald Agglesfield found the missing 95 per cent of the universe, however, he neglected to apply the same degree of contemplation. From Socrates to Descartes, perhaps the question that has pestered mankind the most is: What makes us human? Are we human because we think or because we feel? Are we humans made in the image of the one true God? Or have we fashioned God in our image to imbue ourselves with the power to determine our own fate and immortality? What Leonidas found... was not what he had bargained for. And as a Doctor of Dark Matter, his findings did not disappoint. God would be joining the black rhino on the endangered species list. And while that was precisely what Leonidas Archibald Agglesfield had thought he wanted... he had no idea of the ramifications. There are forces that we might have once thought to be outside of our control. But perhaps we're capable of more than we think. And sometimes what we need the most... has a way of finding us instead.

[Sense of Wonder](#) World Scientific

\*Winner of the Lambda Literary Award for Gay Memoir/Biography\* An Honor Book for the 2023 Stonewall Book Award—Israel Fishman Non-Fiction Book Award This witty memoir traces a touching and often hilarious spiralic path to embracing a gay, Latinx identity against a culture of machismo—from a cockfighting ring in Nicaragua to cities across the U.S.—and the bath houses, night clubs, and drag queens who help redefine pride I've always found the definition of machismo to be ironic, considering that pride is a word almost unanimously associated with queer people, the enemy of machistas . . . In a world desperate to erase us, queer Latinx men must find ways to hold on to pride for survival, but excessive male pride is often what we are battling, both in ourselves and in others. A debut memoir about coming of age as a gay, Latinx man, High-Risk Homosexual opens in the ultimate anti-gay space: Edgar Gomez's uncle's cockfighting ring in Nicaragua, where he was sent at thirteen years old to become a man. Readers follow Gomez through the queer spaces where he learned to love being gay and Latinx, including Pulse nightclub in Orlando, a drag queen convention in Los Angeles, and the doctor's office where he was diagnosed a "high-risk homosexual." With vulnerability, humor, and quick-witted insights into racial, sexual, familial, and professional power dynamics, Gomez shares a hard-won path to taking pride in the parts of himself he was taught to keep hidden. His story is a scintillating, beautiful reminder of the importance of leaving space for joy.

[Quantum Forgiveness](#) Living Miracles Publications

David Hoffmeister uses seven mind-expanding movies as modern-day parables to guide you into an experience of Quantum Forgiveness. Take forgiveness as taught by Jesus 2,000 years ago, the science of the material universe as understood by Quantum Physics, and movie-watching as a spiritual tool. Combine that with the clarity of mystic David Hoffmeister, a world-renowned teacher of A Course in Miracles, and you have an insightful and original book for Awakening to permanent Peace. David's practical application of these non-dual teachings necessary to experience the Unified Mind and his clarity about the function of True Forgiveness in spiritual awakening, allow us to accept Rumi's invitation into a field of pure potential! "Out beyond ideas of wrongdoing and rightdoing there is a field. I'll meet you there." ~ The Essential Rumi "David Hoffmeister is a beautiful teacher of A Course in Miracles. In his new book, Quantum Forgiveness: Physics, Meet Jesus, he offers a unique and powerful pathway for transcending fear and strengthening your miracle mindset. I recommend this book to anyone on a committed spiritual path. I absolutely adore David and all of his work!" ~ Gabrielle Bernstein, New York Times best-selling author of Miracles Now

USA Today bestselling author Jack Du Brul brings back geologist-adventurer Philip Mercer for an apocalyptic adventure. Hired to lead the excavation of caverns deep beneath Area 51, Philip Mercer finds himself drilling straight into the epicenter of an age-old conspiracy. A reclusive order of Himalayan monks, through special knowledge of the earth's tectonic movement, has predicted the end of the world—and it is determined to see the prediction unfold accordingly. Now, with icebergs floating through the South Pacific and a thermonuclear bomb set to destroy an island paradise, the stage is set for Armageddon—and it is up to Philip Mercer and the beautiful, mysterious Tisa Nguyen to prevent a cataclysm beyond imagination.

He couldn't believe it. He put his elbows on the knees and hid his face in arms. The thought that she has gone was tearing Tien's soul apart. «I won't let you go, I just can't do that» - her words were sounding in his head giving an awful ache. He was looking for her everywhere, even in the past and in the future. The impossible became possible for him. Everything that used to mean something for him have lost its sense without her.

