Earlier this year, the Praemium Erasmianum Foundation bestowed its annual award—the Erasmus Prize—on Benjamin Ferencz and Antonio Cassese, two pioneers in the field of international law. Ferencz, a leading American prosecutor, author, and

lecturer, was present at the American war crimes trials in Dachau and was the chief prosecutor in the Einsatzgruppe n trials in Nuremburg. Like Ferencz, Cassese was a key figure in the development of international criminal law, serving as the first president of the International Criminal Tribunal for the former Yugoslavia and president of the European Committee for the Prevention

of Torture, and chairman of the UN Commission of Inquiry into Violation of Human Rights and Humanitarian Law in Darfur. Cassese is currently the president of the Special Court for Lebanon. In The Prosecutor and the Judge, Heikelina Verrijn Stuart and Marlise Simons provide in-depth, revealing interviews with these two advocates of international law. Supplementin

g the interviews are several key articles written by Ferencz and Cassese that highlight the two men's achievements and set the development of international law in context. **Manual of Home Health Nursing Procedures** Amsterdam University Press The UK Pesticide Guide 2017 has seven new active ingredient profiles. Two are confirmed as available in

2017 while five are currently only listed as Products also Registered (PARs). The two available are: - cyantraniliprol e for insect control in headed brassicas - halauxifen-methyl +/- fluroxypyr for broad-leaved weed control in cereals. The five awaiting confirmation are: - buprofezin for insect control in protected Solonaceae - pethoxamid for weed control in grain maize and winter

oilseed rape - Pepino Mosaic Virus for suppression of viral diseases in protected tomatoes - Pythium oligandrun M1 for disease control in spring barley, wheat, and oilseed rape - Tembotrione for weed control in maize and sweetcorn. In addition, hazard precautions have been upgraded, and the roll out of extended buffer zones for some products continues with many products re-

approved under new MAPP numbers. There are also: - Seven new herbicide profiles-- four in the main section and three as PARs - Eight new fungicide profiles-- six in the main section and two as PARs - One new plant growth regulator (PGR) combination and one new molluscicide. The main section of the guide no longer includes eight herbicide profiles (tepraloxymid

approval expires 30/11/2016), 17 fungicides (including prochloraz), four insecticides, and one PGR.

**Trigonometry** Capstone Classroom Newlywed vampires Sarah and Thierry de Bennicoeur have their whole undead lives ahead of them. And with Thierry's job as a consultant for the Ring sending them across the globe to solve one vampire crisis after another, eternity may never have a dull moment. Sarah was hoping the honeymoon would literally last forever, but when Thierry

receives a mysterious invitation to an auction held in an old Beverly Hills mansion, it's clearly time to get back to work. Thierry hopes to win a powerful amulet containing a wish-granting djinn that has eluded him for centuries. Unfortunately, Atticus Kincade, head of the vampire council, also has his eye on the item. When the auction's host reveals his unpleasant history with Thierry, and Sarah

discovers a talking head in the freezer, things get even weirder than usual. But when the amulet goes missing, and everyone is suddenly trapped inside the mansion, the undead guests find themselves in mortal danger—and Sarah had better be careful what she wishes for.  By far the biggest change to The UK Pesticide Guide in 2020 is the loss of a number of active ingredients that have been fundamental to many crop protection programmes. The final use-up of chlorothalonil formulations; propiconazole, fenpropimorph, chloridazon and diquat occurs in 2020 but there are also a few exciting new

additions. Aclonifen is a new residual herbicide for use in potatoes that already has a number of EAMUs for use in minor crops. BASF is launching its new triazole, mefentrifluconazole, which promises to restore full triazole activity, at least initially. On the insecticide front the new active ingredient from Corteva agriscience, sulfoxaflor, is now listed for use in Cucurbitae and

ornamentals under full protection for control of aphids and whitefly.

The world remembers Nuremberg, where a handful of Nazi policymakers were brought to justice, but nearly forgotten are the proceedings at Dachau, where hundreds of Nazi guards, officers, and

doctors stood trial for personally taking part in the torture and execution of prisoners inside the Dachau, Mauthausen, Flossenburg, and Buchenwald concentration camps. In Justice at Dachau, Joshua M. Greene, maker of the award winning documentary film Witness: Voices from the Holocaust, recreates the Dachau trials and reveals the dramatic story of William Denson, a

soft-spoken young lawyer from Alabama whisked from teaching law at West Point to leading the prosecution in the largest series of Nazi trials in history. In a makeshift courtroom set up inside Hitler's first concentration camp, Denson was charged with building a team from lawyers who had no background in war crimes and determining charges for crimes that courts had never before confronted.

Among the accused were Dr. Klaus Schilling, responsible for hundreds of deaths in his “research” for a cure for malaria; Edwin Katzen- Ellenbogen, a Harvard psychologist turned Gestapo informant; and one of history’s most notorious female war criminals, Ilse Koch, “Bitch of Buchenwald,” whose penchant for tattooed skins and human bone lamps made headlines worldwide.

Denson, just thirty-two years old, with one criminal trial to his name, led a brilliant and successful prosecution, but nearly two years of exposure to such horrors took its toll. His wife divorced him, his weight dropped to 116 pounds, and he collapsed from exhaustion. Worst of all was the pressure from his army superiors to bring the trials to a rapid end when their agenda shifted away

from punishing Nazis to winning the Germans’ support in the emerging Cold War. Denson persevered, determined to create a careful record of responsibility for the crimes of the Holocaust. When, in a final shocking twist, the United States used clandestine reversals and commutation of sentences to set free those found guilty at Dachau, Denson risked his army