[Deep Fire Rising](#) Red Wheel/Weiser

#1 NEW YORK TIMES BESTSELLER • From the author of *Small Great Things* and *A Spark of Light* comes a “powerful” (The Washington Post) novel about the choices that alter the course of our lives. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY MARIE CLAIRE Everything changes in a single moment for Dawn Edelstein. She's on a plane when the flight attendant makes an announcement: Prepare for a crash landing. She braces herself as thoughts flash through her mind. The shocking thing is, the thoughts are not of her husband but of a man she last saw fifteen years ago: Wyatt Armstrong. Dawn, miraculously, survives the crash, but so do all the doubts that have suddenly been raised. She has led a good life. Back in Boston, there is her husband, Brian, their beloved daughter, and her work as a death doula, in which she helps ease the transition between life and death for her clients. But somewhere in Egypt is Wyatt Armstrong, who works as an archaeologist unearthing ancient burial sites, a career Dawn once studied for but was forced to abandon when life suddenly intervened. And now, when it seems that fate is offering her second chances, she is not as sure of the choice she once made. After the crash landing, the airline ensures that the survivors are seen by a doctor, then offers transportation to wherever they want to go. The obvious destination is to fly home, but she could take another path: return to the archaeological site she left years before, reconnect with Wyatt and their unresolved history, and maybe even complete her research on The Book of Two Ways—the first known map of the afterlife. As the story unfolds, Dawn's two possible futures unspool side by side, as do the secrets and doubts long buried with them. Dawn must confront the questions she's never truly asked: What does a life well lived look like? When we leave this earth, what do we leave behind? Do we make choices . . . or do our choices make us? And who would you be if you hadn't turned out to be the person you are right now?

Collects short stories exploring themes of time and space travel, self-discovery, and science and technology.

[The Year's Best Science Fiction: Thirteenth Annual Collection](#) Basic Books

A global expansion of consciousness is underway. As predicted by ancient prophecy, old ways of thinking and of seeing the world are shifting. Mind-stretching new phenomena are challenging current reality. New frontiers of science are disclosing a connection between our consciousness and physical reality. As consciousness changes, so do our perceptions. The door is opening to a new reality. Join Colin and Synthia as they explore what is beyond this door. Examine the multitude of current changes—from the bases of society to the foundations of science—that indicate the unfolding of a new paradigm. Investigate non-ordinary reality and unexplained phenomena as interactions of consciousness. In this fascinating new title, you will explore and learn about: Parallel cases of inexplicable exchanges between lights in the sky and crop circles on the ground Strange sounds in the sky heard and recorded around the world Photographic orbs of light The Norway Spiral, a rotating spiral of light seen by hundreds of people in 2009 Unexplained RADAR interference patterns correlating with weather anomalies

[The Nebula Awards](#) Lulu.com

Quantum Theory is the most revolutionary discovery in physics since Newton. This book gives a lucid, exciting, and accessible account of the surprising and counterintuitive ideas that shape our understanding of the sub-atomic world. It does not disguise the problems of interpretation that still remain unsettled 75 years after the initial discoveries. The main text makes no use of equations, but there is a Mathematical Appendix for those desiring stronger fare. Uncertainty, probabilistic physics, complementarity, the problematic character of measurement, and decoherence are among the many topics discussed. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

[Year's Best SF](#) The Hard SF Renaissance

Song of the Eclectic Tambourine begins in 1968 when Marc Amati falls in love with two young women as disparate as the political climate of the times. Lilly Garrett is a courageous flower child committed to non-violence, social justice, and ending the Vietnam War, while Mary Belinda is wealthy, talented, and determined to achieve the fame her mother was cheated by McCarthyism and Hollywood sexism. What Marc learns from, and because of, both women will affect life and help him deal with the challenges of his generation: humanity versus expediency, compassion versus profit, and self-interest versus altruism. For Marc, it is a coming of age in stages. Both women face their own ordeals as they attempt to succeed in a hostile society - Mary being a strong-willed woman in the recording industry, and Lilly in a series of social and political endeavors. Marc's story is an ironic, irreverent, and critical look at the past and its effect on the present. More at <http://www.dtdesertrat.wordpress.com>

[On the Edge of Reality](#) Springer

This book presents a collection of novel contributions and reviews by renowned researchers in the foundations of quantum physics, quantum optics, and neutron physics. It is published in honor of Michael Horne, whose exceptionally clear and groundbreaking work in the foundations of quantum mechanics and interferometry, both of photons and of neutrons, has provided penetrating insight into the implications of modern physics for our

understanding of the physical world. He is perhaps best known for the Clauser-Horne-Shimony-Holt (CHSH) inequality. This collection includes an oral history of Michael Horne's contributions to the foundations of physics and his connections to other eminent figures in the history of the subject, among them Clifford Shull and Abner Shimony.

[High-Risk Homosexual](#) Catapult

This book contains a broad overview of time travel in science fiction, along with a detailed examination of the philosophical implications of time travel. The emphasis of this book is now on the philosophical and on science fiction, rather than on physics, as in the author's earlier books on the subject. In that spirit there are, for example, no Tech Notes filled with algebra, integrals, and differential equations, as there are in the first and second editions

of TIME MACHINES. Writing about time travel is, today, a respectable business. It hasn't always been so. After all, time travel, prima facie, appears to violate a fundamental law of nature; every effect has a cause, with the cause occurring before the effect. Time travel to the past, however, seems to allow, indeed to demand, backwards causation, with an effect (the time traveler emerging into the past as he exits from his time machine) occurring before its cause (the time traveler pushing the start button on his machine's control panel to start his trip backward through time). Time Machine Tales includes new discussions of the advances by physicists and philosophers that have appeared since the publication of TIME MACHINES in 1999, examples of which are the chapters on time travel paradoxes. Those chapters have been brought up-to-date with the latest philosophical thinking on the paradoxes.
